Agoston 4110 - Carlsbad, California - 21 July 1943

Since a complete description of this subject is given
in Agoston 4110 from the Wilson Observatory and Station, I have
been able to determine that there were no other sightings of
extraterrestrial phenomena, and since I am convinced a report of
subject was in all respects reliable, I am in a position to
forward your mail with confidence and without the usual
caution.
