AIR INTELLIGENCE INFORMATION REPORT

| | | | | | |
|-----------------------|------------|-------|-----|------|------|
| FORM 10-1 PART II | REPORT NO. | ISSUE | NO. | REV. | DATE |
| ATTN: Office, D/T FAP | IN-32-52 | | 3 | 2 | |

1. Two (2) sergeants working in the WPA-212 Operations Office, reported sighting an object approximately four (4) feet in diameter and orange in color, at 2300, 22 June 1952 just above the K-6 airstrip in Korea.

2. This object, measuring approximately four (4) feet in width, was first spotted at an altitude of eight thousand (8000) feet above the K-6 airstrip coming from the north. Immediately after sighting, the object went into a vertical dive and suddenly leveled off at a point approximately 1000 feet above the west end of the airstrip. During the dive, observers noted a trail of bright red flame extending from two (2) to five (5) feet in length. Without delay, it headed in a westerly direction for about one-fourth (1/4) mile. Two to three seconds elapsed during this maneuver, where it hovered briefly over the crest of some hills nearby. Grid coordinates of these hills are 2K 29900.

3. The object then circled in a 180 degree turn to the right, spending about 10 to 20 seconds in the turn. At the completion of the turn, the object emitted a bright flash and headed in an easterly direction for a distance of about one-half (1/2) mile. No trail was noticed at this time. At some point a second bright flash was noticed, followed by complete darkness.

4. The two observers, because of the sudden darkness could not see the object disappear in any particular direction.

5. No noise was striking at this hour, and during the entire sequence of maneuvers, no sound was heard from the object.

6. Checked by original reporting officer (1st Lt. Walter S. Polak, Intelligence Officer, Marine Air Group 22):

7. As a result of isolated and individual observation of the two (2) mentioned men concerned, there is little doubt in the writers mind that they did see some sort of flaming object in the sky at the time and place mentioned. A check with the Marine Air Group Security Office revealed that average temperatures prevailed, there was no wind activity, no moon and no clouds at the sighting levels. The period of time that elapsed from time of sighting to its disappearance would give added credence in their story. Both can hold responsible jobs in the Operational Office of their squadron.

8. Marine Aircraft Group Security reports the weather during this period to be as follows:

| | |
|--------------|--------------------------------|
| Temperature: | 75 Degrees |
| Sea Level: | 63 |
| Clouds: | 0/10 at 20,000 feet |
| Wind: | Surface-Gale |
| | 5,000' 11 knots at 80 degrees |
| | 10,000' 16 knots at 80 degrees |
| Moon: | New Moon Set at 20:1 |

9. There is no indication of these two (2) witnesses having knowledge of any other sightings of similar phenomena in the Korean area. The men were on duty at the time, had not been drinking and held responsible jobs in their unit.

REPORT BY RECEIVING OFFICE: K-6 airstrip is located at Pyeongtaek, (IC 2300), 35 miles
