<p>On 8 May 1952 at approximately 2200 hours I was walking my guard position around number four gun at "A" Battery. As I looked up in the sky I saw what appeared to be a flare. The light seemed to burst between 100-200 feet approximately one mile north of my position. The light first appeared to be a bluish color until it burst and changed to white and faded. Approximately 20 minutes later I noted another of the same type flash and at the same position, but this one didn't seem to go as high into the air.</p>
