

Incident No. 511 -- 1 Sept 1947, 0905 Hours, Central Philippines.
An F-47 pilot looking through other aircraft at 1500 ft saw an object
approximately three miles away at 1500 ft. Object appeared to be a
flying wing fairly big, heavily built, silver in color. The pilot turned
to intercept the object and the object turned on nearly the same course
and disappeared from sight in five seconds. Object appeared to have a
dural fin but distance was too great to note any other features. The
report does not reveal whether any of the other pilots saw the object.

400 October: No definite explanation. However, enemy pilot has
expressed the intention of meeting an aircraft obliquely at nearly the
limit of vision and then looking right at the same range when the air-
craft presented, in stern view, a smaller surface.
