

Incident No. 101 - 31 July 1944, 6425 Hours, Indianapolis, Indiana.
A man and his wife saw an object shaped like a symbol, featureless white in color, at an altitude of 2000 ft. The object moved across the sky to the east at approximately 1000 MPH, on a level course and showing no rotation, giving the appearance of spinning. It was twenty feet in diameter and six to eight feet high in the center. There was no sound or exhaust.

RAF Opinion: This object could conceivably be the same as described earlier as that seen in Incident 101, although all the remaining evidence is widely divergent. No satisfactory conclusion can be drawn.
