Enclosure (2)

At Rome 2-120-52 of 27 May 1952

Page 2

Therefore, I beg the competent American Military Authorities and particularly of the "Postage" to ask their correspondents or Military Attaches of the district, or the authorities of Brazil to have the city carefully inspected at the time and in the above-said region, providing for a special observation service by means of telescopes and aircraft, to take place.

If what I have said is taken - or not - into consideration, I shall greatly appreciate being notified with all possible urgency, to my address. As I am in a position to determine - about the 20th of June next - the day, and to restate the area in which the observation is to take place, I could inform directly the Brazilian Embassy.

Once the results of the said observations are known, please give me confirmation of these, as, if you are interested, I shall be able to furnish further and more sensational information.

For the present I prefer to keep the source of this information secret, and that until the date when the first inspection will take place.

/s/ Sebastião Antonio
