23. In the following sketch place an "H" at the position the object was when you first saw it, and a "F" at its position when you last saw it.

A + B. same -

24. Draw a picture that will show the motion that the object made. Place an "H" at the beginning of its path and a "F" at the end of its path.

It melted away while I was flying the ellipse. For accompanying men had disappeared with quickly while I was following the dumbbell ball of you. There was the big variation - the transmittance - better + the very brilliant shape. I don't tell light which comes from the first group - three pairs of them.

25. Draw a picture that will show the shape of the object. Label and include in your sketch any details of the object that you saw and place in arrow beside the drawing to show the direction the object was moving.

Like a shortened ^{oval} basket ball. Not round.

Would be an ellipse. Long way N. to S. or E. to W.
short way N. to E. or S. to W.
