2. To summarize the opinions of the competent people in this field relative to the broad subjects of unidentified aerial objects.
3. To obtain information and suggestions which may be useful in carrying out future phases of the work on the investigation.

This year will be completed July 31. After Dr. Spork had spent a short time on this tour, word was received from him that he is obtaining some interesting information from professional astronomers about sightings they have made which they have never otherwise reported. On a preliminary basis, it appears that the results of this survey will be valuable to the investigation.

#### Interrogation Form

Dr. Paul H. Fitts, Professor of Psychology and Director of Aviation Psychology at Ohio State University, and a group of his associates are now engaged in revising the Tentative Gossamer's Interrogation Form, Exhibit I, of the June 6 report. The object of this revision is to design the questionnaire so that a maximum of information regarding a sighting can be expected from the average individuals who will be filling out the questionnaire on future sightings. Trial tests with the revised questionnaire are planned to determine if the desired information on a sighting is obtained with it. It is expected that this revised questionnaire will be completed about July 16.
