Dear Sirs:

I am a patient at the National Jewish Hospital, 3800 Euclid Ave., Denver 2, Colorado. On Tuesday night, June 18-57 and again last night 6-22, I saw the so called "Flying Saucers" between 9:30 P.M. & 10:30 P.M., North of the Ramp. There may have been more but only one was visible at a time. They resembled the front portion and wings of a toy model glider all lighted up, the after part not visible. It traveled at a high rate of speed between 500 - 600 miles per hour. And, except for its speed, the gyrations were like that of a butterfly, very irregular. However it remained in the same area. It would continually disappear and reappear. They appeared rather close and rather low. When it left it shot straight away in an easterly direction.

This was witnessed by several other patients. Walter Smith, d. (Hatch), Melbina Martin, and our shared nurse. This also. I pass this on to you for what ever interest it may have.

Yours truly,

Dr. Joseph A. G. G. G.

Dr. H. L. Ford,
3800 Euclid Ave.,
Denver, Colo.
