APPROVED 1 APR 68

AIR INTELLIGENCE INFORMATION REPORT

REPORT NUMBER	DATE	NO.	OF	PAGES
AIRTEL OFFICE, D/T FIAP	11-05-59	6	16	
<p>5. Extracted from Fifth Air Force Mission Summary, 10 May 1952:</p> <p>Unidentified objects: at 101100-L, 2 F-86 pilots observed a bright object traveling on a 90 degree heading at 15,000 feet at 13 30G. Length of observation was 10 seconds. Pilots observed intermittent flashes about 1 mile apart and estimated the speed of the object to be 3000 mph. Intelligence officer at the 51st Fighter-Diversionary Group considers credibility of witnesses to be excellent. D/T Comment: Personnel of Detachment 1, 600th AHS interviewed pilots but no additional information could be obtained. Report being made in accordance with letter FIAP, no 350.07, subject: Reporting Information on Unidentified Flying Objects, dated 5 March 1952.</p> <p>a. Comment - The flashes of light with no definite reference points makes the estimation of speed some questionable. There is no indication as to what might have caused the light. Physiological limitations would greatly lower the credibility of estimation of size, distance and speed. It is believed that there have been a number of sightings similar to this one which have not been officially reported, because of lack of any further information other than the reported flash of light and no definite indication of distance, speed and altitude.</p> <p>(EVALUATION: B-C)</p>
