THE CHANGING SCENE. OF UFO.

Thirty years ago, if one had the colossal courage to speak of "flying saucers" he was considered a complete odd ball of first rating. and to dare to say that they really existed and came from outer space. , well this was almost enough to classify him for the "nut house" .

Even ten years later when the public had begun to hear of so many reports and the effect of Geo. Adamski's books had started an impact of interest and speculation as to such a possibility. Those who did follow such a belief that they were such a minority , hence no one really took much notice seriously of them. Then came right on top of this the announcements of some of the world's leading scientists such as Oberth. Tombaugh, etc who claimed their belief in them and of their extraterrestrial source. So it soon became the fashion to be a believer and attend meetings.

By this time however the subject had spread to a widening circle of theories. from the serious scientific men. to the pseudo scientific who bragged loudly of being " objective" but in practice were far from it. Much of their impulse due to a desire to and appear " scientific" and so remain in the upper intelligencia of the social strata. and of course they must NEVER allow themselves to be mixed with the other types which had sprung up and were claiming some wild theories.

These " other groups" too were widely divided. from the straight out spiritualists who amazingly had now switched from having Indian guides to " Outer Space" men. although there were those of this order who were genuine the " show pony" variety had to keep up with public demand, hence the switch .

Yet still on thos unusual side to which the " scientific " ? side remained aloof were those who strongly avoiding the actual mediumship and trance state of contact. claimed , and did have exceptional types of telepathic experiences which had a distinct contra to the spiritists. in that they reception was not of being controlled but contact.

The amazing and continual results of these folk and the messages and instructions recieved by them whilst in their full senses and witnessed by many. was so indisputable that it was completely impossible for them to have the precognition of the events relayed to them or the knowledge in some cases which was often beyond their own rating of education .

Amid all this were those who claimed to have been contacted physically . by space people from many places. some of which we had never heard of before.

Undoubtedly quite a few of these took a lot of swallowing. and remain still in the files as doubtful . yet there were those which defied investigation especially from those who set out to destroy their story. and even though such big groups such as N.I.C.A.P. refused to touch such or even give them consideration. they still remain today some of the stories as acceptable to a thinking person. (Possible one of the reasons why NICAP eventually failed and folded up as predicted by some. Many have had doubts about the real purpose of NICAP but that is another story .)

Up to about 15 years ago , most of the evidence with a few exceptions. here and there. led most to think that these folk from other realms were at least on a peaceful mission. But gradually from then on the increasing number of hostile actions. or. hard to explain as peaceful in our terms. have been presented to us from all parts of the globe. Some very alarming. some which often it was hard to actually pin down to being caused by an actual saucer. but simply because it was associated with events which surrounded the appearance of one the saucer got the blame.

So many. with so many different types of action and appearance. ranging from actual endangering aircraft and passenger planes. to the extreme of a horse " Snippy" being carved up . and Mothman down the Virginia way of the USA. (See this issue for Review of Gray Barkers Book "The Silver Bridge".

Today we find ourselves seemingly sorted out into various schools of opinion as to What. How and Why of the saucers ?

There still remains of course the hard core believers of the men from space kindly benevolent. and on a peaceful mission. mostly associated with religious or New Age groups. Some excellent Ufologists. others. blindly lead .

The next is the believers who simply think they are here on an exploratory mission. the hostile or benevolent is not well defined by these folk.

Then of course we have the very extreme group who believe they are from the inner earth etc etc. this goes into many wild ideas yet not without some facts which need some thinking over. maybe some facts which fit into others.

To the last class should be added the believers who consider there are TWO classes at work. (Gec Hunt Williamson referred to such in his "Other Tongues" some considering that the inner earth and the extra terrestrial are the two types at work. maybe they could be right .

Then of course there are those who consider the saucers to be completely earth made and a swing over from World War 2 experiments. see this issue.

Whatever class one may belong to. it can be most truthfully stated or should be , that so far No one had been able to prove beyond doubt their case. for whatever school of thought you follow there are so many of the jig saw pieces still missing, and some which we have which will not fit into the case try as we may. for they seem to contradict one set of ideas and support others.

Behind all this theorising the governments of the world still remain aloof from openly stating the true facts. for no matter how many Condon reports are made. etc etc. again and again it has proved that for some reason the powers that be desire to cover it up. Maybe for good reasons maybe not. One thing is certain the economically and for world finance it is more suitable that the true answer is not arrived. I am convinced that the world Powers DO KNOW. but are not allowed to talk. because of the powers behind which are afraid of their vested interests and above all the upsetting of their own plans for world control.

Editorial (3)

Looking over the whole scene in retrospect. What have we ??

A vast change of ideas over the last 30 from that considered in the beginning. This is not without reason and logic. it is only natural that as we dug deeper we found things which we never heard of before. but the amazing part is that most of the change of thought has occurred by events which the saucers theme selves brought about in their varied actions some so differing from others.

In my opinion, the worst type of student or worker in Ufology is the man or group who call themselves scientific and utterly refuse to dig into facets which may not agree with their present line of thought or simply because science has not confirmed it. (to date). I still state. that dig deep and you will find the cause is a fear of public opinion. social climbing. or someone out to get the best position. In this game no facet can be overlooked. no matter how scawy you may not agree with it. but it cannot be ignored simply because You do not consider it so . Since when has any one of us the brains to say we KNOW ALL. especially in things concerning outer space. when even our own scientists have had to re write their text books a few times in the advance of knowledge; and are STILL rewriting it. as the discoveries come in faster than they can publish their last thesis. some books being studieid are now out of date. within a few years. So if you are one of the Mr Knowalls. and reject to study or ban some facets in your group and call it taboo. Just take another look at yourself for if you are not careful YOU will be soon left far behind as one of the has beens. If you want popularity their are some far better things than UFO.

The scene changes. but human nature remains the same. hence our divisions. but I am inclined to think that the near future holds in store a very strict sorting out of peoples and groups. so much so that it is possible that many of the deeper thinking types may retire for a less public study. in smaller groups and whilst the larger groups who will go on studying sightings and getting the thrills out of the startling exceptional ones. The real gems will be found by those who will not be heard so much of in public abd possibly their findins may not reach the press or radio or T.V. but when the final count up comes for what all this is about. and means maybe they will be the ones who have won the reward mainly because they were not AFRAID to dig deep and scron what the public thought of them and sort not the limelight but to KNOW and U_nderstand the TRUTH behind the saucers. and we prepared to pay the cost .

I do not think we have another 15 years ahead for this to happen or even 10. in fact it could happen anytime now. the world today is too far gone beyond the point of no return no matter what all the peace seekers say and do. for after all they are pawns too in the great chess game being played out. for world dominion.

Maybe you think . " there he goes again " but they said that years ago. today without any pride of saying I told you so. because the knowledge came not of me. There are many who say often " do you remember saying this was to happen" or " I read in an old magazine where you said so and so. "

Even authors who scorned at things I told them and quoted so in books. today are writing books which actually fulfill the things which they laughed at me about. Now PLEASE DO NOT THINK I'M saying this to bolster up your opinion of me or my ideas. I take no credit. for any such knowledge the gift if any of such is not mine. it is but a repitition of what has been taught me. and more a very close confirmation of many things foretold before by much wiser , and better men than myself. for I claim not to be anything but a mere mortal man with all the faults and weaknesses that such possesses.

After 30 years. and 21 active I still believe they are from Space and here to help. THE EDITOR.

U.F.O.s. EXTRATERRESTRIAL OR OF EARTH?BY HANS LAURITZEN .

There is no doubt that the flying saucers constructed by the Germans during W.W. II have been perfected by the military of U.S.A. and U.S.S.R. to a perfection, which civil citizens hardly would believe, if they were told about it. To keep it secret the military is interested in the ETH (Extraterrestrial Hypothesis) to be accepted by ufologers.

That is done by combining the denial of UFO's and the ETH.

As any psychologist knows the result will inevitably be that those accepting the existence of the UFO's are lured to accept the ETH at the same time. To-day science has made so many new discoveries and inventions, which are so advanced that if somebody tries to reveal them, most people might consider the information to be science fiction. To expose some innocent citizens in various countries to some of these inventions and at the same time denying their existence will only make the ETH appear more acceptable to ufologers.

I am ready to answer any question pertaining to my experiences mentioned in the letter to Mr. A.G.E. Mobey of England.

"How do you know that those entities you met are affected by sound waves, ultra sound etc?" I do not know of the nature, origin, construction, and reason for the presence of the U.F.O.'s I met. Facing the unknown the number of possibilities are unlimited. Only the physiological and psychic effects they caused in us restrict the number of possibilities. The only thing I saw was the two big dim yellow globes. If I see them again, I can probably identify them. I think I will never forget them. They could have been anything. Hypothetically then they could be crafts, entities, or something else. As long as the final solution as to the real nature of these UFO's is not found, I am ready to discuss my experiences on the basis on any theory. In case they are space entities surrounded by extremely strong electric and magnetic fields, they will be affected by sound waves. Sound waves penetrate electric and magnetic field without difficulty and are often amplified. For instance the velocity of sound waves is increased in strong magnetic fields.

"Can an eventual attack by them be defended by "sound" weapons? In this case: does the big powers on earth possess such defensive weapons?" The many reports on close-encounters with UFO's indicate that they are causing electric and magnetic effects, so they can probably be defended by "Sound" weapons. Yes, the big powers on Earth have possessed such defensive weapons through many years. I wrote about these "sound" weapons in 1963 - articles published in U.S.A., "Panoram", and "UFO-Nachrichten". It is possible to make an invisible "sound" wall, which cannot be penetrated not even by bullets. Many secret unconventional aircrafts are no doubt surrounded by such invisible "sound" walls, so that they will not be damaged in case somebody should shoot at them if they for some reason should have to land outside the secret military bases. Such invisible walls near unconventional aircrafts are often taken as a proof of the ETH, but they could also be taken as a proof of the terrestrial origin. As far as I know sonic beams from "sound" canons and some other "ray" weapons can penetrate such invisible walls. They have previously been a military secret, but in the spring 1969 a Danish engineer got a public patent on such an invisible sound wall.

BY HANS LAURITZEN.

(Contd)

"Are you still in contact with those powers? (I mean entities?) No: I am not.

"Could you verify or falsify the theory that those MIB (Men in Black) cases are connected in any way with your entities?" Those MIB cases might be connected with my "entities" in as much as the "entities" induce such a violent terror in people of being discovered (that they have been changed in body and mind) that nearly all victims are silenced for their lifetime. They stop their UFO-research and will thus not trouble the military of the big powers any more.

"How could the Swedish Group possibly know that you were to be contacted? Are they in contact also?" The Swedish Group has confirmed in letters the telepathic contact they have. During the 7th International U.F.O.-Congress in Mainz, a member of the Swedish Group told me that I was on their list of people to be contacted soon. I was not informed how they knew it, but it is evident that they must have some connection with the UFO's, who treated us the 7th of December 1967.

TO MAIL BAG. PANORAMA.

Please let me explain to you and to your readers a point which should have been added when an excerpt from one of my letters was quoted in the issue of Panorama Vol 9. No 3.

The russians have a Certain type Saucer which had ordinarily been invented by a brilliant Austrian scientist, Victor Schauberger, who worked with and for Germany during W.W.2. He was called to the U.S. shortly after the war. Here he was assassinated and only just reached his beloved Austria to die there. His is by no means an isolated murder case in the history of the UFO after 1945!

Although Russia was able to produce the Flying Disc from early 1945 on, The .US. had to start from scratch several years later. This does explain the TOP SECRET attitude which prevails still in the U.S. Air Force and the C.I.A. regarding ALL U.F.O. sightings and landing reports.

When ordinary pilots are not permitted to as much as utter a word of any possible UFO sightings, do you believe Professor Herman Oberth was free to chatter about a top secret weapon such as the Flying Disc ?

However, these are NOT the only UFOs seen in the skies of planet Earth since 1947. There are also various types of air- and space craft which come from "elsewhere". This "elsewhere" might be a planet in our solar system. a planet in another solar system even in another galaxy, it may be the Moon or inside planet Earth. In fact, intelligences from every one of the above mentioned "elsewheres" could be observing humanity and its mad activities at this very moment!

We only mentioned the German, now Russian Flying Saucers because they are completely ignored by the UFO researchers. They should at least, be taken into consideration whenever a sighting is recorded. Admittedly, there is nothing romantic about a secret weapon used by the Russians for purposes of espionage and sabotage and it is much more pleasant to concentrate all our attentions upon the possibility of being visited and SAVED by benevolent beings from another planet.

After more than 20 years of UFOs man should rather ask "WHO FLIES WHICH SAUCER?" Now, let us start with "yea and nay" right here. AMOYA.

Before we start to quote the above article, we would highly recommend this Journal to all our readers and especially this number which deals with a lot of things going on in New Zealand with the Air Force of USA. and the N.Z. Govt. much of which is being withheld from the public. 25c. single copy

.....

THE FIRST EARTHMEN TO WALK IN SPACE WHO WERE THEY ?

RUSSIAN OR AMERICAN ???

We^u always thought it was the Russian Astronauts who walked in space first, until we found a copy of Science and Mechanics dated Jan . 1966. for the whole story we advise you to get a copy or maybe your local library may have one.

.....

HOW THE RUSSIANS FAKED THEIR
WALK IN SPACE.

1. From all the evidence available, they used infrared(IR) film to photograph cosmonaut Leonov.suspended from wires or cords against a blue background in the studio. The wires or cords were also blue, either painted or dyed. IR filters (required by the IR film) subtracts all blue light and so, naturally subtracted the background and wires and cords except for one small portion of wire or cord that had been carelessly painted or dyed and subtly reflected a highlight from the studio lights , but went unnoticed through the printing processes. The result was a natural mask. leaving only the cosmonaut " floating" in space.
2. IR film can also be controlled in development for either low or high gamma - that is , for a maximum contrast . The sharp lighting contrasts that exist in outer space can thus be easily faked with IR film tha almost with any other film .
3. The developed IR motion picture negative was then copied onto black and white reversal film, exposed and treated chemically to obtain a clear silhouette of the cosmonaut against the black background. This was then reversed by the film into a black silhouette against a clear background.
4. Matched with a positive motion picture print of the Earth made at an altitude of 100 miles or so with an unmanned rocket born camera . The black silhouette of the cosmonaut acted as a mask to blank out the light. The two matched films were then placed over a fresh motion picture film. which was exposed by controlled lighting. After development, the exposed film was a perfect series of negative masks - views of Earth below with clear areas in the shape of the cosmonaut .
- 5.The original IR negative film of cosmonaut Leonov with the background and wires or cords masked out then was placed against the black and white negative film of the Earth with the cosmonaut shape masked out. These two film strips were set in the printer so that the masked out portions of each were in perfect register. Beneath them was laid another strip of fresh unexposed film . All three films were held in register with a glass plate laid flat on top of them . As each frame was exposed , the plate was lifted to allow transport of the next frame . The result was a master motion picture positive print. with Leonov superimposed on a background of the Earth. From this a master negative print was easily and quickly made. to be filed away in case future positive prints were needed.

Russians or USA first walk in Space? "

6. The master positive was then tinted blue to simulate colours of outer space and copied onto colour reversal film. The resulting print was a "colour" positive motion picture film of cosmonaut Leonov walking in space.

7. Colour could not be used originally because of the IR masking technique employed. IR film is a black and white film .

8. A black backdrop could not be used to mask out Leonov's studio background because it would reradiate heat (which is infrared radiation) from the flood lights and thus be exposed on the film preventing a clear mask .

9. Additional proof that the Leonov film could not possibly have been made originally in colour , as claimed by the Russians , was provided by Charles W. Wycoff, one of America's foremost photographic scientists. " I don't care how many generations of prints were made from the original, if the original was actually a colour film the final result will still not look the way this print does." He was referring to the Russian film , released officially to NBC as a colour print of the walk in space. " You can keep running this film through printers, " he continued , " making copy after copy- and you still won't end up with this kind of print . "

Wycoff also added . " I am convinced that the original was a black and white film , because it could not be a film like Kodachrome. Ektachrome or Ansco colour- or any known colour film . With any of these, a colour pattern would not show- whether the exposure was correct or not. Not one such colour pattern shows up on the Soviet film ". He even explained why a reddish brown stripe could be seen along the arm of the cosmonaut's space suit. Since the original tinted black and white film was copied on a multilayer colour film. any of its areas dark enough would be underexposed in the lower film layer and show up as a tone of brown or brownish red. This was equally true of the lettering " CCCP" on Leonov's space helmet .

10. A constant pattern of reflections that appears on top of all scenes showing Leonov walking in Space resulted from reflections off the glass plate used in the double printing process. when the cosmonaut was being superimposed on an Earth background. This was first questioned by the technical experts at the College of Graphic Arts and Photography. Rochester Inst . of Tech . who viewed the film a dozen times . They felt that a glass window might have been used in a special casing designed to protect the camera from a low pressure of outer space and the reflections could have come from the window . They later agreed that this was quite unlikely, since it would make a 35 mm motion picture camera extremely cumbersome - and it was known that such protection was unnecessary anyway .

The Russian cosmonauts themselves ruled out the protective casing concept during several press interviews, including the long televised interview with Frank Bouggholtzer of the N.B.C. Leonov explained to Bouggholtzer that the camera had a lens cover on it because. " We were afraid the temperature would influence the optical system and thus affect the picture . Now after we, I left the ship... I had to remove the protective cover." The cosmonaut removed the cover and threw it off into space, into an orbit of its own . he claims.

But if the camera had been sealed in a protective casing with a glass window in front of the lens, he would not have been able to do this.

Actually he never made a mention of any protective casing during all his interviews . In fact the pattern of reflection from a glass plate catches him in his own lie: the evidence shows that he was not photographed in outer space but under glass.

A FEW MORE POINTS TO BE CONSIDERED.

* Leonov was suspended from wires or strings, much in a manner of Peter Pan

Walk in Space ??? (3)

as he flies through the air on a stage. With proper stage lighting such wires are invisible. Yet in several of the Russian films episodes, light was reflected from a small portion of the wire(or string) attached to Leonov's space suit just above the cosmonauts centre of gravity. It was barely discernible . An untrained eye would have missed it. One of the experts noticed it almost at once.

* One camera angle was impossible of achievement. This showed Leonov crawling out his hatch into space. It was a head on shot. so the camera would have had to have been located OUT in space beyond the spaceship .

The Russian Command Pilot. Col. Pavel Belyayev, was reportedly in his own airtight compartment of the Voskhod II - so he could not have taken the episode besides the official Tass News Agency release made no mention of external cameras. other than the one Leonov himself was supposed to have attached to a mounting on top of the Voskhod spacecraft .

* One still photograph(the clearest one) shows Leonov emerging from his hatch standing straight up, his body still halfway inside the spaceship. This contradicts the motion picture film, which shows him squirming out of a hatch on his belly .

* The black and white stills were photographed in a tank of water, to simulate floating of lack of gravity. Several of the experts made this observation .

* Astronaut White could not keep his legs together in zero gravity. Every scene showed his legs spread eagled apart. Cosmonaut Leonov had no such trouble, when his legs came into view, they were always close together .

Charles W. Wycoff. Sen. Scientific Specialist and an outstanding authority in the Photo-optical sciences, ran the film through the Prism-editor all morning, he could hand operate it and thereby change speeds or move backward and forward at will. He found many interesting aspects only minutes after seeing the film . He was absolutely convinced that the film was not originally made in colour. " Because the grain is big, you don't find that kind of grain in colour film anywhere that's fast enough to have grain that big"(1965)

" Immediately I know that this is not a colour film. It's just a black-and-white print that's been made into a simulated colour print. Nor is it a colour film that was poorly colour-balanced. It's definitely a B&W film that has been coloured later, you can quote me on that," he said

The thing that excited Wycoff most, was his discovery of a projection from the rear of Leonov's space suit. This projection, which Wycoff immediately felt was a highlight reflection from a length of wire or string, was apparently under tension. It seemed to be pulled taut and even lined up with a tight crease in the space suit, as if it were attached somewhere inside the suit . The wire was so faint that it could barely be seen on a single frame . The film had to be in motion at a certain speed for it to become visible.

To be honest about it I had never noticed the wire before- I had viewed the film dozens of times . No one else had noticed it. Later when the film was projected on a screen this became almost invisible. It had to be seen through a hand operated Prism viewer Editor, to be noticed. .. End of quote

.....

This added to the fact that the so called photo of the Moon's back side by the Russians and also that of Mars. being under question as to being genuine or much left out. makes one wonder just how true are some of the facts we're supposed to believe. and in truth how many are indeed real and not actual faked for public consumption. for the suckers who don't stop to question some of these so called scientific feats. (Editor Panorama)

.....

TASMANIAN LETTER .

From "TASMANIAN U.F.O. BUREAU."

"U.F.O.s In Tasmania "

Tasmania is not left in the cold as far as UFO sightings are concerned.

We have had some of the greatest Ufo sightings in history but it is a great pity that so many people do not report all of the sightings which they see. Out of all about 45p/c/ are reported but others seem to fear ridicule and refrain from making known their observations.

Because of the apparent lack of sightings this year , people seem to be losing interest, for as long as there is something to look at , or be excited about Their interest is held . but wanes when sightings fall off.

However we shall maintain our standard of reporting, and we need to encourage folk to report and assure them that they will not be scorned or laughed at. even if their opinions may differ from others. for everyone is entitled to his views.

It only requires often for one person to speak up. and say. " Oh, ' saw a saucer last night. " and another will take courage and say " Oh. I saw one over six years ago" and immediately comes out knowledge of a sighting no one ever knew about , mainly because they thought they were alone in such matters and were afraid to be ridiculed . How often have sightings bobbed up like that, just by one person having the courage to acknowledge they saw one .

Yet despite this there has been a lack of sightings this year in Tasmania.

Looking at Australia on the mainland. there have been sightings reported. Maybe? they the UFOs are sick of the Tasmanian apathy?.

I only wish in the future that people here will make reports irrespective of what it might be and let us analyse it. for it is generally sure that one report will lead to another .

Take the Rev. Brownings sighting in 1960, He saw a cigar shaped ship with three little saucers.

On talking to him he said. he had recieved five sightings from neighbors and the papers and published three others . all stemming from his initial report. That's really going . Eight sightings coming out of one report by the minister.

Members of T.U.F.O.B. report on the spot as far as I am concerned. and last year with the members help we uncovered 65 sightings. These were just in Launceston The years dating from 1959 to 1969.

A few months ago photographs were taken of a mystery object and although they were only a reflection , astronomers in Hobart instantly flew at their old game explanation left right and centre. What are they going to prove and I must say that these people are the culprits , for dull non-reporting Tasmanians. They find a means of explaining away , anything they pick up.

I appeal then for all Tasmanians and everyone to REPORT EVERYTHING. Don't let them gather mould. and pass off and away. WE cannot know unless YOU tell us.

JEREMY HOLDEN . PRESIDENT.

.....

WE concur with Jeremy Holden. in his urge to make the reports.

However Tasmania is not the only place where sightings have fallen off. this year Quite a few places have stated that they are not so numerous as in other years so take heart you are not alone. The Editor.

DIFFERENCES OF OPINION.

BY.

DON. ALFREDO, CALFE.

As one reads the very varied amount of literature now available on the subject of U.F.Os. from its many sources. one is struck forcibly by the great differences of opinions which have now been created on the subject. some ranging completely an extreme to the other.

In one way this is good, nor is it unnatural that so vast a subject which has no text books to go by has therefor brought forth from the minds of men who vary just as much in their thinking as their do in their characters. a wide range of ideas as to why. wherefor. what etc. of the most enigmatical problem of our time.

But the sad part is that from all this viewpoints so little has reached a basis of some form of unified idea. for instance.

There are those who still do not believe that the UFOs are extraterrestrial. and in this category we have some of the most eminent magazine producers. yet staunch believers that they exist. Others are so bent of the desire to fit the present known science to the recorded facts of them that they will not listen to or in any way give credence to records which should betaken notice of. of behaviour of the UFO which does defy our science formulas. One thing about these fellows is that they forget so easily that we are almost evryday ourselves advancing so rapidly that we have to change many of the fixed dogmatic ideas we had even ten yeras or twenty years ago. One in particular. They laughed at the idea that men could be frozen and put into space. then revived. which now adays is being yested. and I myself wrote in this very magazine many years ago such a hypothesis even before it was mentioned in other magazines. The Russians a few years later did begin to give thought to it. Not that I now believe that this is how the UFOonauts travel, for I am of the opinion that they do so in other dimensions which we as yet have not fully tapped. and do not need to be "iced up".

So much for them. but alas they are not alone. even many diehards exist in this business who will not agree to believing in contactees. and despite the obvious hoaxes there are some solid cases which take some thining about.

Of course the type that get the most kicks are those who believe in the brothers from space who have come to help us and are of peaceful intent. this type by the way generally hop over the cases of nasty interfering buds which are reported. but this group are very much divided amongs themselves. also.

One has the Religious minded fellow. probably very open minded who sees in the saucers and the crews a fulfilment of all the worlds religious prohecies of a coming Avatar. Messiah or whatever terms they use. So long as this type are not the fanatical class one can be very much inclined to listen to their ideas for after all. the present leaders of the world and those who control them do not seem to be doing a very good job of bringing about a world of peace and harmong or so called brother hood of man. (to me one of the biggest boloney propagand things that ever existed.)

Then come the New Age Groups. The Metaphysical types. the Spiritulist who now have found Space men talking to them instead of the former Red Indian. etc etc. Now although these latter groups are probaly the most despised of all by the "very objective" researchers it is a known fact that from them at times have come some outstanding exapmles of information. especially those who I consider to be the most genuine. i.e. those dealing in the E.S.P. field and not the medium. type of message. Probably the most outstanding of these was the late Wilbur. Smith. who headed the Canadian Project Magnet. and whose written and

Differences of Opinion. (2)

taped recprds of some of these ESP.messages and information make one stop and t think before they start criticising such means of study of the UFO.

The one very sad thing about these latter Groups is the fact that they seem to draw to them a number of people who are prone to fanaticism, and which does not only great. to such groups , for it drives people away from such. but to the cause generally. and certainly gives their critics an o en field day for their criticism .

Among these too there are in a very high percentage. those who avidly preach a vegetarian doctrine. which of course no one deny is a vry excellent thing for health reasons alone.BUT. when this is in the hands of the above fanatics. it becomes almost as bad the the hell fire pr4achers of old.

I have manyfriends who are most close to me and greatly admired who are strict vegetraians. but thank God they are NOT fanatics. nor do they appreciate those who are .

Now having looked at the main types of thinkers among us. What can we say is the main result of sll this research after some twenty or thirty years. ?

Under nocircumstances can we say there is any form of Unity. of though. in fact being honest. there is a gret deal of Disunity. which brings me to the point I have been giving thought to of late.

When I was a child I was taught that an easy way to distinguish good from evil was by the results of what it taught pr produce. in other words as other have put it often " Bytheir fruits ye shall know them ". If something is of God it will bring about order peace unity. if not the disorder, war, disunity. chaos.

We have heard so much about the brothers from space , and the New Agers type etc. are been plugging us with the " Brotherhood of man " and the " Borthers" teach us that on their planets their is beautiful Harmony etc etc. in fact it is a word picture of the Millenium as taught in the Bible.

But the sad part is that this brotherhood stuff does not get put into very much practice. for looking around as I have in my travels I have seen a great deal of rivalry. jealousy and even spiteful action. and a terrible lack of Christian Love. among these very groups that preach so much of what the brothers say and want US to do .

Now to me. , if these brothers are so real to these folk and I belive in some cases they are. and that some of these dear people are rea ly genuine.some dear sould I call to mind who qualify above anything I say here. as being all that theypreach and more. but alas I am not talking of them but of the rank and file Tehn if such is their belief how come this evidence so apparent of disunity and open lack of Understanding, and Communication between them in loving thought for each others.

I call to mind a few cases. in which because there was a slight difference of o- pinion. one of these very high " souls" ??? got very offended and ceased all communications with the other whom they claimed they were trying to help.

Another case. Another who was supposed to be in very close contact with Ashtar of Venus. and taught love love love. etc. being a strict vegetraian refused to dine with his host because the dishes which the food had been cooked in had been used before for cooking MEAT.

My mind in these and so many other cases flew to the great chpater set fot all Christaina and those who would live a life of harmony.The 13th Chap . of Cor.

Differences of Opinion (3)

" If I speak with the tongues of men , and of angels. (messengers) and have not love. I am as a sounding brass or a tinkling symbol.....
Love suffereth long and is KIND,.....Love vaunteth not itself..is not puffed up.
is not easily provoked."

Well so much for that it would do some of such to give a little more time to the teachings of the GREAT T of all MASTERS and such as above. and a little less concern about the minor servants of Him who they claim to be in touch with perhaps then they would not be so easily provoked or unkind or thoughtless or ill mannered as they have been . Maybe then they would begin to make an impression on the world and the world would desire to follow them and take part in the New Age they preach about.

I could not help bring to mind as I penned the above. lines " is not puffed up" when I was among a group of New Age folk in a certain country. Their aged leader was one who I knew filled all that was required to meet the standards of all that one looks for in Christian Live and kindness. one of Lifes Greatsouls. During my stay an executive leader took part a great deal. From the start I felt this person to be a phoney. Yet I felt I should not let my own feelings be unkind and judge. However several events proved my first assessment to be more then correct . However one afternoocn. some one play d a tape which praised this person to the skies. and I could not help but be amused as I saw the great deal of pride and self ego swell into her bosoms which literally puffed up like a powder pigeon. she openly beamed with self glory .

Where was the humility I asked myself. and yet those folk thought she was the answer to their prayers and still do today .

No wonder we make very little impression if we teach such an idea of " rothers from space" who teach all the lover dovey stuff of peace on earth etc. People around us are not the fools we often think they are especially our young folk today. who seek reality, perhaps in a wrong way. but nevertheless the want it and seek. and it is US who have failed to have given it to them . Hence the great necessity that we have to be very REAL and Genuine not only to them but to the hard headed business world , if we are to convince the, there is some thing in what we believe or teach .

Proabaly the onus falls greater on the New Agers then t an the others. to rpove it. by LIVING ACTION . not Preaching and Talking , and to the others sections also the lesser part of convincing men that there is something real about the UFO by making a greater effort to have greater UNDERSTANDING and COMMUNCATION with those wh too are seeking even if they are not fully in agreement with each others views. Surely if we are to convince the world of the reality of the UFO we can't leave it to them we have our part to play by showing a united face of agreement to share our findings . and from it all wh knows maybe THEN when we really begin to put things into action OURSELVES the spce people amy begin to take the action we have so much wanted them to do. by making the appearances which will not be able to be denied or gainsaid.

Maybe, we may not have too much longer to play our part and prove how real we are, The way things are going in the Middle East. and the great turbulence of peoples in all major countries. is so far spread that we are too far gone to solve it now without some tremendous crisis or intervention.

THEE are those who believe this intervention will be brought about by the UFO WHO KNOW? One thing is sure It behoves us to be READY in all ways if so..

" QUAKES... BUT NOT ONLY ON THE MOON "

BY Leif Eakoff Pedersen.

From UFO KONTAKT. No2 1970. (Denmark)

From time to time it can be quite beneficial to compare things with each other , as you will ofteh get a more rich and v_{ar}ying picture of the featural conditions like they appear at the moment .

DISAGREEING SCIENTISTS.

Our attentive readers will have noticed already in the last issue that the specialists-- to say the least - were terribly busy disputing their evaluations of the meter readings from both the Mariner capsules and the Apollo results from the Moon . When you read the article " Mars" , and further out into space" dated Aug. 10. 1969, anf after that the article. " Mars studues find mysterious region of wildnrness" dated Spet 11th 1969. thene the scientific conclusions derived from the same measurements are very much aprt . Also the study of the rocks and gravels from the Moon have resulted in very different sayings from scientists. In the daily press we could read thatthe seismic echo which was brought about as Apollo 12 sent the moon ferry crashing down of the lunar surface boomed almost för 24 hours. This fact surprised the scientists enormously . The Moon boomed 1 like a church bell for more than 24 hours as the seismic shock waveswere reflected from side to side through the Moon's body . In the article " Expert about the Moon Wuakers" in this issue of Kontakt we read something else/ here it is the moon ferry itself and the gases inside which caused the 24 hour long shock waves. First, the metallic mass of the moon ferry would hardly behave very differently seismically on the Moon than on the Earth, and secondly. the gases could hardly have caused the " ringing bells ".

From where did they come- from a luna atmosphere? or, if the exhaust gases from the rocket engine caused them, then there must have been immense quantities of them . in order to keep the booming going for 24 hours. And so the Moon must have quite a dense atmosphere to keep those gases hovering so long. In a vacuum the gaseous particles would fall down rather quicklyand lie on the surface. from where they would eventually escape onto space- as it couldn't be that you can just lay alayer of atmosphere of earthly composition - profuced artificially, of course- and this layer then stays on the lunar surface, as many " problems" would be solved in that way /

Are our scientists on Earth really so disagreeing inopinion, and if so, who is then right ?- Or, is none of them right. If that's not the case wakt, then , must be explained away? Is it really so that every tiny detail which is important to the question " Life in Outer Space" must be kept secret at any price ?

WHAT THEN . IS THE TRUTH ?

Let us first look at a couple of minor latters from the daily press around the world. In the Belgian newspaper " La Meuse La Lanterna". 21 Nov. 69. we read the following interesting details.

" .. the little scientific laboratory which two astronauts (Conrad & Bean -) placed on the lunar surface the day before showed the presence of lunar atmpsphere." UNQUOTE

We know from offical sources that the pressure in the moon ferry showed 2.5mm p pressure of mercury when the door was opened to thelunar atmosphere corresponding 1/300 of the density of the Earth's surface.

One of the official NASA frames is HR-86-3, taken by LunarOrbiter 1V and showing

"QUAKES.. NOT ONLY ON THE MOON (2)

the crater Posidonius. This picture shows a crater with many ravines in the bottom of the crater. In the middle you find some light sunlight parts. and by a closer study you will observe the ravines in continuation of each other on either side of the sunlit spots, that is, they seem to pass under them or, in other terms, the sunlit spots are above the ravines. You can even spot shadowss corresponding in form to the clouds which is what they are .

Could they be anything else? As they really are clouds the atmosphere must be heavier than 1/300 of our pressure - at least in some places. Is this really conceivable from a scientific point of view? Yes, because any of us can remember that Apollo XI registered unknown radiations and previous Moon shots registered a very irregular effect. by the gravity forces which were described as " raisins in the Moon ". If the " raisins " are deep craters they can be filled up more or less with atmosphere. What an excellent place to build a space base! The atmosphere would even form clouds which could give rain-- this again would cause an erosion of the mountains and give a soil in which plants could grow. Maybe we will see at the end that good old Adamski was right about what he saw on the Moon .

THE VOICE FROM SPACE

In the same article from " La Meuse La Lanterna" we can also read another interesting thing.

" When ApolloXII was on its way back to Earth Don Lund from Houston G Ground Control asked Conrad if he had called his name over the radio. Conrad answered that he had NOT called Lund. Ten Don Lund retorted th that he was sure he distictly heard his name called on the Apollo's w wave length . After a moment of hesitation Conrad answered very seriously: " Then it must have been from another spaceship." UNQUOTE

Let us here add an announcelent from a news broadcasting in the Austrain radio on Nov 16. 1969. stating that the 3 Apollo astornauts had announced that they were being pursued by and unidentified object .

Finally a little thing . also coming from Austria . The newspaper " Kronenzetung" relates that Conrad and Bean the day after landing found a stone size four by four beneath the moon ferry. If it had been there all the time, whu wasn't it blown away by the pressure from the ricket engine? UNQUOTE .

Now we shall efrain from writing that the official sources are filling us with untruths, but why don't they tell the truth either . ?. Leif .

COMMENTS

As some of you will know from the last letter Hans quoted a few other items From " La Meause La Lanterna" Nov 21 1969

" On the surface of the Moon Conrad said over t e radio : "If I didn't know it was wrong, I would say that a solar wind is blowing here. That wind is even strong enough toblow my"test baskets " in the wrong direction . " UNQUOTE .

Also from Readers Digest April 1969 an article on Apollo VIII says p35.

" .. Later Lovell reported a phenomena which raised the greatest curiosity in Hous ton. " We van see the sunshine over the horizon before we can see the Sun's disk. There is a luminous haze where the Sun is rising" (This could suggest that the Moon has a very thin atmosphere anyway - RCO UNQUOTE.

SIGHTINGS HERE AND THERE

"THE BALLARAT COURIER" July 28th 1970

U.F.O. AT FOOTBALL GAME.

Four spectators at the Ballarat North football on Sunday reported seeing a UFO at half time.

A football? Pie in the sky? A leaping Bulldog ?. No. It was a flying mushroom. Or that is how they described it. The strange object was seen by Mr and Mrs. Allan, of Howitt St. and their friends Mr and Mrs C Slade.

Mr Allan said yesterday that he was surprised that no other spectators had reported it. He described it as a grey metallic object, round, with a bulbous section underneath like a mushroom stalk.

He drew a diagram which looked similar to an old fashioned light shade and electric bulb. He said his wife first noticed it through an open window.

At first they thought it was a kite, then a parachute-- but are still puzzling as to what they exactly did see.

Mr Allan said it moved slowly across the sky as if it were drifting with an air current-- but it was travelling against the wind.

By the flags on the ground the wind was blowing from the south-west, but the "flying mushroom" was travelling south-east.

After a couple of minutes it tilted sideways and disappeared into the clouds over Black Hill.

Courier reporter Jan Murphy was at the match and saw the object at half time. He thought it was a kite flown from the Wendouree Oval. He agreed that the shade described previously was correct but he thought it was an object covered with silver foil or silver paper.

.....

The wind direction rules out any wind propelled object such as a kite. Ed.

.....

ANOTHER BLACK HILL BLAST MYSTERY NO. 5.

The Courier switch boards were jammed and 3BA last night after a series of mystery explosions in Ballarat.

It is the true spirit of previous explosions, last night's blast. the fifth of its kind reported was unexplained.

However, the believed location of the explosion. the same --Black Hill area.

Police again were baffled by the explosion but the general feeling is that some "lunatic is having a ball with a few sticks of gelignite," as one policeman said. "We have theories ranging from old time cannon being fired to a plane breaking the sound barrier," he added.

An explosive expert said last night that the blast could have been caused by only two pounds of TNT.

"We heard a bomb-like explosion and it wasn't a car prang-- we checked," one woman caller said.

"I thought the hot water system had exploded," said another.

Most of the callers who had either felt or heard the blast were from the North Ballarat or Wendouree area.

"It was a dull thud that rolled around the hills another man said.

.....

"THE NEWS" July 30 1970.

SEARCH FOR SKY OBJECT.

SURFERS PARADISE. A Gold Coast riding school owner is searching for a mystery object that crashed from the sky on to his property.

Mr. G. Gibson said "the thing" whistled across the sky. passed over his head at a height of about 60 feet, and vanished into trees about a quarter of a mile

Sighting reports cont . (2)

away. Mr Gibson, who operates the Reinvale Riding Ranch at Tellebudgera Valley was with some horses when he first saw and heard the speeding object . He described it as black and about the size of a soccer ball. and making a loud whistling noise..

.....
What a pity he made no mention of the horses reaction. Ed.
.....

TASMANIAN SIGHTING REPORTS.
.....

EXAMINER" Aug.

Five fishermen saw a flying saucer- shaped like a huge half orange- off the east coast of Tasmania.

The fishermen say they had a clear view of the object hovering at about 150 ft for more than two hours on Tues Morning. They watched from two scallop boats anchored off Paddy Island. about two miles from the coast, between Scamander and St. Helens . The fishermen told their story before leaving for the next scallop fishing ground.

Mr. Folmingham who saw the object said it looked like a huge orange. Two lights like burners shone from the underside of the object . They had said they watched the object until 4.50 a.m. when it rose to about 4000 ft. and disappeared.

.....
SIGHTING AT LAMEROO S.A. Aug 1st 1970.

At 6.60. p.m. Miss Anne Francis McDonald. observed a large green ball with a slight yellow tint, which appeared hazy yet luminous. for a quarter of a minute as did 12 others of the same town.

The object passed from West to East . as it passed in front of and above the local wheat silo. It then began to fall slightly and the luminosity shut off just as though the light had been suddenly switched off.

The weather conditions were good and clear. and the object was much brighter than the surrounding sky . Its size made it too clear to be confused with any other object it being about the size of a football and only above the silo as stated. It appeared to leave a slight trail behind it

In view of the number of witnesses mostly who were going to work. it could hardly be termed an optical illusion and we find it hard to fit into any other known natural phenomena.

.....
CANBERRA SIGHTING REPORTS.

FROM C.U.F.O.R.S. Mr Drake.

June 16. Bright light seen from a car between 6.45. and 7.15.p.m. by 2 brothers.

Identified as Satellite Cosmos I

June 16. Bright light seen moving among trees and rocky hills at Tharwa ACT

Time 10.30 p.m. by wife of previous sighting Unidentified.

Attempts to duplicate the light by lamps etc were totally unsuccessful.

June 21st . Bright green objects like a double light. sighted by a foreman of a plant from a car. the date uncertain. Describes as umbrella shaped Time 8.00p.m. in a suburb south of Canberra.

GAWLER BRANCH SIGHTINGS .

Thurs Aug 20th 1970.

The Paull family from Gngle Vale Rd. Gawler. from the home sighted a starlike object, pulsating, red, orange , reen . from their house. looking toward Adelaide and the foothills . hovering first then moving away eastwards a little. Then moved across the sky within a few seconds as a brilliant white light in the direction of Woomera which is in the north west . Weather conditions. Clear. and bright moonlight.

.....

Sunday 23rd Aug, 1970

Pulsating starlike object between eastren foothils and Adelaide at 6.40. to 7pm. The object then moved over the hills. Sighted from the home as above. We then got into car and proceeded to Elizabeth. keeping our eyes on the sky and when we arrived th object appeared from approx Mt Lofty. along the hill tops toward Williamstown. behind the Parahills Sub- Station . into clouds. This then was a saucer shaped object, the size of a cup. Surrounded with orange lights. Time movement from point to the other appora 20 secs.

.....

Friday. 4th Sept.

Oboect sighted by Mr and Mrs R Wickham at 9.30 to 940p.m. at Elizabeth Downs. They Observed a large star like object the size of Venus , but below Nenus. it hovered for approx seven minutes the gradually lowered down from the planet and moved away to the west .

.....
SIGHTINGS AT RENMARK S.A.

The first indication of this c^{me} from a phone call put to the Editor from the local paper asking us information of how to go about tabbing the reports as the Editor of " The Pioneer" put it " There were so many folk claimed to have seen it. few however who were preared to make public statements. " He however published the name of this Society to contact for those wishing to relate their observations. from several we recieved to date we put the most convincing one which is substantiated by the others who told their strpies.

Mr and Mrs P.J. Coombs of Renmark. stated that they both saw the object . which appeared at about approx. 6.10p.,. in the west .

Mr. Coombs says. " Wewere both at the point of arrival to our home and my wife pointed it out to me . it appeared to be travelling up like a bright yellow light. the size of a large plate and then it started to come down and went out and left a trail of blackish smoke. The smoke appeared to be of a zig-zag. nature. (Probably wind drift). as the object came down ."

Another observergave an identical description. but the time was 5.45. to 6.00p.m. The size and shape given was the same and the colour. He estimated the height about 1.000 feet but does not say how he made such an assessment .

The changing of direction hardly fits several known phenomena and we are now weeking furtherinformation on this case before arriving at aconclusion .

.....
STRANGE LIGHTS BEMILDER MAN .

A man residing near to Adelaide. rang us and filled also a form in describing an unusal sighting of formation of lights. in the early hours of the morning onThurs. 24th Sept. His name is withheld on request but is registered in our files. He says it was about 1.30 a.m. when I adrove over the top of a

SIGHTINGS CONT. (Strange Lights)

hillon a main road. He suddenly saw what appeared to be either one large object or eight lights clusted togetherThey seemed to be stationary on the ground at first but eventually lifted and moved off toward Adelaide which is due west .

He kept rravelling along in the car keeping watch of the object from several points in his movements . He thought at first it was some Army manouvres. but the lifting of the whole series of lights upward ruled this out. Also as the lights moved in complete unison together it would have been impossible for them to have been a land manouvre.for they formed almost a circle according to the drawing supplied by the observer .

He has been driving home about this time for many years and has observed many l lights and other phenomema and admits he was awe struck and bewildered. as they were completely unlike anything he had seen before.

The colour of the lights were simply bright whiteneither changing in colour or position in relation to each other . Total time of observation 3 minutes.

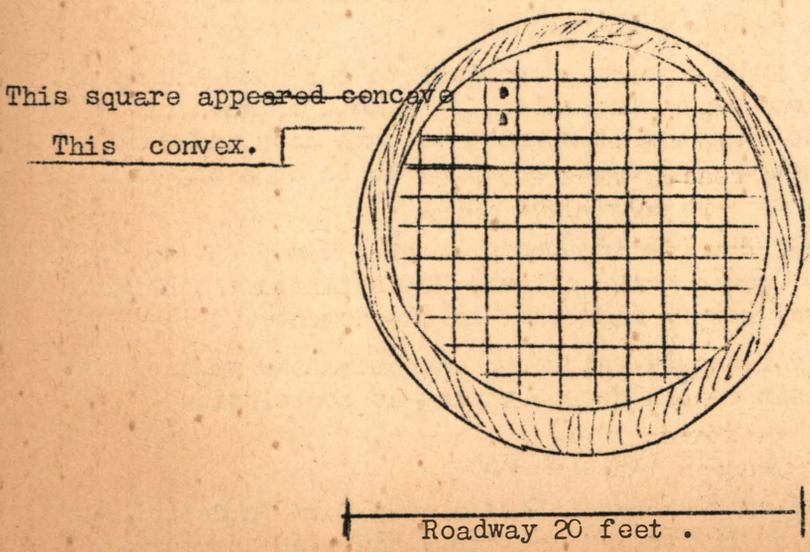

.....

WEST AUSTRALIAN SIGHTING .

MR. R.G. Schaffer. 28, of Busselton a farmer . reported a sighting as follows.

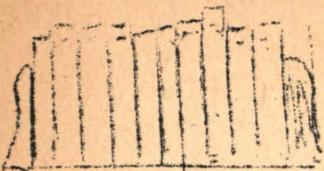

Date 29th July 1970 Time 5.55 a.m. Sky still dark dry cold air. with clear sky. The object appeared to be solid with a colour of dull grey as seen through the wind shield of his car His car radio continued to play without interference. Travelling to his employment and within apporx. 3 miles of Busselton when the object was first sighted. It covered the roadway . The accompanying drawing is given as to what he saw/ The roadway being 20 feet wide it filled the space He was not sure if it was the front or the rear he was seeing for it was cone s shaped , after watching the object for about a minute it began to rise from the roadway at about 2 m.p.h. the passed over the tree tops and disappeared.

It is intersting to note that a number os such c onical shaped objects have been reported from around the world. and thus confirms that the record given is not entirely unique and without precedent. .

Book Review.

" THE SILVER BRIDGE. "
By Gray Barker .

Yet another book by Gray Barker dealing with the odd and the unusual. This books main theme of course is the recording of events which took place in the Ohio Valley which werebrought about by the appearance of the so called " Mothman".

Actually there is very little about real UFO in it. for the above appearances did not always have any connection with any UFO sighting. "He" just appeared. from time to time scaring people and so, mehow as it often does the UFO got connected with his visitations.

For those who connect te UFOs with. the Inner Earth theory of all sorts of weirdies turning up from time to time. well this is an open field for their imaginations.

But Barker does not stick with " Mothman " all the way he occasionally gives a chapter or two to otherodd people whom he calls Mr. Universe. Obviously these odd chapters must be taken allegori callyfor they could not be understood in any other way .

Of course he also gives a few chapters to actual UFO incidents and these are very informative on the particular cases he deals with particularly " Indrid Cold ".

I could not help think how much Barker has changed in his thinking when reading the book. for as we read in his first book " They Knew Too Much " we found he disregarded such ideas as two forces at work. In fact he almost sneered at the suggestions I made to him before he wrote that book on such a possibility and deals with this in the last few chapters of it.

Then he almost laughed at the idea of any such . now in this his own book he spends the greater portion of it detailing events about a creature which by ho means could be called a space man in the same terms as we use it to describe the humanoids which have been seen from time to time and in most cases as recorded by those " contactees " as being generally of a non hostile nature.

Now e are presented with a creature which is neither human or bird. although official explanation tried to explain it away as a Sandhill Crane , an American crane of greyish like feathers which fitted the descriptions of mothman as far as that went but in other details certainly could not fit into the varied reports of those who actually came in contact with this strange creature.

Whilst the book makes interesting reading it cannot be called in the strictest terms a UFO book. One thing is sure it only adds further to the so many accounts now we hear of of odd creatures. and regretably which get connected some legit imately with Ufo and others far from them .

For the students who want to explore all facts then this very full account of the " Mothman Case" should be read if only for compariscn. but if you are one of those who only believe in the kindly benevolent space folk and shun to hear of any other such forms. DON'T read the Silver Bridge it will upset you .

at a solid price of \$6..95 for the first printing after to \$9..95 from the SAUCERIAN BOOKS. Box 2228 Clarksburg W. Vrg. 26301 USA.

The price when compared to other books dealing more directly with UFOs at a muc less price appears to be a bit steep. However it is well printed with hard cover and places yet another book before the public to add still further to the bewildering facts of what UFOlogists think and talk about.

Finally I do not think it leads us any further near a solution. of the jigsaw.

BERRIGAN N.S.W. " ADVOCATE". Sept. 1970

Three people from the Berrigan district have reported seeing a strange glowing object in the sky about 9.30 on Wednesday .

According to the description given by Mr and Mrs. c. Nicholas, the object seemed to change colours from glowing red to yellow appearing just above the horizon in a westerly direction between Tocumwal and Finlay .

Mr. Nicholas said it was definately not a star, it appeared to be, looking from the Monara Vale Homestead to be just above the horizon some four or five miles south of Finlay.

Mr . Nicholas said that at one time it disappeared, then turned quickly and disappeared again .

.....
Our own reporter who sent the cutting Mr. Howard Sloane said.

I knew Mr. C. Nicholas well years ago , and am surprised at his admitting to his social friends that he had seen a UFO. He must have been impressed indeed with what he saw. "

.....
BALLARAT COURIER 9th Oct 1970.

UFOs THIRD VISIT.

An unidentified flying object appeared for the third successive night over Ballarat last night . Students at a local boarding school reported sighting the object at 8.40.p.m. about the same time as they had seen it on two previous nights this week .

One student said the object which was visible for about 3 secs. had two large red " like lobsters eyes" joined by a bright white beam . It travelled from north-west to south-east, he said. Attempts to take photographs were made last night .

.....
COMMENT. Bothe Mr. H. Sloane and your Editor feel this could have been a plane.
