

Incident No. 75 -- 13 August 1947, 1900 hours, Snake River Canyon, Idaho.  
 A farmer (REDACTED) with his two sons, two and eight years of age, witnessed an object move down a canyon. It was in view only momentarily at a distance of 500 feet, and approximately 75 feet above the ground. The object made a whirring sound, and was impossible to color. The farmer doubted the possibility of its visibility if viewed against the sky. The children told of countless bursts or exhaust flames shooting from the device through which could be seen daylight. The object passed over some trees, which in the words of the farmer, "were around us but as if they were in a vacuum."

AGC Opinion: It seems logical to concur with Dr. Spang's deduction, that this object was simply a rapidly moving atmospheric eddy.
