Breher-Brower sightings  
Pg. 4

he compared its speed to that of a jet fighter and estimated that it was going three times faster than a jet. It left no trail or smoke. The day was clear and there were no airplanes in view.

George Breher's background

George Darnar Breher resides at E. 1114 Thurston St. Spokane (phone Riverside 7876) and works in Osoyoos, Idaho as chief engineer for radio station KSAI. He has worked in this field for 14 years. During the war years he served as a Marine radar technician in the Southwest Pacific theatre. He was described by his friend Brown, as being a avidous, clear-thinking person, although inclined to become excited over such things as this flying object.

Weather and Wind

The Oelger Station weather reading for 0628 PWT was: visibility 40 miles, sea level pressure 1,020.2 mb, temperature 88 degrees, surface winds 28k 2 knots, altimeter 30.00, humidity 38%, cloud cover less than 1/10 of sky with cirrus and alto cumulus. Below are the winds aloft as of the 0900 PWT reading and are given in standard U.S. weather sequence.

00200 0012 40714 0011 41008 1800 81707

2100 82100 22400 42012 43619 82421 02404

82800 02024 02508 82520 82827 02808

Low velocities over 20,000 ft were not recordable.
