

CONFIDENTIAL

UNCLASSIFIED

An attempt to arrange a meeting by Dr. Hynek with Dr. Menzel and Dr. Liddell, after the meeting was over, was unsuccessful because Liddell and Menzel both had to leave immediately after the meeting.

4. Interrogation Forms

Five hundred copies of the "U.S. Air Force Technical Information Sheet" (Form A and Form B) were delivered to W-P AFB on 20 October 1950. This questionnaire was used in place of the "Detachable Observers Data Sheet" to record data on all sighting reports dated after 31 March 1950. It has proved to be more satisfactory than the previous form, especially from the standpoint of recording data from sighting reports in greater detail.

Additional copies of the "U.S. Air Force Technical Information Sheet" can be supplied to Blue Book as needed.

5. Future Work

Coding and evaluation of 1950 sighting reports will continue. A preliminary analysis of data on all sighting reports dated previous to 1950 will be given to Blue Book as soon as possible after evaluation is completed of the 1947 and 1948 sighting reports.

By 10 December 1950 all sighting reports dated before 15 June 1950 should be processed and evaluated ready for IBM analysis. Complete IBM analysis of all sighting reports will not be started until all reports dated previous to 1950 are processed and evaluated, because of the nature of the work required, and the fact that the number of reports for the last three months of 1950 is not yet known, no estimate can be given as to the time final IBM analysis will begin. It is hoped, if the frequency of sighting reports follows the present decreasing trend, that complete IBM analysis for sightings dated through 1950 may be started by 1 February 1951.

II. RECENT REPORTS

The following reports are summaries of reports that were received during the month of November 1950.
