REPORT TO CIVILIAN BAKERS INVESTIGATORS  
by  
William J. Dealer

Subject: Object seen and photographed by Paul Eisenberg (12 years old)  
in the early afternoon of Sunday, May 4, 1952

While playing in his backyard at 223-A Courtland Street, San Francisco, in the early afternoon of Sunday, May 4, Paul Eisenberg (age 12) reported he saw a whitish-orange object, which could have been round but from the angle he saw it it appeared to be oblong, descend rapidly from the sky and stop stationery over the neighbor's house. He is not sure how large it was nor how far away, but he thought it could have been anywhere from 100 to 5000 feet in the air.

With great precision of aim he ran into the house and grabbed his Brownie camera, came out and pointed it in the direction of the object, which he said changed its attitude and started to rise; however, he snapped one exposure.

He told the kids in his classroom about it and took a lot of kidding, and everyone told him nothing would show up on the film when developed. However, he was sure of what he had seen, and when the film was developed an oval object showed on the photograph which is attached to this report. I am sure in talking to Paul Eisenberg that he is truthful and sincere and he believes the object is a secret device of our air force.

We are indebted to Mrs. Margaret Etkes, Paul Eisenberg's teacher, for the information leading to this report.

Submitted,

William J. Dealer
