

AF FORM 10-1 (REV. 11-60)

AIR INTELLIGENCE INFORMATION REPORT

TO: USAF, AF Branch	ATTN: 2133-40	PAGE 6 OF 2 PAGES
<p>Location of the Object: When I first saw it, it was in the north, moving toward the north, upward - "backwards" - and downward movement about 1000.</p>		
<p>Weather: Sky clear, in spite of a slight haze, good visibility (no stars under about 20 degrees).</p>		
<p>In my opinion, it was neither a balloon nor an airplane with any kind of propulsion which is known today, nor a rocket or a satellite.</p>		
<p>These observations can be testified to by my wife and Dr. and Mrs. J. Harry Boglietti. (New Haven, 15 June 1951. 2133-40; former former)</p>		
<p><i>C. J. Finner</i> C. J. FINNER Commander AF Branch</p>
