Figure 1. The relationship between the number of species and the number of genera in the family. The number of species is plotted against the number of genera. The data points are shown as open circles. The regression line is shown as a solid line. The equation of the regression line is $y = 1.04x - 0.04$, where y is the number of species and x is the number of genera. The correlation coefficient is $r = 0.99$.
