Report of Sighting

On April 20, 1952, between 1815 and 1830, Capt William Miner and Lt Robert Weinberg both of whom reside in Skyway Lorm #4, W-P AFB, Ohio, observed an unidentified aerial object. Capt Miner first observed a bright object which reflected light 45° above the horizon in the east. The object was on an E to NE course and was observed for 15-20 seconds.

During this time its size, shape and color did not change. The object remained flat and long and was about the size of a jet at a mile or mile and a quarter distance. It emitted no trail or noise and went out of sight still considerably above cloud level.

About half-way through the observation, Capt Miner called Lt Weinberg who came out and observed the object for an extremely short period. The weather at 1830 was as follows:

Weather at 1830, 20 April 1952

5,000 scattered
 7,000 broken
 10 miles visioiity
 76 temperature
 49 dew point
 Wind W at 10 knots

1500 EST

Time	Direct	Velocity
2000	250°	11 K
3000	270°	11 K
4000	280°	10 K
5000	280°	8 K
6000	280°	8 K
7000	280°	10 K
8000	280°	11 K
9000	300°	19 K
10000	300°	21 K
