PANORAMA

22 Northcote
Street .
Kilburn .S.A.

THE MAGAZINE WITH THE WIDE HORIZON.
FOR STUDENTS AND RESEARCH GROUPS OF THE U.F.O. AND CORELATED SUBJECTS.

EDITORIAL.

Dear Readers. This brings to you a new magazine of interest to all who want news of all phases of the subject of the U.F.O. and its many co-related subjects.

This is the second of such and the first was published as a trial and made a Special Edition of the " AUSTRALIAN SAUCER RECORD " which is published by me.

The success of this first venture was so beyond expectations that we are encouraged to make a regular feature of it by making it appear on a regular basis.

However it was found that a little confusion arose in subscribers minds in that it was not the regular quarterly issue of the A.S.R. and as some had already subscribed to that , it is deemed adviseable to make a complete new magazine as a companion to the AUSTRALIAN SAUCER RECORD which will continue to be issued quarterly.

This magazine will be issued as near as possible at least six times a year. in conjunction with the A.S.R. but its coverage will be wider in its scope than the quarterly. in that it will deal with all subjects related to U.F.O. and others of interest to students of the Bible. Meta-physics and E.S.P. etc. leaving the A.S.R. to deal mainly with U.F.O material in general.

The demand for the first Edition proved beyond doubt that it has filled a great need for those who have progressed beyond the primary stage of research , and want more than just sightings and pictures and pages filled with quotes from papers. on the U.F.O. and therefor is admirably fitted for discussion groups of advanced students who want some meaty material to chew over .

The price will be the same as the A.S.R. with special rates for groups . The six copies will then be sold with the quarterly A.S.R. at One pound per year postage paid. or Two and a Half Dollars , Single copies will be 25cents to dollar and a half. However they may be subscribed to separately as desired. If you want to be posted regularly with this magazine send your subscription rightaway as until the response to this is assessed only a limited number will be printed. to avoid expense unnecessary. The Editor will welcome readers comments as it is desired that this magazine shall act as a Forum for students everywhere. and exchange of views and subjects herein will aid each and all.

THANK YOU THE EDITOR.

OUR COVER.

To begin with when we felt it was necessary to have a name of its own to avoid confusion with THE AUSTRALIAN SAUCER RECORD. the choosing of it was a little difficult. The Editor did favour the name of Australian UFORUM. but realised that the restricting to the word Australia did not fully convey the wideness of the scope of the opinions which would be expressed in its pages. and then upon consideration knew that the word UFORUM was used by an organisation with a magazine that name in the USA. as was also the fact that a magazine of that name had been used by a Victorian F.S. Society originally until they amalgamated with others . and lost their magazines identity . Not wishing therefor to trespass on names of others and perhaps thus causing more confusion, he decided that a completely NEW NAME was needed. and thinking along the lines of NEW name he realised that after all a great percentage of the material would deal with the NEW AGE hence it would have to be something which in its title looked forward in its time to that NEW AGE. Many magazines held this name in the New Age Herald. N.A. Expositor. so this meant this too would be OUT.

It was then the picture of the cover flashed into his mind. and he saw a panorama of the New Age in the great horizon of the distance. so the title was given .

The picture describes the NEW YOUTH OF THE NEW AGE . born in the old but on the thresh-hold of the NEW. His upper part of his body is exposed to the new air and sunshine. He sees in the near distance The Rising Sun of the New Age and the City of the Future beginning to take shape . He stand before the sea of Knowledge and Wisdom which he has to cross to onto this New land. His face and heart are filled with a joyous courage, he beckons those behind in the old age to Look and Come , and leave behind the old world which he now stand upon and views the New Horizon .

The whole picture portrays the wideness and greatness of the New age that lies so very near . It is within sight. and requires only that we must have the courage to set forth and cross the sea which only lies between us and this NEW Land of Promise. But we cannot go until we have divested ourselves of the " old clothes " of the old world we must cast aside our " old garments " and be invested with the garments of the NEW AGE that of Witness and Purity and Love.

He calls to us " Come let us Go. "

He has caught the Vision Glorious, and beckons us to Lift up our heads from the sad Earth with its ~~was~~ and woes. and Behold the NEW. His is a challenge that we too must behold the vision . , we must catch the light of it and what it will all mean to us. WE must GO. or remain and be caught in the whirlwind of the world chaos the lays around the old world and the old age.

His call recapture the words of Jesus in relation to this period of time.

" Look up, for your redemption draweth nigh "

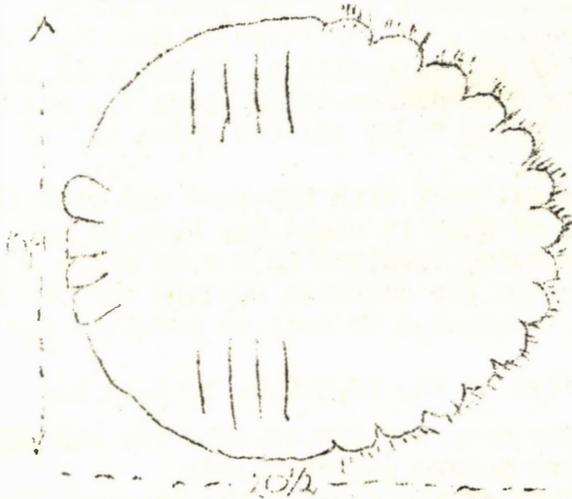

" Behold. Look unto the fields for they are white and ready for the HARVEST "

It is hope that the articles and messages the pages of this magazine will produce , though humbly and meanly done, may help us catch that vision . that we too shall behold the " PANORAMA " and we shall say and act within our hearts,

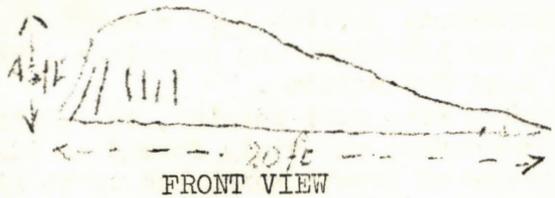

" COME LET US GO. "

"The Monster."

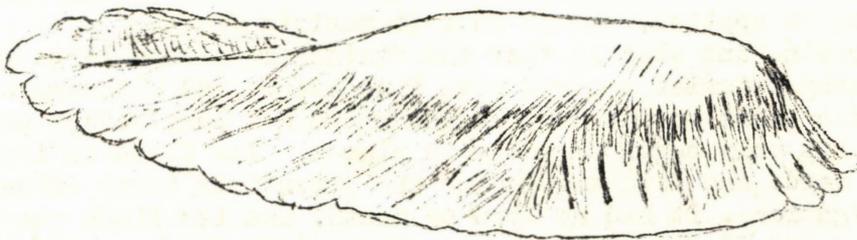

VIEWED FROM ABOVE

PROFILE VIEW

ARTISTS IMPRESSION .

THE ABOVE ARE ALL OF THE LARGEST ONE FOUND ON THE
TASMANIAN COAST .

" THE TASMANIAN MONSTER "
OR WAS IT
" A THING FROM OUTER SPACE " ?.

February 1962 was a month of news indeed for beginning with the much discussed Conjunction of the Planets which reached world wide proportions it ended for Australians at least, in a mystifying unknown form of animal life being brought before the notice of the people, and named the Tasmanian Monster .

Actually this mass of decaying life had been discovered on a beach in a very lonely isolated spot on the Tasmanian coast some two years prior, but despite the attempts of the discoverers , two brothers of Scandinavian origin, to bring it before the notice of the authorities, it had lain there undisturbed, until at last someone decided to do something about it, and then into the limelight and headlines , "The Thing " got the attention of all the best Scientists .

Actually like most people , the Editor sat back with interest and read all the accounts, and dimly formed an idea of what it could be, here is the sequence of events which led up to him being involved in a very minor way with " the monster" . The facts are given for overseas readers and others who may not have the details , and are condensed as much as possible for lack of space.

The creature is brought before the notice of the CS.I.R.O. Dept. of Aust.

Scientists from this Dept. decide to fly down and investigate the strange form of life, accounts of which are very meagre and confused.

The papers by now have published accounts of the find by the brothers two years before with drawings etc. (copies herein).

All the best "brains" from Science are trying to fit it into something known in their textbooks . (It must belong somewhere there you know).

Meanwhile reports get more intriguing than ever, one is that the flesh dissolves when flame is applied. others that it resists flame.

One thing is certain, and that is that the "thing" is a very large mass of some form of fleshy material covered with fine hairs, and although that in that place for two years to date and no one knows how long before it was discovered , it has only begun to decay in places. Its flesh is ivory coloured which was hard. and firm enough for the scientists to cut off and take away for investigation . it had no eyes or mouth. and its flesh was like lobster . it measured 20 ft. by 18 ft and about 4½ ft thick at the biggest portion.

One theory which could have well been the answer was highly discounted by one leading authority, Mr. J.H. Calaby. this was that it was a prehistoric monster which had been imbedded in ice and washed up and melted on the coast. but it must have been a mighty iceberg. to carry this thing so far .Mr Calaby said. " It is more probable that it died in the much more recent past ". Then a little confusion began to set in, for others reported a smaller similar object being seen also some long time prior about 30 to 50 miles away from the object which was now causing world wide comment. Now we have TWO objects each being described like each other. but one smaller. (a baby one perhaps). this new one was about 6 ft. by 3 ft. and seen twelve months prior by two women .

The Monster. 2.

Meanwhile the scientific investigation party have been flown in by helicopter with material and supplies to last some weeks.

It was at this stage that the Editor became involved and things began to make it appear that this " thing " had others thinking it was something else. A reporter from the Adelaide "News". rang the editor, and after preliminary introductions this is somewhat of the conversation which followed. with the reporter asking. ..and the Editor giving the replies.

" I understand you have a large library of science fiction books ?"

" No. I'm afraid you have been misinformed , actually I have only about four such books,most of what I have are Flying Saucer books, dealing with the UFO from outer space. "

" Do you know of a Mr. Harriss , a science fiction writer living in Adelaide we thought he might be a member of your society ? .

" No. I have never heard of him , but there is a society of Science Fiction fans in Adelaide but I don't know their address. but a friend of mine can possibly supply you with it. "

" Actually we want to contact Harriss about a book he wrote called " The thing from outer space" Have you read it or know anything about it. ?. It was published in England. ."

"No .but there was a movie of that name some time ago shown in Adelaide." Do you connect this theory with the Tasmanian Monster ?"

" Well its along those lines and one of our magazines wants to contact him to get permission to write it up. Have you got any material in your files which deals with such. ?.

" Nothing I can remember at the moment but I will look up my files and see".

" Good, let me know if you find anything .I'll ring up that fellow and see if he can put me on to anything about Harriss. " He then hung up.

Then followed a search for any matter dealing with animals from space in my files but I couldn't place a thing until I remembered Trevor James dealt with ethereal amoebas. , may be he had something. so pulling the book out I opened it and right of the page, there was this page 224.

" It is interesting to observe here that the U.S. Air Force has referred nebulously from time to time to " Space Animals " in some reports. thereby arousing the ire of Dr. Menzel, .. ."

The report mentioned U.S.A.F. RELEASE April 27. 1949. read the following passages on page 225. they prove very amusing in the light of the hairy monster .

In the meantime the reporter had contacted my friend , none other than our worthy Jack Ferry . one of my closest associates and helpers. Jack was able to tell him that Harriss had been President of the S.F. Society but had gone to America where he was now. I rang Jack a little later and we discussed the matter and told him what I had found in Jame's book. and he replied in a phrase so often used by him " That's interesting "

" The Monster"3.

Then came the bombshell news item. "SECRECY ON MONSTER" Hobart March 16
The mystery of the Tasmanian Monster is solved. - but scientists who were
flown back to civilization by helicopter today have been sworn to secrecy
until Monday.

A statement is to be released then by the Minister in charge OF the CSIRO
(Senator Gorton)

This was indeed astounding as if it was of some known quantity and easily
explainable. Why the secrecy . and further why the sudden rush back to
civilization ? The party had intended spending some two weeks there , at
least the went prepared for such a stay . but instead within two days they
found something so important that they were sworn to secrecy and hurried b
back to make their report. without any statement being made. now if it was
what they claimed it to be later. this hardly fits into a logical pattern.

Meanwhile headlines all over the place scream our coupled with scientific
statements from world authorities that it could be no known creature.

Then comes the announcemnt from Canberra."IT IS A PIECE OF BLUBBER "
Yes my dear official. BLUBBER?BUT WHAT OF?. Surely we deserve a more en-
lightening statement than that after you have sworn the investigators to
secrecy. having done that. we deserve a much fuller detailed report. but
then we the suffering public know only to well we are only allowed to know
so much , so it is quite normal to have conjecture ourselves the answers.
so Mr Official you cant blame us if we DO find some silly crackpot answers
however we have the satisfaction of knowing that these crackpots have come
up with some very good answers and not a few which have proved more than c
correct . actually your statement makes us"blubber"for more.

This appeared to be all for then came official silence except that a very
breif announcement over T.V. said that another monster had been found in
Western Australia, then silence . well now we have three pieces of hairy
blubber. and still no statement as to what sort of animal this hairy mass
belonged to or from whence it came.

The West Aust. " blubber" was 8ft. by 4 ft. without signs of rotting
with coarse brown hair 7 inches long. it had a neck about 3 ft long nd
the head seemed to have been eaten off by some wild animal .like its com-
panion in Tasmania it had a hump also, this was about 4 ft. high . but this
had a rounded off tail. The discoverers were convinced it was NOT whale bl
blubber nor sea lion . The neck and whitened skull was found nearby and
it was cross shaped. it was sent to the W.A. Museum. for study.

Then another research worker sends a report of an experience with the paper
cuttings from West Aust . none other than our very able and helpful MrsB.
Perkins. she said that whilst she was studying the reports of the Tasmanian
" monster" she felt a voice telling her that % There will be nore of these
found in the near future. "

The voice she said seemed to come from behind her. she felt a strong urge
to write to the papers. which she obeyed. Rememeber this was before the
second one was mentioned in Tsmania or the third one was found in her own
state. Her own opinion was that it was soemthing washed up from a deep
freezæ state and thus some prehistoric monster .

The Monster 4

She adds that it seems strange that all of these carcasses have been on very lonely beaches for over long periods.

The ice bound theory seemed to me to be the best and I did agree with her as if the ice had been a huge berg. and it must have been to hold the largest of these pieces of "blubber" then it would account for the long time it took to melt and finally leave the mass open to the air. but here we strike a snag. once the air hit this frozen mass in all weathers surely it would have began to decay. quicker. and hence despite the long period before they aroused sufficient interest to be officialt investigated they had remained ina pretty reasonable state sufficient to be investigated and as shown on the T.V. screen quite solid enough to be rolled over as a mass. and certainly not putrifying decomposition.

Then came the confusion method. Statements came through about the Tasmanian object but this time they were referring to the second smaller object found. and not the larger. to those who had not followed up the details closely this made it appear that the whole thing had been grossly exaggerated as to its size.

Then I get a visit from an interstate colleague who tells me that news had been given him, that in between the two objects on the lonely coast of Tas. there had been found. a large rock with carvings on it. and that some of the scientists had stayed behind to examine it. Then report he had was that the carvings or markings. were not believed to be of great age BUT QUITE MODERN, when he tried to get some details and further information he met with a wall of silence and thatofficials seemed to be scared to even open their mouths lest they say too much. My informant is a government man but very reliable.

Well there you have it all unless other pieces of "Blubber" turn up with hair on them. and which do not decay as usually known.

What do I think it is?. Well Here are the three or four ideas given.

1. It is a piece of blubber. of some unknown Unidentified EARTH OBJECT
2. It is a prehistoric. monster which had been deep frozen, but the official deny that and theyare always right. (MAYBE)
3. It is. Something from outer Space. but WHAT?. And if so from WHERE?.
4. It is a mutated form of a sea animal. unknown caused by radio active waste cast into the sea by the USA. and heavens knows how much has been dumped and its effects on sea life.

This last is considered bya panel of workers here in Adelaide to be the most likely answer. but we cannot explain why no mention was ever made of radio activity being associated with it. hence this seems to be OUT. but if so we are back where we came from. and begin asking ourselves questions along the other three possible explanations. One or teo have said why did the papers get the idea it was from outer space and from where. ? knwoing the papers your guess is as good as mine but they do get their money out of any matter that they can SELL the public on.

I cannot give any answers but hazard the above guesses. may be you can give us some ideas reader. LETS HAVE THEM WE ARE MIGHTY INTERESTED.

ECHOES OF THE MONTE BELLO BLAST.

**** ** ** *****

The month of March has proved a very interesting one for the Editor in the number of calls and visits made to him by interstate and overseas folk many of whom are correspondents and observers from their particular quarter . The great encouragement given by them has indeed given him great heart to go on in the work. their promise of allegiance mid such disturbing days of the failure of so many so called friends. is indeed heart cheering.

Among those who called was an interstate man . who spent a considerable time at the home of the Editor. and the above subject came up and he related a most interesting story about it.

He said he was informed by a very reliable person, that the Monte Bello H. bomb blast was indeed very disturbing to the authorities. for they had struck something which gave them quite a scare. in that when the blast went off, a whole island was disintegrated. but what was worse, that the blast had penetrated the under crust of the Earth. and a hole had been caused which spewed up molten Magma. and that the whole area had been so weakened that it was touch and go if the hole did not spread and cause great devastation . fortunately the hole filled itself in, in the nick of time, but that lava and other molten matter was still being washed up on the shores of land miles away at times. from this blast.

So great was the concern. that it has been declared unsafe to let any bombs off. within a 1000 mile radius of this site. for it is said that should another blast be made in such a weak area it could blow the Earth to peices with the reaction of it.

This is as it was related to me. and in view of known facts such a story is certainly not impossible. and causes one to wonder when will man come to his senses, and when will Science stop being so high minded and raving mad as to think that their pursuit of knowledge is greater than the Cause of Humanity . Whether the facts related are true or not. it does indicate the terrible state to which the world of Science has let itself drift into and the insane lengths to which they will go, one sometimes is told that there is no such thing as Devil.possession . but when one considers the atrocities of the last two Wars and the increasing power given to men whose sole aim is to invent or discover worse hellish means of destruction, then Devil or no Devil. evil possession cannot be denied for never could one call such inspiration as coming from God.

The Bible well puts it " Mens hearts failing them for fear of those things which are coming on the earth!" Thank God there is also the positive side of the picture when we are promised DELIVERANCE from such. and are told " When ye see these things come to pass. lift up your heads , for your Redemption draweth nigh."

One hears the above quoted a great deal these days. but the point which is so often overlooked by those who agree with such. is that the same Deliverance promised and Redemption is conditional. it would well behove us all to find out those conditions and PREPARE accordingly .

::::::::::::::::::

Dear Editor,

Thank you for your very interesting special edition . our group found it very helpful for our discussion evening. In discussing the Article re " The Footprints " by your correspondent it was suggested that the possible " missing Planet " he could not ~~name~~ might be found in the Asteroid belt. which is considered to have been a Planet which destroyed itself. Called by some Lucifer and other Maldek.

As no one will be able to fully know whether this was so or not. this can only be a suggestion as a solution although your writer seems to have in the back of his mind something of the reverse for he refers to it as possibly the Name of God or one named after the Almighty . However in discussing this we felt that this would be narrowing the greatness of the Creator down to our own tiny little system and consider that any such would be something far more Universal than a tiny speck in one of the smaller systems. however even if this were so. has not the Sun its self always been considered as the symbol of God. hence there would be a duplication . this brought us to the feeling that our first suggestion would be more correct and that because Lucifer was destroyed hence the name of his Planet also was erased from the memory of men until these latter days when all is being revealed so that all men may know God's plan. We hope you will publish these thoughts as many others may have some consideration regarding this "missing planet " of the twelve.

We hope that you continue publishing these special student articles we find them so refreshing and certainly fill a need as well as they are not so expensive as books. which many are not able to buy . whilst a group can each have their own copy for study when sold at the price of the magazine.

G.B. A.C.T.

From a Local Reader .we recieved a copy of " Destiny " Magazine in which the matter of the " watches " of the Roma Armies. were shown to be distinct from the Hebrew . hence in reading the Bible it must be clear whetner the reference is to that of the Roma Days or of Hebrew timing.

This is in regard to the article " Are We nearer the New Age than we think? Destiny Magazine (Feb. 1962) points out that whereas the Romans divided the night into FOUR wathhes, the Hebrew division was of ~~FOUR~~ hours each three in all. ranging from the first watch 6 p.m. to 10.p.m. The next was called the Middle watch which was from 10.p.m. to 2.a.m. and the final or Morning Watch was from 2.a.m. to. 6. a.m.

The Hebrew refernces of watches is found in Ex. 14: 24- 25. but the reference your writer uses was that of the Roman when Jesus was making reference to the thief which would come to the householder.

** *** *****

From a New Reader N.S.W.

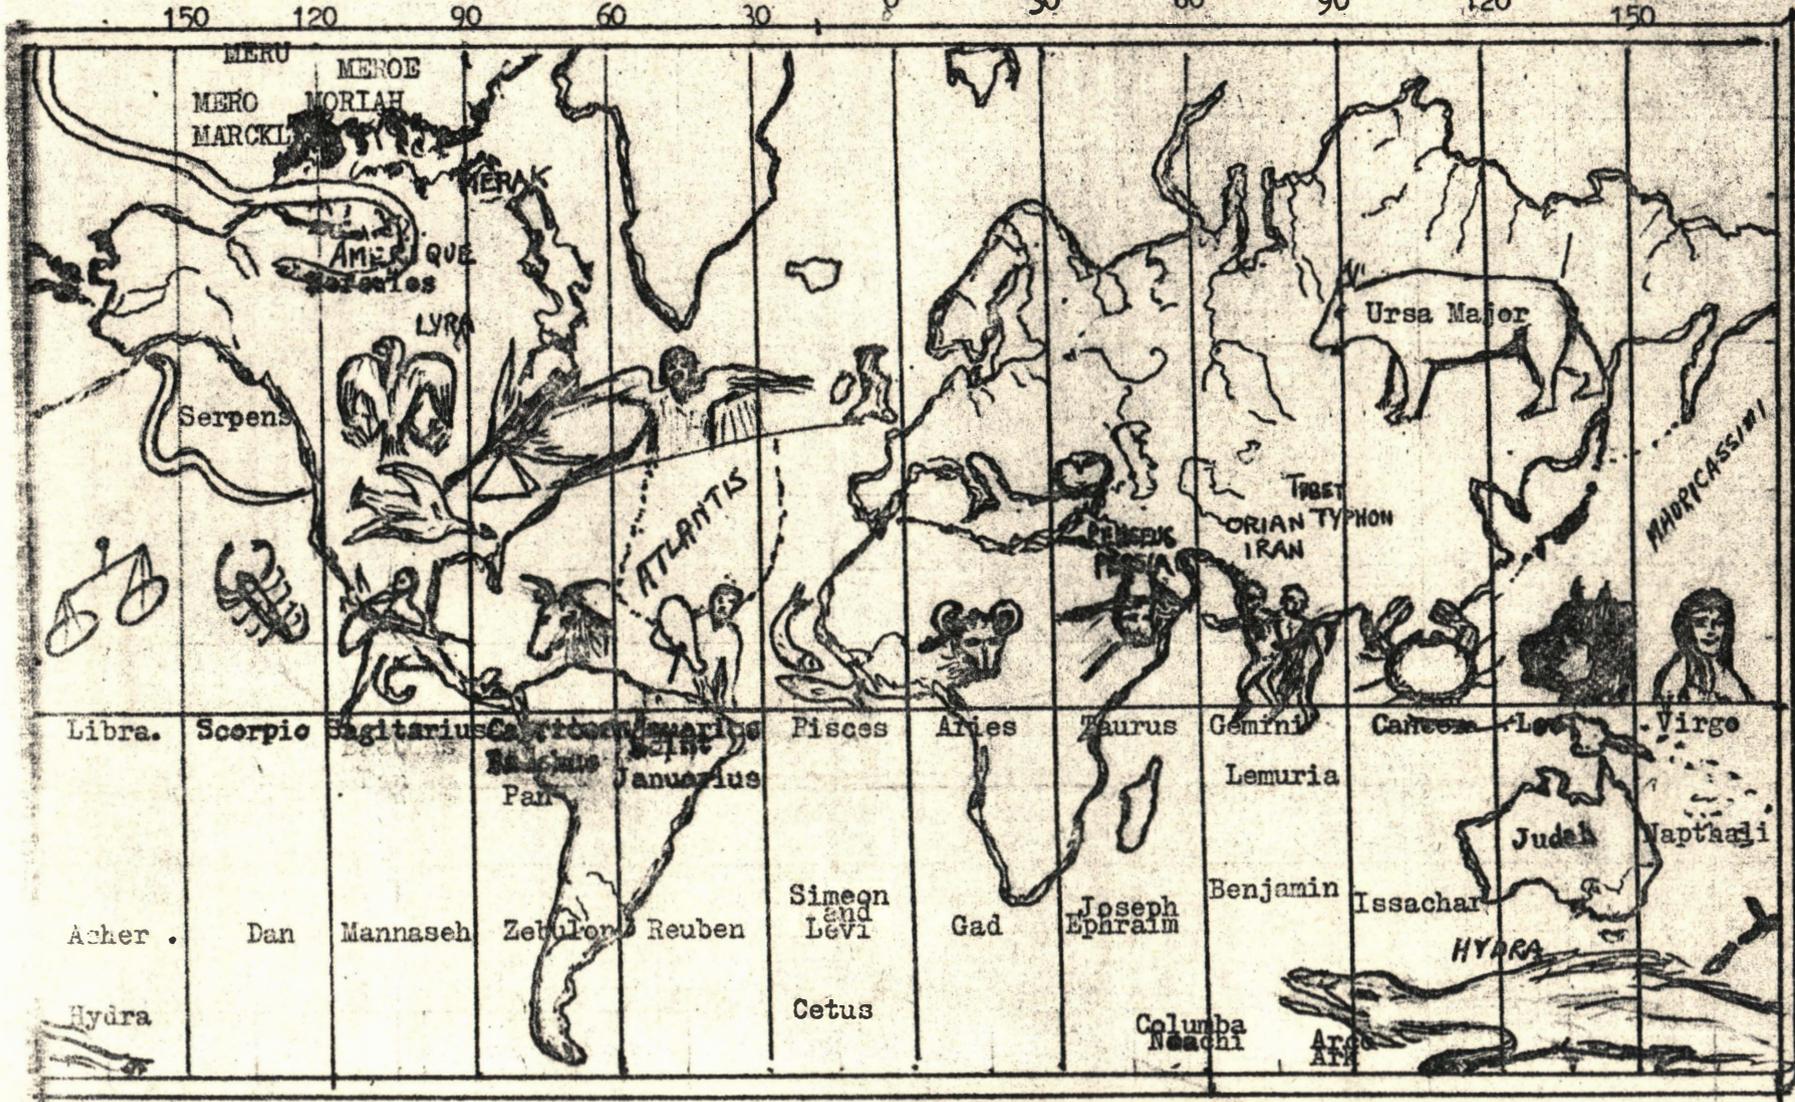

" A friend passed a copy of your Special Edition to me , my friends and I were wo interested. and found it really thought provoking. please find enclosed twelve months subs for more."

An Adelaide business couple., "Thank you for your Special Edition if you print more pelase send us copies. "

Another Adelaide couple and family. " We so appreciated your Special Magazine . we want to be put on the regular mailing list ."

ROSIKRUCIAN MAP OF THE WORLD 1300 B.C.

The Map shown, represents the countries of the World with the signs, symbols and planetary characters allotted to them by this order in Egypt many centuries before Christ. The map is made from drawings found on the walls in Rosicrucian Temples and the Pyramid of Cheops in Egypt. See outline of features next page.

Australia and Ancient Lemuria

During the Conference held in Perth . West Aust.. a friend passed on to me some very interesting matter concerning the relationship of Australia with the lost continent of Lemuria. mainly in relation to Western Australia. This with other data I had on hand I felt would form a most interesting study for students who associate these subjects with their UFO research.

Western Australia was settled in and opened up by the English people in 1829 on Aug. 12th. when Capt. Stirling arrived in the new land. . where they planted the standard at a spot near to where the City of Perth now stands.

The newcomers noticed on the river numerous black swans and the river which they had rowed up from the sea became named the Swan . and naturally also became the National emblem of that State.

It is most interesting to note that the very black swan not known in any other part of the world , is a very ancient symbol and known to many Orders of Mysticism . etc. as is also the Pelican which abound in this very place on the river Swan too.

Madame Blavatsky refers to it in her writings and claims that they are two of the oldest symbols known. It is not therefor surprising to find that she also claims that (Vol. 11. p. 528) that " The cataclysm which destroyed the huge continent of Lemuria , of which Australia is the largest relic" and later " The Australian Aborigines, are direct decendants of the old Lemurians , and originated from Madagascar . "

If this were so and it certainly seems to be. for geologically the Australian continent is known to be the Oldest then surely among the many places of this very old site of Lemuria the would be Temples to be found. One at least many claim to be such and has been visited by many Rosicrucians UFO students and others deeply interested in research .in fact it has been called by many The Temple of Lemuria.

When visiting Perth some years prior to this visit. I was given the opportunity and great privilege to visit this very spot. it is in the close hills area of Perth and is completely granite allround. this spot. in fact for a while the Government had let some Italians quarry here but for some strange reason the work was suddenly stopped and the place was taken over by the government and later sold. to the nearby owner . who had the very piece of property upon which the claimed Temple stood.

Actually there is no Temple there but the owners late wife claimed that strange emanations and vibrations came from a huge granite boulder which later upon which a little Sanctuary was built to her memory when she died.

Visiting this Rock I found also that it DID have strange and very strong vibrations. and it is said that this lady said that underneath this rock an ancient Temple of Lemuria existed.

Another most unusual thing about this Rock was that at certain times photographs are very hard to take. of it. and although I never saw such I was told

Lemuria 2.

that people had tried to take photos , and found when they were developed that pictures of Aborigines were in the picture sitting near the Rock. I regret I cannot confirm this but my informant was a very reliable person and one who certainly was not joking at the time.

How this property came into the possession of this lady and her husband is a very interesting story. but too long to relate here. but it is interesting to note that the Doctor who bought it is one versed in Metaphysical knowledge . and he claimed that he could feel the emanations, and also confirmed that these emanations were coming from an Ancient Lemurian Temple which lies underneath .

It is possible that the Temple could have been one of Initiation, and here Scott Elliot comes to our aid in his book " Atlantis and Lemuria" p/ 43. "It is this circumstance which furnishes reason for the remarkable fact that may in conclusion be stated- that there existed in Lemuria A temple of Initiation.

Madame Blavatsky says in regard to the Aborigines " It is said that some of the Australian tribes , are the last remnants of the Third race (or Lemurians) and again " Behold: writes a Master. the relics of that once great nation (Lemuria) in some of the flat headed Aborigines of your Australia"

œrvè says of Lemuria. " About 50.000 years ago , the western end of Lemuria again began to sink, leaving the continent of Australia floating free and it was about this time that part of the Americas now est of the Rocky Mountains , began to leave its close proximity to the now western seaboard. of Europe and Africa. "

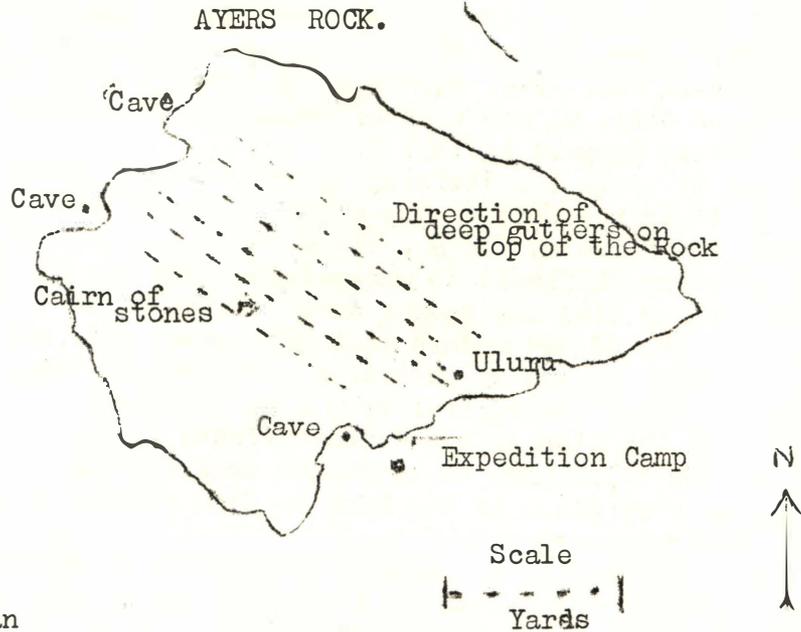

25.000 years B.C. the Aborigines of Australia were separated from their Motherland , and yet when Capt. Stirling landed in 1829 A.D. the Swan River natives of Western Australia were using the same word of salutation ABBA. as the Master Jesus used in the Garden of Gethsemane, when He said "Abba Father , all things are possible unto Thee "

This and many other words exist among the various tribes of the natives in many parts of Australia. and strangely many of them have Hebrew basic points. in them as the above. Place names and articles in many cases can be found to be well understood by those versed in this and other ancient languages. and it is well known that many of these ceremonies have a great similarity and likeness to the Masonic Ritualism .

Stone Carvings abound all over Australia and there are numerous examples of them in which symbolisms of various orders can be found.. quite a number of such rock carvings are claimed by the natives to be done not by human hands , and they are greatly feared by them and held as most sacred.

Ayers Rock Central Australia.

Here again we find strange Rock Carvings and a monolith thought to be one of the highest on the earth. For those not conversant with this I will repeat a little information about it which was given in a recent edition of the Australian Saucer Record.

It is approx. two miles across the major diameters
 It is Terra cotta red. The natives claim that a gigantic many coloured
 (wonambi) mythical snake lives beneath the surface. of the waters of the la
 large water hole on top of the rock known as Uluru at the East end of it.
 (See map).

The scored deep gutters. lie sth. e. / Nth. e. and said by the natives
 to be the tracks of the great carpet snakes of " Creation Time " Some
 white people claim they are gutters cause by differential rain falls
 weathering of the vertical rock strata. this the Editor finds very hard to
 accept as who has ever heard of rain corrosion causing completely straight
 lines allrunning in the same direction. note their are 6 of these lines
 and none vary in the direction of line. whilst not attempting to offer any
 explanation it appears that the above thesis is most definitely not tenable.
 Some of them are ten to twenty feet deep with sides so vertical that it is
 most difficult to find a place to be able to cross them .

The caves surrounding the Rock abound with rock carvings , and repeatedly as
 in other places of Australia there appears the drawings of men with large
 feather like halos around their heads. they are called their Fig Tree ane
 cestors by the natives . This head dress over the carving is a wide circle
 with radiating lines projecting from the upper edge of the head they say
 it is the head dress(nuiti) worn by the Fig-Tree men in Creation Time.
 many of these have no mouth , some even no nose, and they seems to consider
 the white man very ignorant and foolish not to understand this lack of these
 facial features, when asked about them .

A remarkable thing about the Rock among its many innumerable mysteries
 is the fact that it has come to be called the " Rock of Ages " The Editor
 has tried to find out how this originated but todate no one has been able
 to explain this strange relationship of name to this mysterious Rock
 However he does feel that it is not an aboriginal one but one which has
 been given by the white man since its early discovery .

To our overseas readers who would care to have more data on this remarkable Rock. there are numerous books dealing with it and the aboriginal legends etc. which the Editor will be happy to recommend to such if they write him. In the accompanying map. of an ancient vintage . and first published in the American Rosicrucian Feb. 1916. the enclosed of which is a rough copy showing the main features only. we see that according to this Order's claims it was found in the Cheops Pyramid in 1300 B.C.

A noted feature of it is the division of the latitudes shows the twelve tribes of Israel and their relation to the signs of the Zodiac, under which Australia is given the Tribe of Judah . The Lion tribe. The Royal House tribe. why this is so seems difficult to understand but we do not question the sages of old. rather time has taught us to bow to their wisdom . even when it crosses upon some of our modern text books. but this map shows that the same Rock is in the centre of Australia., geographically a little South of the perfect centre. but central from East to West .

Jesus is known as the Lion of the Tribe of Judah . and at other times as the " Rock of Ages " . A pure co-incidence true but strange nevertheless. yet here in this very place of the Rock we find natives using the very word Abba he used so many years ago,

Blavatsky says Australia is the centre of Lemuria and here we find this huge monolith in the centre of the place designated on the map as the Lion of Judah. and held most sacred and as a meeting and place of worship and initiation of the tribes for over 25,000 years. a place which even today they associate with the Creation Time. and the strange adorned headwear of the sacred men who came to them of old. men with radiating halo formations around their heads.

We feel that when we of the white race can win the confidence of these wonderful natives who know so many things we know and others we have long forgotten. THEN when we are humble enough to learn of them we may find the many answers to some of the mysteries of past time " Creation Time " which have puzzled us for so long.

Already some of us have seen their many capable methods of Telepathy. and Scionics. practically demonstrated. and others which are sacred to them and which in trust has been given and held as such . as one holds vows of their initiation etc as sacred. from these men of the old time. these remnants of Lost Lemuria. who can tell will come the lessons for which we so diligently seek today to join the past with the present.

Some notes re the Map.

Note... The Eagle allotted to North America with the Pyramid and other symbols which were adopted so many years later at Washington . D.C.

Ursa Major directly over Russia.

Note the Antarctic features . Hydra the Serpent-Dragon. . Near to which is Columba Noachi. (Noah) and his Arco (Ark) a great surprise to many to find it located here.

In our previous special issue one of our readers claimed that the Devil (The Dragon) was chained into the bowels of the Earth at the Antarctic. this map coming into our hand so soon after seems to be no mere coincidence.

For it seems from out the past there is confirmation that they at least placed him there.

" That February Conjunction "

Well Now that its past and gone. some people have had to hide their heads, others have had the good sense to laugh at themselves. and yet others to use the old phrase " I told you so ".

But was it all hoax, or stupid fears?. Where the so called crackpots all wrong . ?. One thing is certain this could never be truly answered unless one is able to lookk at it as an overall picture. to endeavour to assess it from a near view would only give one a very distorted comprehension of what the whole picture really is.

Looking at it from a world point of view . we certainly did not have some of the great celestial disturbances which some predicted and feared. Yet it cannot be denied t at we did have some bad weather in some countries to cite England alone as one. And in certain parts of the U.S.A. also freak weather conditions. prevailed.

The difficulty in trying to get the complete pic ure is very great indeed for the trouble is that we only hear and see things from our own local standpoint. and hardly ever do we get a full review of what goes on all round the world. as much is only recorded in the place where it occurs and though some countries will carry the news by the time it gets across the seas it is often condensed down so much t at it appears to be of little consequence.

Then again . there is that great human fault of trying to make it all fit into some specified time when perhaps the overall true effect will never be correctly understood until it is lock on as a phase ora series of events Actually although the greatest conjunctions did occur in the early part of February actual there was a series of them which existed right through to the end of March . Let us hear what one of the greatest men on this subject says and we quote Professor Aldo Lavagnini.

" In the first days of Feb. 1962. there will take place, from our viewpoint on Earth, a rather unusual configuration accompanying an eclipse: no less the seven planets , including the two Lights - the seven familiar planets known to the ancients , which gave their names to the days of the week- wi within sixteen degrees of the tropical sign of Aquarius, with the stellar background of Capricorn ".

According to Whitaker's Almanac the following conjunctions take place in Feb. 1962.

5th. Feb.	Mercury in Conjunction with the Sun
6th. "	Mars in conjunction with Saturn .
8th Feb.	Jupiter in Conjunction with the Sun
12th "	Mercury in conjunction with Mars.

According to the Astronomical Authority. from 7th. of Jan. 1962 to 27th Jan. 1962 no less than seven conjunctions were due to take place countries and between 3rd March. 1962 to 31st of March 1962 there should be eight conjunctions in that month. prevailed.

It was evident that many planetary conjunctions were due in 1962 in the early part of the year. though these authorities place no relationship to them and their influence to or upon the affairs of Mankind.

That all these authorities place any faith in such or not. it cannot be denied that for centuries men have coupled great events of their time with the great planetary movements which occurred simultaneously with those events.

We are indebted to our old friend . Pastor Reg. Bradbury again for the above information and that to follow. and again we recommend his Leaflets " Kingdom Voice " to any serious students. Price 10/- per year . Monmark House London. E.C. 1 Eng. He quotes further from a booklet written 32 years ago. " A Peculiar People " by H.E. Proctor.

Dealing with the Messiah. ... B.C. 7 There were three conjunctions of Jupiter and Saturn in the sign of Pisces. namely in May. Oct and Dec. of that year and in B.C. 6 in the Spring Mars was in conjunction with Jupiter and Saturn in the same sign of Pisces.

The Jewish writer Agrabanel records that the conjunction of Jupiter and Saturn indicates great events. also that the constellation of the Isrealites is that of Pisces. He also records that a sign of the Coming Messiah is the Conjunction of Jupiter and Saturn . in the same constellation .

Kepler discovered that Jupiter and Saturn were in conjunction three times in Pisces during the year A.U.C. 747 and that the planets Jupiter, Saturn and Mars were in conjunction in the sign of Pisces in the spring of A.U.C. 748. and possibly these were those that drew the attention of the Magi.

Dr. Adam Rutherford. says that A.U.C. 747. was the year B.C. 7 and A.U.C. 748 B.C. 6. He and quite a few others who have studied chronology have found that Christ's birth was much before the time we are led to believe it was. and therefore these signs in the sky were the HERALDS OF HIS COMING and BIRTH. but note. they appeared before He came. hence is it not possible that the February signs are HERALDS also of an event yet to come and not necessarily on the day of the conjunction?.

We hasten with Pastor Bradbury to say we do not claim Christ will come in any Year , but feel it is for us to Watch and Look up. for the event draweth nigh.

Jesus came to Earth at the Dawn of the Piscean Age. and now we are at the end of it and entering into the next or the Aquarian Age. in fact many believe we have begun entering now into the fringe of it. Surely these same signs and conjunctions may have a deeper meaning. and time will show just how much the folk who have drawn out attention to it should be scoffed at and ridiculed.

In the Aquarian Gospel Chap. 5. we are told that "the Wise men could read the language of the stars "and longed to see the Master of the Coming Age. Many are the hearts who also read the message of the stars today and long for His Coming again to take His place as King of Kings.

The sign of Aquarius is that of the Water Bearer, and quoting further . Bro. Bradbury quotes from another writer of 16 years ago. dealing with the Aquarian Age. Basil Stewart .

" Our Lords first coming thus coincided with the commencement of a new Era that of the Fishes (Pisces) Was it coincidence that he chose his disciples from among fishermen. that he told them they would be fishers of men. and that the secret sign amongst the early Christians was that of a fish .

His Second Coming will usher in the Aquarian Age.

Christ foretold this in the words he addressed to Peter, the fisherman, and John. when he sent them to meet the man of the coming sign, Aquarius.

"Behold.. There shall meet you a man bearing a pitcher of water ...and he will show you a large upper room furnished; there make ready."

According to the Aquarian Gospel this man was Nicodemus Chap 100 v 6

When therefore our Lord would enter Jerusalem to celebrate the Last Supper with his disciples. He sent before Him the fisherman, Peter. to meet the man of the future coming Era. "

Thus Peter the fisherman personified the Piscean Age and Nicodemus the Aquarian Age, in which the Kingdom of God would be governed by Jesus, with judgment and with Justice.

The esoteric student of Holy Writ will see the above. that the Luke story of Peter the Fisherman being sent to find the man bearing a pitcher of water was our Lord's way of indicating that even as His first advent took place in the early years of the Piscean Age, even so His second advent will take place during the Aquarian Age of the Water Bearer.

He is the Water Bearer of the Aquarian Age who pours out living water to succour the living fish.

"And then the man who bears the pitcher of water will walk forth across an arc of the heaven: the Sign and Signet of the Son of Man will stand forth in the eastern sky. (Aquarian Gospel CH. 157).

To the Editor these last words are profound with meaning, and when considered may contain more than what on the surface they read.

He suggests that some thought be given to the phrases. "will walk across an arc of heaven." Does this infer a movement of the axis which will cause the sign of Aquarius to move across. (walk) one of the arcs of the heavens? Many folk have firm belief that there will be a shift of axis or even a moving out of our orbit. Is this a hint of that?

And again. The Sign, and the Signet. TWO constellations depicting Christ most of us have always considered the Southern Cross as the Christ. sign although it is not the only " crux " sign in the sky although the largest possibly. yet what is the Signet? both in the EASTERN SKY.

to those who believe that the Southern Cross is the sign. this would mean that the Sign would have to shift to the East from the South. again hinting at a shift. and further this means an arc of a quarter of the sky. rather a large tilt. but not so large an arc if the orbit is affected.

I am sure more minds giving thought to this may discover some light on this. and the Editor would greatly appreciate any thoughts even if to correct a false premise. However what is the Signet of the Christ?

A Signet usually is taken to be a signature. or sign of identification.

and here we see it clearly stated to be accompanying the Sign of the Son of man. On the other hand if the Sign of Aquarius is to be interpreted to represent the Sign of the Son of Man then this would mean it would be in the East at this vital period. but note that a distinction is drawn

18.

most clearly in that it refers to the sign of Aquarius as walking forth across the heavens , and the Sign and the Signet . are referred to as distinct from the Water Bearer. The Editor feels that these two signs are not to be confused with this sign of the Zodiac. but complimentary to it. There is a well known quotation which many are conversant with too that may have a bearing on this same subject of the Aquarian Age. it is " An ear of corn near a fall of water. " this is undoubtedly very clear that the ear of corn represents the Harvest. and it is near a fall of water Does this not infer that the Harvest is to take place at the beginning of the water poured forth by the man with the pitcher. (the fall of water) Surely there is more than meets the eye in many of our lost teachings from the sages of the past . May He who has planned these signs in the sky give us understanding to know and interpret the signs of the times aright.

A very interesting fact came to my notice just after typing the above in that The reign of Popes is supposed to end with the present one Pope John this I have heard from many sources. and it is supposed to be legendary, in musing on this thought I suddenly had a striking thought. The Popes all reign during the Piscean Age. and end with it. but what was more striking was that the first Pope claimed by the Church. was Peter A FISHERMAN , and the last predicted to reign according to the legend. was also a FISHERMAN From Peter to John , and another thought less tangible but having a coincidental interest was that the two who went to greet the man bearing a water pitcher at the command of Jesus was PETER and JOHN. Just fanciful thoughts but to me very intriguing .
