

UNCLASSIFIED
[REDACTED]

- A. The object, when wholly deflated and blown, retained a definite shape.
- B. No vapor trails, exhaust plumes, or jet propulsion were observed.
- C. The object definitely seemed to be extraterrestrial. The witnesses are all experienced aviators with General Mills balloon projects and have been observing all types of balloons for several years.

IV - CONCLUSIONS

No conclusions can be made. It is significant however, that the witnesses can be graded as very reliable and that they observed an object with which they were entirely unfamiliar.
