

Incident No. 144 -- 20 July 1964, 1530 hours, Ansbach, FRG

Report:

One observer saw an object intermittently through clouds four times. The object had two decks and no wings, was said to be very high, with speed comparable to F-4.

MC Analysis: Insufficient information. "It may be well to point out that the F-4 is not visible in flight, therefore, it follows that this object would not have been visible as described if travelling at that speed."
