

Incident No. 135 -- 23 Sept. 1956, 1200 Hours, San Pablo, Calif.
 On a B-17 land 547, two men saw a large translucent object over a wide
 overcast. It was the size of a four-engine bomber, half-way in color,
 and appeared to be made of wax. According to the first observer,
 the center portion was spherical and undulated, having appendages fore
 and aft, like an anemone. The second observer said the object looked
 like a "transparent snake" covered with translucent material. The in-
 vestigator states one observer's description was in direct contradic-
 tion to the other. One observer was furnished but wore no glasses.
 The other was over seventy, needed glasses to read but wore none at
 time of sighting.

AME Opinion: The only fact that might be accepted is that an ob-
 ject was seen. Two observers, side by side, could not agree on its
 appearance. The evidence is unclear. a balloon or cluster of balloons,
 an aircraft, or a cloud could have been the stimulus.
