Los Alamos, New Mexico

30 December 1950

I. Description of Incident

An object traveling in a slight curve and accompanied by a high pitched screeching noise which trailed the object for four seconds was observed by an employee of AEC Security Service. The time of sighting was 2000 HRT in clear weather conditions of 40 miles visibility. The observer's credibility is considered excellent.

II. Description of Incident

This report can be categorized as a low meteor, some of which emit the sound described above. Length of observation was extremely brief at two seconds.

III. Conclusion

Probably meteor.
