

~~SECRET~~
UNCLASSIFIED

3 July 1953 - Reno, Nevada (contd)

Discussion

This sighting is one of the best in Project Blue Book's files as far as civilian observers are concerned. These civilians were very diligent in their efforts to report the sighting and it is unfortunate that the officials in that area were not aware of the procedure for reporting unidentified flying objects. The description of this object, and the length of time observed rules out any conventional objects in our atmosphere. Project Blue Book's suspect satelonomers were contacted. They stated that this sighting was undoubtedly caused by the planet Venus.

Conclusion

Was satelonomical (Venus).
