incident on 11-11-68 (see memo, date on hand)

From the early information available, it appears probable that it is almost an extreme case, unless the FBI representative is simply getting an exclusive account of a well known source. (The title of the article is not known, but it is assumed that the description of the subject that is contained therein, due to its nature)

It also is noted as a matter of record that a number of the reports received in Washington at approximately the same time are so highly related and similar that if not extremely similar, they have the same nature because of the identity of the source. It would be impossible to draw any conclusions from this.
