

Incident No. 102 -- 11 August 1944, 1800 Hours, Beach, Minnesota.
 Two children, eight feet and eight, described a dull gray object two
 feet in diameter and one foot thick, shaped like two plates together
 which settled gently to the ground. It climbed upon its rounded down,
 on the ground it emitted a whistling noise and "shot" up to twenty feet
 where it hesitated, whistled once more, "shot" up to thirty feet, then
 "shot" off in a southeasterly direction.

AMC Opinion: This apparent bit of fantasy is hardly worth further
 consideration.
