

UNCLASSIFIED

Incident No. 234 -- 4 Jan. 1949, 1400 hours, Sioux Field, Territory of Hawaii.

An air force pilot saw an object which appeared to be a large round plane of flat cardboard the size of a 7-6. It was white underneath and dark on top. It approached from 25 mile distance at 3000 ft and circled the area at 65. The object seemed to "blink" a "matian reflection" regularly. It departed climbing at 25° angle.

NOTE: The evidence does not lead to an explanation. It should be noted, however, that if the object were actually the size of a 7-6 at 3000 feet a greater amount of detail should have been observed.
