HEADQUARTERS
144TH FIGHTER-BOMBER WING
Hamilton Air Force Base
Victorville, California

W802

2 May 1952

STATEMENT OF ECONOMOS

1. Airman 3rd Class Robert T. Evers, AF 2775427, 144th Medical Group, this date makes the following statement concerning my observations on 1 May 1952.

2. The ships of six objects appeared to me to be round, like that of billiard or saucers. The diameter compared in size with the length of a Coil. They were from (8) in number, three of them were flying forward and two behind. Two were flying abreast and two behind. Two were perfectly round in appearance and had no edges or tail assembly. They left no vapor trail or exhaust of any kind. I saw nothing on the objects which was colored, they appeared to me to be silver in color in appearance of the objects. The two objects at the rear of the formation were moving in a zigzag manner. They appeared to be moving faster than I am aircraft and disappeared at a great a pace as they appeared.

3. I sighted the objects at approximately 1445 hours and I saw them for from 5 to 10 seconds.

4. I spotted the objects from a tower which is about twenty (20) feet high. I was unable to make a close scrutiny of the objects with binoculars because by th t time they had already disappeared from view.

5. I sighted the objects from the tower of the small arms firing range at George Air Force base. They flew over the base in a southwesterly direction between 12 and 20 thousand feet.

6. I am nineteen (19) years old, am an assistance driver at George Air Force base. So civilian life I worked as a mechanic's helper. I completed the 10th grade at school and am unmarried.

7. At the time that I sighted the objects the sky was clear and there was practically no wind.
