APPENDIX III

Atlantic Ocean - 8 Nov 1952

I. DESCRIPTION OF INCIDENT

On 8 Nov, approximately 600 miles off the east coast of the United States, between Jacksonville, Florida, and Savannah, Georgia, the pilot and co-pilot of Pan American Airlines Flight 201, enroute to San Juan from New York, sighted three unidentified aerial objects. The objects were on a retrograde heading of approximately 355° to 360° at the same altitude as the airliner.

The first object resembled a landing light but was much whiter and about ten times as large. It was followed by two slightly smaller orange objects with tapering tails which were fringed with blue. These three round objects were equally spaced and between 1/8 and 1/4 mile off the left wing.

II. STATUS OF THE INVESTIGATION

The sources were interrupted and stated that the objects were completely foreign to them. There was no known missile, naval or air activity in the area at that time.

III. CONCLUSIONS

No conclusions.
