

UNCLASSIFIED

Resident, 421 - Belleville, Illinois - 22 June 1948

It appears probable that this suspect has an abnormal mind explanation. If the evidence is correct as given, the subject would not have been a fireman. The big tag course and the relatively slow speed do not fit in with the description of a large motor. Last of time and train also tend to rule out this hypothesis.

The description may not fit of a light-colored vehicle.
