Dear Sirs:

Having read the April 7 issue of "Life" with the article on flying saucers, I thought I would write in my own experience.

That I am going to be different from anything mentioned in "Life" is so if there is a natural explanation I would appreciate your writing to me so that I could see if there is a natural explanation.

My "encounter" was not a full, intense one. I saw it about 10:30 in the evening. I regret to say I can't remember the day. The shape of the object was neither like this It was not an airless light or something like that. It appeared to me like a plane for about a half a minute and then suddenly went up a little and then it disappeared. It made no noise that I could hear, but it was quite far away. I am not subliminally so I can not say anything as to the height or the speed of the object. If this is any use to you I will draw a picture of what I saw.

The object went south west up. The line represents the angle which the object took on its path.

I have felt no ill effects from this. This is an entirely true story.

Sincerely,
