**RADIOTELEGRAPH PROCEDURE**

**1. WHAT TO REPORT**

Report immediately all airborne and waterborne objects which appear to be **HOSTILE, SUSPICIOUS** or are **UNIDENTIFIED.**

Guided Missiles

Surface warships positively identified as not U. S. or Canadian

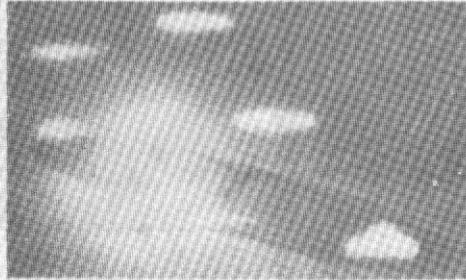

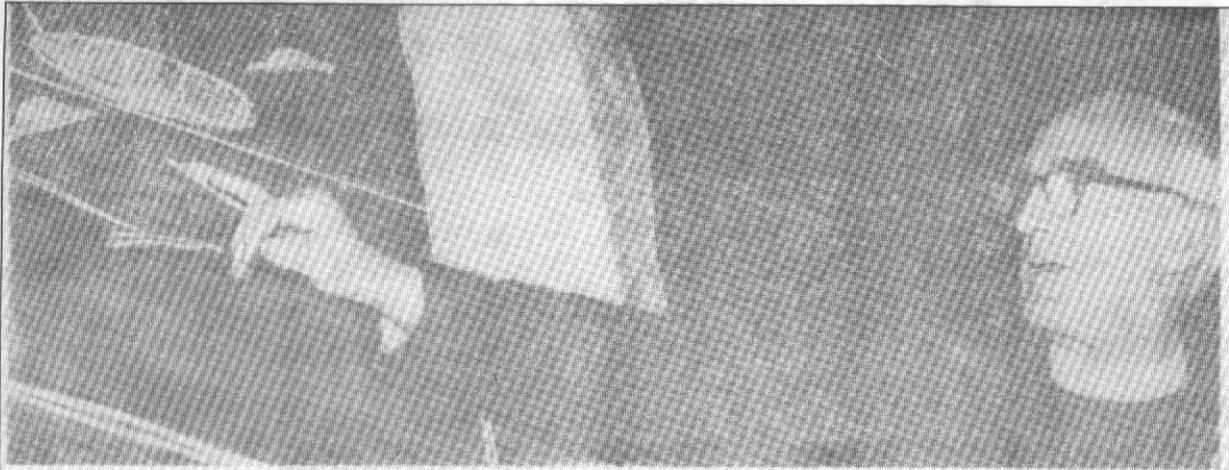

Aircraft or contrails which appear to be directed against the United States, Canada, their territories or possessions

Submarines

Unidentified Flying Objects

Mother ship releasing Scouts.  
Six Scouts (flying saucers) are seen.  
Last of four telescopic pictures in  
a series taken by George Adamski.

**↑ AUTHORITY** should not ridicule people who reported flying saucers, the Rev. Lionel Browning said last night, addressing more than 200 people at a Victorian Flying Saucer Research Society convention in Kelvin Hall.

Mr Browning is the Anglican clergyman who says that he and his wife saw flying saucers and a "mother ship" at Cressy, Tasmania, last month.

Mr Browning said that he and his wife, from a rectory window, saw "up to eight" sauc-

ers near the "mother ship," a grey, cigar-shaped object.

The cigar-shaped object paused after emerging from a rainstorm, then the saucers appeared.

"There was something ominous about the precision with which the

homing took place around the mother ship," Mr Browning said.

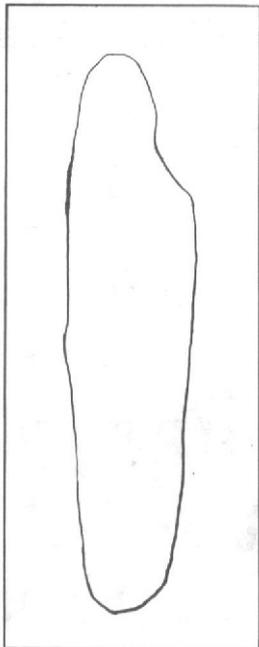

Mr Browning said he believed that authority knew a good deal more about sky objects than it was prepared to say.

Authority apparently did not want to create a panic, he said.

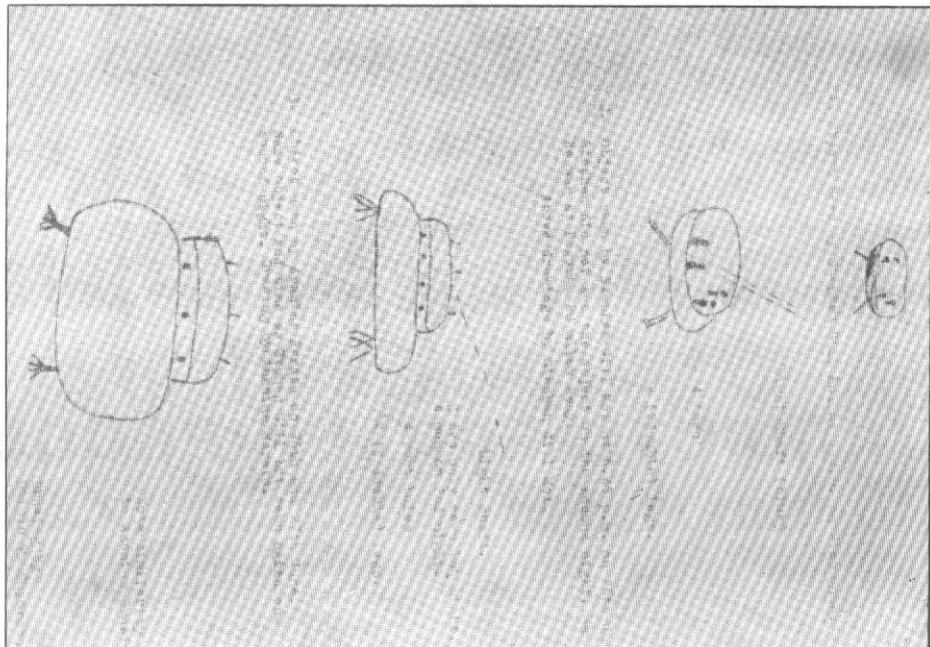

Note the remarkable similarity between the controversial George Adamski photograph and Rev.L.Browning's sketch.

# MERINT RADIOTELEGRAPH PROCEDURE

## 1. WHAT TO REPORT

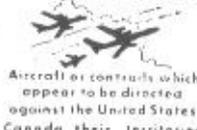

Report immediately all airborne and waterborne objects which appear to be **HOSTILE, SUSPICIOUS** or are **UNIDENTIFIED**.

Guided Missiles

Surface warships positively identified as not U. S. or Canadian

Aircraft or contrails which appear to be directed against the United States, Canada their territories or possessions

Submarines

Unidentified Flying Objects

## 2. SEND TO ANY

United States Naval Radio Station  
 Canadian Naval Radio Station  
 United States Coast Guard Radio Station  
 United States Commercial Radiotelegraph Station  
 Canadian Department of Transport Coastal Station

Receiving station will relay to military destination

## 3. HOW TO SEND

\* MERINT MERINT MERINT (Coastal Station) DE (Own Signal Letters) K (Own Signal Letters) DE (Coastal Station) K  
 EMERGENCY (For U. S. or Canadian Naval or Coast Guard Radio Stations) or  
 RAPID US GOVT COLLECT (For U. S. Commercial Coastal Stations) or  
 RUSH COLLECT (For Canadian Dept of Transport Coastal Stations)

## 4. SEND TO ONE DESTINATION

ComAsDeFarLant Norway  
 ComWestSeaFron Navy Sfran  
 NavyCharge Halifax  
 NavyCharge Esquimalt

Select destination nearest to your receiving station

## 5. SEND THIS KIND OF MESSAGE

Content—

- Begin your message with the word "MERINT"
- Give the reporting ship's name and signal letters
- Describe briefly the objects sighted
- Give ship's position when objects are sighted, also TIME and DATE
- If objects are airborne, estimate altitude as "low", "medium", "high"
- Give direction of travel of sighted objects
- Estimate and give speed of sighted objects
- Describe condition of sea and weather
- Give other significant information

Example—

MERINT  
 SS TOLOA  
 WHDR  
 TWO UNIDENTIFIED SURFACED  
 SUBMARINES  
 5034N 4012W  
 071430 GMT  
 (not applicable)  
 HEADING 270 DEGREES  
 15 KNOTS  
 SEA CALM  
 ELONGATED CONNING TOWERS

## 6. SEND IMMEDIATELY

- DO NOT DELAY YOUR REPORT DUE TO LACK OF INFORMATION
- EVERY EFFORT SHOULD BE MADE TO OBTAIN ACKNOWLEDGMENT FROM RECEIVING STATION THAT MESSAGE HAS BEEN RECEIVED.

\* The International urgency signal (XXX XXX XXX) may be used as an alternate to clear circuit.

Authorized by Secretary of the Navy

OPNAV 94-P-38

*O poster acima e usado nas Salas de Rádio e Pontes de Comando dos navios da armada norte-americana. Note-se o desenho para caracterizar um avistamento de U.F.O. Existem, também, instruções para repassar as informações aos comandos navais em terra dos Estados Unidos e Canadá.*

We would like to dedicate this Bulletin in reverence to Dr. João Martins, an engeneer by study and today one of the leading editors in one of the biggest (if not the biggest) Southamerican weekly magazine "O Cruzeiro" of Rio de Janeiro. Joao Martins well may be the man, who, in the world, has personally, gathered the largest and most interesting material in matters of Flying Saucer research, but in any case is he (and will remain) the brasilian pioneer in this matter, even so we may not agree sometimes, with some of his points of view about the F.S. matter.

\*\*\* \*\*

EXPLICATIONS TO THE PHOTOGRAPHS, SKETCHES AND REPRODUCTIONS on page 1 and 2, related to 4 Flying Saucer (F.S.) reports.

1. report - (reported earlier in SBEDV nr. 10 Bull) - related to the case of Helio Aguiar, a 32 year old clerk (at the time of the O Cruzeiro's report), of the Banco Economico of Salvador (state of Bahia) as related by reporter Dr. Joao Martins in O CRUZEIRO, Rio, June, 13, 1959 (by curtesy of "O Cruzeiro") now in sort of a SBEDV sumery, with some reproductions of photographs of the F. Saucers (areow pointing to it) and (Helio Aguiar's) sketches as published by O Cruzeiro : Helio Aguiar (photog. 1-a), at April 24, 1959 visited his friend captain Leib Leibovitch (see fotogr. nr. 1-b, Leib together with the priest of the 6. Military Region), at the headquarters of the 6. Mil. Region, since the latter had got orders to leave Salvador for transference to another town (São Paulo) of the country. Still to look after some personal objects, the captain, lent out his motorcycle to Helio, who liked to take a ride on it, and also would do some business of his own, that is, taking some snapshots with his camara (after having taken picture 1-b, mentioned above) of some relatives, living in a distant district of the town. On his way back, along the pretty Ave. Otávio Mangabeira, built besides the beach and the ocean on one and cocconut palms on the other side, he saw in the sky, way out over the ocean, a speck, he first identified as a defect of his eyesight (since Helio is wearing thick eye glasses). The spot at the mean while increased, approached and took the form of a flat disc, when the cycle failed and came to a stop. He saw hemishperes and some dark signs (symbols?) on its undersurface and since he got a good view of it, he also made a good sketch of it, afterwards (1-e), in corresponding to the enlargement (1-d) of the correspondent photograph (1-c) of the disc, since by now, Helio succeeded in taking 3 photographs of the flying disc with his (Flexaret) camara (on an Agfa, Isopan Film).

The Saucer in the following moments, turned in sort of a loop, showing then its upper side to Helio, also with signs on it (he couldn't after wards remember), and a cupula, with openings (ports or openings for means of the Saucer propulsion??) on its base (see photograph nr. 1-f and the sketch later done by Helio, 1-g) with parallel tubes also parting from it. The object was of silvery colour. When taking the 3rd. picture Helio began to feel sort of a pressure on his head, got an urge to write something, but lost consciousness, when setting the film of his camara for the next picture and even so he couldn't remember after wards to have taken a forth Saucer picture (with the Saucer far away, seen only as a small ball in the sky), this 4th. picture of the Saucer showed up. later on, when the film had been processed. When Helio regained his consciousness, he found himself inclined over the bicycle, holding in his right hand a pencil and in his left one, a piece of paper, which had been moments before in his pocket, with some design on one side of it for a children's (his own ones) game, but which now had on the (supposed) unwritten side, a new handwriting, apparently executed by Helio himself (see 1-h), which said : "Atomic (explosions) experiences for warfar should cease definitely. The balance of the Universe is at stake. We are watching and ready to interfere."

Helio much impressed, but still in doubt about his astonishing experience, went straight back to military headquarters, where he got reach of Captain Leib, who took together with him to the teacher Ismael Barros, at the district of "Saude", to accomplish the processing of Helio's film. Ten pictures of the film had been exposed by the following way: The first picture with persons of the military headquarters, Leib and the priest of the military Reg. (see 1-b). The second to the sixth picture showed the relatives of Helio. The seventh to the mineth picture showed the 3 phases of the Flying Saucer, but there was still a tenth Saucer picture (described above), Helio couldn't remember when he had taken it. When

later on, an analysis was made of the film, it was disclosed that the processing of the film had been in an exaggerated way, so that the film became "hard" and got a bulky grain. No discrepancy could be found in relation to the real position of the sun at the specific day and hour and that one picked up in the picture by the shadows it was showing.

Also on the negatives no straw could be found. Since military headquarter's personal were involved, a probing was done in the past and the personality of Helio Aguiar, who showed to be a man full of honesty and above any suspicion and Helio refused steadfastly any money offerings in relation to the photographs, even the selling to a foreign power (told to us personally by one of the research personal involved), but for information and evaluation for future contacts and those of the past, it may be said, that Helio, together with some of his friends had succeeded in some attempts of exercises as hypnosis and thought transmission. Graphologist opinated that the handwriting was Helio's own one, but showing emotional stress.

\*\*\* \*\*  
CIPEX e GENA

Picture nr. 2 represents page nr. 2 of "Australian Flying Saucer Review" February 1961 Bull. (P.O. Box 32, Toorak, Melbourne, Victoria, Australia) referring to the sighting of Rev. Lionel Browning, an Anglican minister and Tasmanian Secretary of the World Council of Churches. He and his wife, at 8.10 P.M., on Oct. 4, 1960, observed for 2 minutes a silent, strange cigar shaped, airborne craft, with 4 vertical bands and a moving device on its bow, similar to a radar or a propeller. "First we saw a large dull-grey object about 300 feet long, it came at plane stalling speed (50 m.p.h.) and seemed to pause (for 30 seconds)..then out of the clouds above and behind the ship, five or six small discs (aprox. 30 feet across, flat underneath with a dome on top) came shooting at terrific speed... (later came towards the ship like flat stones skipping along water". The mother ship as well as the smaller craft reversed their course and disappeared in the clouds. The clergyman and his wife were reticent about releasing this sighting until they heard of other local residents' reports (evidently referring to Mrs. Doris Bransden of Cressy who said: "It was a fantastic sight-like a lot of little ships flocking around a bigger one."). Two hours after the sighting loud explosions took place in the locality. Still "A.F.S.R." Bulletin of July 1961, adds in reference to Mr. Browning quotations that: "he had reliable people to back his report and the Air Force knew the people and their stories.:" "A woman and her daughter saw a cigar shaped object flying about 300 feet above the ground about 4.30 p.m., 10 days after I saw the flying objects. It was not reported in the press, because the family did not want the publicity, but the Air Force investigators spent considerable time with the woman and her daughter"... After the investigation the woman and daughter were told (by the Air Force) not to talk about what they had seen, he said. Australian Flying Saucer Bulletin called yet the attention to the similarity of G. Adamski's telescopic picture ("mothership releasing scouts") made times before, at Nov. 1952, by G. Adamski. The next report below (nr. 3) makes Adamski's contact case still more reliable in spite that some persons still insist that "contact cases never should be published...." (since many similar cases could corroborate the case of George Adamski and so begin to take influence on our present Flying Saucer contact picture...)

\*\*\* \*\*

Nr. 3 is reproducing page 5 from "Flying Saucer Review", (London, 1 Doughty Street, London W.C.-1 Engl.) Bull. Nov. Dec. 1960 referring to the following quotations of the text of Revd. N.E.G. Ruttwell: "When the Revd. William B. Gill of the Anglican Mission, Boianai in South East Papua, reported that on June 26 and 27, 1969 he had seen a "Flying Saucer" hovering over his Mission Station with men on it (on the Saucer), who waved to him, ... the report created a sensation because it was reported by a clergyman who was presumably unlikely to be a liar..however, the evidence for the objects over Boianai does not rest on Fr. Gill's word alone. It was seen by at least 38 Papuan witnesses. ...but...I have also seen most of the Papuan witnesses and have asked the most intelligent of them (all Mission teachers) to draw (see sketches of nr 3) what they saw on that fateful evening. Each drawing was done independently and without the knowledge of the other or of Fr. Gill.. The drawings differ in detail, but agree in all essentials. This is what one would expect of a

true happening. ...All the drawings (and the accounts) agree that the machine was round, had two decks, legs, a shaft of light and that four men appeared (though not all at the same time). ...there was some disagreement as to the number of legs."

CIPEX e GENA  
\*\*\* \*\*

Nr. 4 - Sketch of a cigar shaped "mother" ship, as seen on Nov. 1952 at Desert Center (California) by (archeology) Prof. George Hunt Williamson and showed by him in a sketch to the SBEDV Rio de Janeiro F. Saucer research group, on Williamson's 1958 Brasil trip (SBEDV nr. 5 Bull, Sept. 58, read also below about Williamson's recent trip to Japan). To Williamson's sketch we would like to make the following 4 comments:

- a- it was called "mother" ship since it discharged a small round Saucer (denominated later by G. Adamski as a "scout"). The cigar shaped ship, as well as the Saucer were seen further on by 5 other (later on sworn) witnesses (besides Williamson), who also saw the following meeting between G. Adamski and a man, who beyond doubt had stepped out of the round "scout" which could be seen hovering between the rocks by the whole group of witnesses.
- b- if the "cigar shaped ship" which appeared at Desert Center spoke strongly in favour of Adamski's earlier (telescope) photographs of a "mothership discharging 5 to 6 Flying Saucers", then Revd. Browning's sighting (his wife's, his neighbours' and other witness' sighting at Australia on other dates) of a "cigar shaped mothership with Flying Saucers around it" as showed above (picture nr. 2) still enforces the sighting of Williamson and G. Adamski and his group on an earlier date (Nov. 1952).
- c- if we consider Revd. Gill's report about the 4 men on the deck of the Flying Saucer who at one moment were waving arms to the group of numerous witnesses standing on the ground, then G.A.'s Desert Center contact with the crew member who by gestures and signs tried to get with him in an exchange of thoughts, still gets new credit. Even the statement of witness Williamson about the stature of the crew member in disagreement with G.A. since Williamson was saying that the Saucer man was somewhat smaller as G. A's stature (seen by him perfectly in the dry clear desert air, even at a distance of 2 miles away) when G.A' made the statement that the man was equal to his (G.A's) stature even this little disagreement does not nullify the truth about the meeting of a californian and a saucer crew member, as seen also by the group of 6 (sworn) witnesses, at a distance of 2 miles.
- d- One shouldn't wonder about the mental block that hinders some personal to follow our logical reasoning as exposed above, but it blends perfectly with the planned ridicule and incredulity, which still involves the Saucer problem, by means and reasons as showed above in report n° 1 and its message and below at the following pages. For this reason we support wholeheartedly all people who favour the publication of the "CONTACT CASES" specially when those have witnesses, even if the cases should have been only a "visual contact" seen from a certain distance.

\*\*\* \*\*  
\*\*\*

SUMMARY OF THE PRESENT STATE OF SECRECY ABOUT UFO'S (FLYING SAUCERS) (\*...)

Intrigue and secrecy:

It's regrettable that the world press has shed only ridicule on Ufo (Flying Saucer) events, the most saying about it that the subject was a controversial one. Otherwise got well documented Ufo events which spoke in favour of an interplanetary or interstellar origin of those ships, never the ear of the press (with laudable exception of some of the local presses as of the Brazilian for ex.). The words of the Brazilian navy staff that the 4 photographs of the luminous speedy Flying Saucer (F.S.) taken at

(\*...) The bluntness of the report (always mentioning the sources and dates) may be the base for a clean open approach, of the problem and therefore our friends may get no hard feelings.

island the Trindade (Jan.1958) from the deck of the Brazilian midship schooling trainer "Almirante Saldanha da Gama" (witnessed by aprox. 50 people, incl. officers, on its deck) were not faked ones (O Globo Febr. 24, 1958), were never published by the world press. Also it was not published that the press was not allowed to go on board the ship after the event (O GLOBO, Febr. 22, 58), so as to interview its crew and get to know some interesting details about the event, so as the stoppage of the machines of the cargo gear at the approach of the strange craft, when also the compass

and the radio went dead. ( ..read also.. SEEDV Bull No 4 and 16, 23) and it may be true that all the event would have been kept burried in secrecy for ever and ever...if the President of the Republic hadn't taken the resolution to free the photographs to some reporter. F.S. would fast leave the smell of controversy and their planet. origin would get new favour if the airforce high officers would stand up and come out with the evidence, which they gathered in 1954 in the south (brasil.) airforce base of Gravatai, when several F.Saucers cruised over that base with incredible (for earthen aspects) tecnicall performances when for ex. one F.S. was clocked when moving 2000 m. in one second from a stand stile hovering position, showing an acceleration (Bull. 18) of 250 g when our pilots can't stand more than 20 or at most 30 g (also intolerable for the material of our conventional airplanes).

Also the analysis (1954) of the Campinas (São Paulo, Brasil) tin sample and the Ubatuba (São Paulo) magnesium, never got the ear of the press in respect of their absolute purity and different (from corresp. earthen samples) density, may be caused also by lack of a sufficient backing in front of the public by the professionals who did the analysis (or did them not do thoroughly enough due to our present technical resources).

The USA Airforce, (pointed out by the press as the diligent authorized Flying Saucer research bureau) stated recently (Jan.1960) in its "Fact Sheet" that it "has found no evidence to confirm the existence of ..Flying Saucers as interplanetary or interstellar spaceships.. after 13 years (of search)" and adds (page 4, it. 4) there is "no evidence that those Unidentified Sishtings are a threat to the security of the (USA) country".

The USA Navy, otherwise, orders "Merint" charts to be put on bridges and chart rooms of ships, so as to know on "what and how to report" and two Flying Saucers (Ufos) are reproduced on this chart, one disc like the other batlike with portholes along its side (see cutting on page 1).

Also author D.Kehoe's remark (\*\*) in his book "Flying Saucer Conspiracy" mentions that military releases about Flying Saucers (or Ufos) mentioned (by name of Ufo) in chapter 2, sect. I, #201-1(b) of the Airforce's Janap, 146(B) Sept. 51, are put under the "spionage law", so that (military) may report about a Flying S. only through official channels and with official permission (so very often not given or in some cases twisted so as not to reveal the true facts). About the regulation of a release to the press by the USA Airforce about an Ufo event (Ufob, Aug. 12, 1954) "it may inform only ...when (the object is) identified as a familiar (one) as for a bird, balloon, meteor etc etc..but when) the object is not explainable (as a familiar one), only (it will be reported) that.. ""AIRSPACE TECHNICAL INTELLIGENCE CENTER (ATIC)..will analyze the data (which later) will be released (by the Airforce)..". Electrical (phenomen) reports in relation to UFO's "will be multiple addressed (amongst others) to ..Director of Intelligence Headquarters, USAF, Washington 25, D.C. "and by Janap 146(B) Dec.1953, it. 206, Sect. Ichapt.2, also to Secretary of Defense (Washington) gets a report, .."who will transmit copies to ..the CIA (Central Intelligence Agency) and other appropriate agencies..". The exchange of F.Saucer information between the USA Navy attache in Brazil and the Brazilian Commander José Geraldo Brandão (as mentioned by Tribuna da Imprensa, Rio, Dec. 6, 57) may be regulated by art. 215, Chap. II of Janap 146(B) Sept. 1951 (Saucer news from foreign countries).

Once in a while, even the world press (Deutsche Zeitung, Aug. 24, 61) mentions the "withholding of important information by USA (and other countries') secret services, about Ufos and their origin", as apparently someone was complaining about at the Internat. Congress of Astronautics.

Scarcely a government agency would take the risk to deny or ridicule Flying Saucers, if beforehand it was known that those would (or could) start a campaign of

(\*\*) - By curtosey of Mrs. Gladys Fusaro, Rt. 3, Box 223, Huntington, L.I. (N.Y.) --U.S.A.--

publicity so to impress, to invade or even to put pressure on us. Civilians and even military people may have got to the conclusion that this was not the case, since Flying S's approach has been rather timid, apparently out of a respect for the free will of earthen communities or the governments they are represented by, as this also may have been expressed by direct contacts at civilian level (SBEDV Bull. nr. 4, 23), which by analogy may have happened also on military level, even when this has been constantly and sternly denied. In favour of the veracity of those contacts between Saucer crews and eventual incidental earthen bystanders at a Saucer landing have been the reports of a New Guinean priest who saw (together with other people) on deck of a hovering F.S. 4 human figures who winked back to them (see text and fig. nr. 3 on page 2). Also the sketch done by another priest (see text and sketch nr. 2 page 2) who witnessed at Australia together with his wife the launching and recollection of some scouts by a cigar shaped mother ship in striking similarity as this had been photographed earlier by G. Adamski who later got his famous personal contact (and therefore has been much fought for). Fortunately for the contacts and the so-called contactees (read about that of a Bras. judge in Bull. nº 4 and 22/23) it may be mentioned that in most countries, where landings of Saucers had been observed, (sometimes scorching the ground or leaving traces on the grass, read also statistics of 1957, 1958, bull. nr. 8), also in some rare cases human figures could be observed outside their crafts or on the deck of those as this has happened also in Brazil (read also SBEDV bull. nr. 8, 14, 15, 16, 17). What still creates so much confusion in the minds of the naive bystander is the intense diffusion of some bad rumours, putting Ufos as a pure psychic or religious cult or "belief" or as space animals, inside the earth dwellers (Deros), connected to existence of highly questionable characters as: mermaids, sea-serpents, Loch-monsters; classifying the contacts still as a Hollywood joke. Even if this confusion and rumour mongering is not done all by purpose, one must confess, that it will benefit the secrecy of the military (\*) since it gives a blurred picture keeping the matter a confidential one to a small group of insiders (who know about the artificial confusion around it).

Some of the civilian research personnel of long standing and best records consider the Ufo research also a confidential matter as for ex. Brazil's "Confidential Ufo Research Committee" an "ad hoc committee" of the São Paulo branch of the Internat. Interplanetary Society". One of its prominent members, Dr. Escobar Faria, also an advisor to Washington's Nicap Ufo research Committee (\*\*), discloses the confidential nature of the Brazilian committee (on page 7 and 8 of his book "Discos Voadores"), mentioning still its military members with names impossible to disclose and even a contact man for a secret military service. Nicap 1536 Connecticut Av. N.W. Washington DC, with its President Major D. Kehoe, has the biggest merit in undisclosed explaining away and debunking of Ufo truth by the USAF, but even so its information in this matter have been the biggest and the best, and it has 200 members of the armed forces, 5 high ranking USAF officers and an ex-Director of the secret service (CIA), even so we can't agree that the Airforce should be the culprit, since it's only an executive branch of the Defense Department and the White House (\*\*\*) and also the Legislative seems to favor secrecy as stated by Nicap (Ufo Informer, July-Aug. 61)

CIPEX e GENA

- (\*) - Military agencies also could justify secrecy so as to hide the weakness in regard to controlling those interplanetary crafts, which in so far, at their turn have proved that they are able to control us, as the following quotations of Dr. Olavo Fontes M.D. (from Ray Palmer "Flying Saucers" Febr. 61, pg. 54) prove this: "...those fast moving objects chasing the guided missiles (from Cape Canaveral) were real too.. (and) sighted by every person at Fernando Noronha.. sometimes (coming) in pairs, ..in whole formation.. following the rocket ..during the whole tracking course.. (or) changed course.. and a few even stopped for a time over the island.. most were round shaped.. began to appear over the island almost at regular intervals as if patrolling the area.." (Fernando Noronha is a Brazilian island)
- (\*\*) - Also recently (Correio da Manhã, Jan. 3, 62) appointed for membership of the Sociedade Brasileira de Direito Aeronáutico (Airforce Ministry Bld. 12. floor, Ave. M. Camara, Rio de Janeiro).
- (\*\*\*) - "National Security Council (NSC) must play a leading role in shaping (Ufo) policy.. summing up important developments for the White House". (from Nicap's (Jan. 1959) article "N.S.C. evades Ufo question".

since Congress Chairm. for Science and Astronautics Committee, the late (\*) Mr. Brooks and repres. McCormack "...fear public sessions (since an open congressional Ufo inquiry) might contribute to national uneasiness" (\*\*)

The moral background of our time:

Without any doubt the latter is connected to Ufo's secrecy which is influenced by the philosophy of our present earthen goals, at least to those circles which have the reins of our present governments. Nevertheless two meals daily and a good human relationship, should be sufficient for human happiness, this apparently doesn't happen at the present. The responsibility for this matter of affair has to be considered a common one, since it may have come down from our fathers and grandfathers, who adhered to the christian ideology of ofhelp and sincerety to the neighbour, respecting his human dignity independent of his religious, political creed, skin colour, muscular, mental or financial strength, but in fact we may have given only lipservice to those promises, since we bless our mass killings, put strings on our help or strangle by "sound competition". The way out of our inconsistency is difficult since by the potent brainwashing we are exposed (\*\*\*) it may difficult for the man of the street to see the truth, since he has lost his "liberty of beine informed about the truth". Already we may have seen the offspring of our insincerety in the hostile governments that have stood up in some countries against our conventional phylosophy and the turmoil that's on in some continents, by the same reason. Sparks of light may come from some countries which still may have maintained some independence in thinking and reasoning and the idea of "diplomacy of truth" (Jornal do Brasil, Nov. 19, 61) from a foreign minister and the idea of abolition of toys of war by a congress representative (Correio da Manhã, Nov. 23, 61) may be sparks of hope (\*\*\*\*). Also on Texas University (adminstr. Bld) one reads "Ye shall know the truth and truth shall nake you free" (Time M. Nov. 10, 61) it seems us still a long way to come to a stop of Ufo secrecy or terror acts as those described in G. Baker's book "they know too much about Ufos" or in R. Schmidt's Kearney incident.

CIPEX e GENA

The way out of Ufo secrecy is twofold:

Coherent with our present earthen tendency still more megatonic threats, stinking untruth and silencing may get piled up mutually by the big powers, until this may cause our long silence and big stench, when our bloated corpses should decay one day, unburied, after final atomic holocaust (\*\*\*\*\*). The other way out of our present situation of Ufo silence would be represented by a gradual and insensible decaying of the prestige of the present leaders and conventions, as this may have been will expressed by Nigeria's U.N. representative (Time M. Oct. 20, 61) when he stated: " I an

- (\*) - Now substituted by democrat repres. (Cal) George P. Miller (New York Times, Sept. 17, 61, by curtesy of Mrs. Gladys Fussaro).
- (\*\*) - Unsaid but meaning that conventional economical military or political commodities may be at stake, taking even not the ris to "identify those Flying Objects" in front of the public.
- (\*\*\*) - A. Berle calls our attention to the propaganda (Ultima Hora - Rio, Oct. 25, O Globo, Nov. 16, 61) we are exposed and in countries with the so called strong governments, with propaganda and information ministries, this may still be worse.
- (\*\*\*\*) - Also Edward Murrow, Director of the off. USA Inform. Agency, (Jornal do Brasil Oct. 17, 61) may give a new meaning to the known slogan "democracy for all" and "champion of liberty", since he and Rob. Kennedy call our attention to the dangerous extreme rightists in USA, called superpatriots, who incur in condemnable activities with intermingling of the military in politics and spying on neighbour (countries), (and are) as dangerous as communists.
- (\*\*\*\*\*) - By irony, contactee hating Time M (reports (Febr. 14, 55; Oct. 25, 54; Dec. 1, 58; June 1, 59; etc.) in "Advice from Space" (Time M. Dec. 29, 61, chap. science) about astronomer von Hoerner (who) feels..man's best hope of avoiding disaster (of self-destruction).. to listen hard for radioed advice.. (from starry space) perhaps.. an old wise civilisation.. is trying to warn the callow earth against the mistakes.."

losing confidence in our great powers..they are(falling) climbing (down) from the pedestal of greatness to the pedestal of insanity.." If this trend should continue, we well one day in the future could awaken and see that the legs of clay of "our Fuhrers" crumble as this already may have happened once or more in our past.

Then, new leaders could start for new solutions (\*), nevermore excluding truth..... or secluding it from their fellowman.

\*\*\* \*\*

MISCELLANEOUS: Letter to the Editor and other Bull.: SBEDV thanks Space-viewer, Saucer Space and Science and Flying Saucer Review, London (and others) for getting a mentioning. SBEDV also thanks all Xmas greetings, including "Disc Digest's" Mr. Keukenmeester and agrees with Lucy MacGinnis xmas plea: "reason with one another, but never sit in judgement against anyone..it's easier said than done". At Nov.12,61 she kindly wrote us"..won't be too long..to reach the Moon (Mars,Venus...)..many things will be proved.." SBEDV editor thinks we would be naive not to admit that astronauts have been, are and will be under strict control of the "silent" airforce. Not so are the civilian contactees who have still the liberty to speak up. Is that right, Lucy? - Ronald W.J. Anstee says (Montreal Gazette Oct. 20,61) ".. top authorities are rapidly running short answering questions..plead ignorance..facts..known by all airforces.. (and) many civilian researchers..before we are much older many changes..will take place. - John Lade (Sept. 22,61) says: "..Waveny Girvan (Edit. of F.S.R.) wishes to explore all genuine contact stories because -since the Space Visitor do not give us the information we want-he feels it can best be obtained from those who have met them..We do not understand why the Space People do not give information about themselves to those who wish to publish facts about them: that is to people like yourself and ourselves.." -Carter Observatory at Wellington replied Henk Hinfelaar in New Zealand: " ..it so happens that five planets will be grouped in a region of the sky occupied by the Sun at the beginning of Febr. 1962.." J.L.Otley's Orbit (41, Deanham Gardesn, Fenham, Newcastle upon Tyne, 5, Engl.) adds "..twice before there have been just 3 (planets) in such a situation..first..around 575 B.C..when Buddha was transforming the eastern..World..the second 10 B.C. to 30 A.D. when..Christ was transf. the West. World ..five planets at a time has not previously occurred for 25.000 years..on Febr. 5 1962 at 16 min.A.M.GMTin London, Sun and Moon, in complete conjunction, and in eclipse..."

Contacts and Contactees: Even if we should agree about a disagreement in respect credit re contactees we nevertheless should be unisonant about the necessity to publish all those statements (as favoured earlier by Weltraumbote's ed. H. Ragaz) so that everyone can make its own judgement, because amongst adults civilian research personal there is no kindergarten and "owner attitude" necessary, and supposedly there is a loyal exchange, everyone should tell all he knows about contacts, so we get together more pieces for the jigjapuzzle of truth. For this reason we got disappointed that Lufore hasn't published yet the two dozen contact cases it mentions to have on (a secret??) file (Sept.61) and also Washingtons Mrs.Walton Colcord John, Little Listening Post's Editor (4811 Illinois Ave N.W.Washington D.C. ) and G.A's ex-secretary, even so mentioning G.Adamski's Washington (1960) visit, no details about the interview of G.A. by a Senator has been reported by her. - H.Hinfelaar's NZSSR (P.O. Box 7, Henderson-Auckland-New Zealand) sept.-Oct.61 issue, mentions contactee Carol Honey's letter (Oct.7) informing about his latest own contact (having had an earlier one in presence of G. Adamski) at Febr. 61. Also G.A. was turning all..previous work over to him..(as) monthly newsletters.(anounces) fewer but better sightings for the future.." In CBA-Japan, Y.Matsumura gives account of contactee G.H.Williamson's visit to Japan in a Bull.of excellent presentation and with high quality printing and paper. Contactee Williamson who witnessed G.A's Desert Center contact (Nov.1952) at a distance of 2 miles in the clear dry desert air, could well compare the height of both

(\*) - Maharishi Mahesh (4 Albemarle Str,London, W.1, Engl) proposes another solution based on the fact that "..the sum, the mass of ..infinitely small (person. individ.) conflicts.. put together, help to make a total atmosphere of tension and hostility.. it is (therefore) useless and infinitely dangerous to look to governments, politicians and conferences for help in this predicament.

1961 Flying Saucer statistics (contin. to Bull. nr. 22/23 until the end of the year)

nr	date	hour	gr	witnesses com aut.	local	st.	Description	reference
22	Ag 2	19		*	Canindé	Crá	lum.obj.f.speed, desintegr. big flash, shedding lum. particles, sev. explosions heard	O Jrn. - Rio Aug. 9-61
23	7	22.15 till 22.41	*		Rio Compr.	G.	hovering, then moving, football, opaque greenish lum., returned to same spot, after minutes with a sudden orange col. jet it left, leaving a lum. trail	A Mt. - Rio Aug. 7-61
24	Sep 1	night		*	Modena	S.P.	int.lum.obj.at 5000m at s.speed, changing col. between red and green, stopped during 15 min. taking half and hour to go away.	Est. S.P. Sept. 2-61
25	18	-		*	Manaus	Amz.	at great height, hovering reddish obj.then started to make evolutions, desc. and asc. going away at f.speed	O Jrn. - Rio Sept. 19-61
26	22	11		*	São Luis	Mhão	long obj. with evolution at f.speed left white trail, "different from jets."	U.H. - S.P. Sept. 22-61
27	29	-		*	São Luis	Mhão	Obj.asc. and desc. with curious evolutions, leaving brilliant trail, on great height, attempts of airforce base TITICAL to establish contact without result.	O Jrn. - Rio Sept. 30-61
28	Oct 16	19.48	*	*	Maceió	Alg.	in a horiz. flight at 45 degr. from S.E. came to a stop and went away in fraction of seconds (with a reddish col.) seen a week earlier also.	O Jrn. - Rio Oct. 19-61
29	17	22.30		*	Joinville	S.Ct.	thousands saw the "acrobatic" evolutions of the F.S. over the banc "Inco" in midtown so low was the level that the shadow of the craft was seen at the ground. Rays of several col. were projected	Dr.Moite-Rio Oct. 17-61
30	Dec 12			*	Salvador		missile shaped, a multiple of 10 m. long, 2 to 3 m large, leaving a fiery trail, seen by all pop.	Jrn.Cmc.Rec. Dec. 13-61
31	13	22.30	*		Botafogo	G.	seen by binoculars as round obj. with two powerful floodlights, at f.speed great height, silent, seen 3 to 4 min. went to W.	U.H. - Rio Dec. 15-61
32	26	night	*		Ouro Preto	M.G.	brilliant silent obj. changing direction sev. times (dir. E.-W.), course E-W.	Dr.Car.-Rio Dec. 27-61

Eshortened evaluation of 32 cases (see also Bull.22/23): F.L.S. seen by authorities-7, whole towns or whole communities-11, pilots-3; at the 3 evening hours (6-9 PM)-9, at nighttime-10, daytime-4; starlike-3, intense brilliant-4, only luminous-3, reddish-1, greenish-1, changing from red to green to red-1, orange-1, metallic-1; with trail (5), this being white (1), fiery (1), brilliant (1), smoky (2); round shape-5, oval or disqueshape-2, elongated or cigar shaped-3; stopped and hovered in midair-5, with an irregular course, ascending and descending, with alternating speed or evolutions-8; all S. were silent as a curiosities in one case a desintegration was followed by several explosions. Of the F.S. behaviour in relationship to attempts of contacts with our civilisation: attempts of an airbase to establish contact with the Saucer-1 case; F.S. accompanying airplane showing acrobacies (case 19 and 21); approaching people, cars and authorities on a roadblock during a long interval-case 20; evolutions at low height over a town so that the shadow of the Saucer is projected on the streets and on people that are looking up to it-case 29; two potent searchlights were seen on a high flying roundshaped F.S.-case 31.

\* \* \*

F.S.visits to other Southamerican countries: Argentina between Villa Mercedes and San Luis (Aug.10,61), Mar del Plata (Oct. 26, 61), Baia Blanca (Oct. 30, 61). Uruguai at Pocitos and Carrasco the F.S. was seen, from ground and the same accompanied an airplane for 40 minutes, constantly changing colours (Dec. 20, 61).

(cont. pag.9)

men, the Saucer crew man and G.A., and also described for the SBEDV Rio group (on his visit to Brazil) the aspect of the mothership which discharged later the scout (see sketch nr. 4 on page 2) Contactee Williamson seems the only person who has been respected by contactee vowers and contactee foes alike, permitted to "go between" and cross the lines since he has been well received by the confidential (\*) research group here in Brasil that until now has ridiculed always Adamski. (\*\*)

How to report: Nicap, a selected group, which pretends unbiased and careful reporting, left us a bit disappointed about Revd. Gill's Bonai (visual contact, June,1959) when

(\*) - One of its prominent members, pilot Aurifebus Simões had his guest contactee Prof. Williamson invited for a several day flight to see Saucer activity at the brasilian hinterland. Simões is one of the best known researchers in South America and has also friends and helpers in the field of Flying Saucer research all over the World being quoted by him as his helpers, amongst others, the following reknown research personalities (in his book "Discos Voadores"); Y. Matsumura (Jap.), Gene Duplantier (Canadá), H.H. Fulton (New-Zealand), A.D.Mebane, Idabel Epperson, Isabel Davis, Ted Bloecher, Ivan Sanderson, Hans Stefan Santesson (U.S.A.), Dr. Escobar Faria, Dr. Olavo Fontes (Brasil), David Wightman (England). The latter praised (Ufo Forum Nov. 61) Ufo research done by the Air Force, which can't be avaluated, as we all know, since that agency works on a "confidential or secret base". Since the Forum's David Jones apparently endorsed Mr.Wightman, SBEDV asks the David's if they would agree to draw a fonce between ATIC'S Ufo research and that done by uncommitted civilians ??

(\*\*)- see page 12

still at Nov it told "...a complete report will be made..if justified.." this apparently has not been the case, even 8 months after (March 1960) without a complete report but telling (amongst others) "...we can not make final evaluation..". We all hope that in due time it will be possible for Nicap to make those evaluations finally.

Quoting Otley's "Orbit": "...somewhere in the (contact) claims lies the answer to the F.S. riddle and man's apocalyptic problems. If it is true that those problems have been overcome on other planets, it is time we called in the experts" (adds SBEDV Ed.: or at least left F.S., their landings, their contacts and contactees unbothered). A friend of ours, before a trip to another country wrote us worried (a round letter) "...I will be inside (the reach of) the Silence group. If something happens to me you all know why ..." when he really doesn't need to get worried, since we think, nobody in a shaky world would be so silly as to "sow winds", and Baker's (They knew too much about F.S.) book may have been grossly exaggerating for publicity purpose, remembering also his tales about Deros and Teros.---- SBEDV member Jose Alencar-rua Gen. Glicerio 144 apt. 203 (Laranjeiras) Rio de Janeiro (E G), Brasil, would like to get news from Frau Luise Eschig - Salzburg (a busy bee, besides D.Bauer and Linzer group in Austria) and also from Buck Nelson, he had sent a letter to (with a check enclosed to the latter).--

Last hour mail: We reply Xmas greetings from Ronald W.G.Anstee, a clear seeing man (read above) and thank the gift from Ed Sievers (P.O. Box 1953 Pretoria, South-Africa) sending us back a wanted back number of SBEDV nr. 1 (besides nr. 5) and we hope that he edits in a booklet some of his ideas as brought forward here (some quotations): "...very much doubt whether there is an organised movement working with a "silence program", other than perhaps the...; the more we ignore them as a group (but not anybody's thuggery ...; break through (in Ufology) will not be done so for a long time yet...considering authorities..they are unable to act because honesty would compel them to abdicate..or undergo a complete transformation at once...(their moto) "let sleeping dogs lie undisturbed as long as possible";..(the) common man:..saucers and space people are as yet of ...no practical consequence to him..still remote..(about the approach by Saucer's crew): no bullying, no conquering-just patient...assistance... natural process of unfoldment..(not concerned)...for the individual mind..but..general growth of all minds, incredible slow as it may be..; (about the research done about a questionable contact): there is not one of us who does not appreciate what you have done anyway in effort and time spent!"

New F.S. book "Plantenmenschen besuchen unsere Erde" (F.S. crews visit our earth) (Ventla Verlag) bei Karl Veit (and his wife), Wiesbaden-Schierstein, Postfach 17185, Germany, with its 223 pages and 47 pages of photographic (353 of it) reproduction of Ufo material and other related to it, well may be named the first ENCYCLOPEDIA of Ufology, written with german "Gründlichkeit", since it contains all the important datas related to the development of present Ufology, including even Bibliography and addresses of research Soc., therefore it seems to us that the (relative cheap: 14, Mark 70) book will be useful even to persons that do not master the german language, a bullwork for unbiased, serious Ufo research.

\* \* \*

(\*\*) from page 11:

(it would get understandable that the Prof's G.H.Williamson and Oberth, while being in good relationship to contactees, by the valuable informations they therefore are able to handle, also may be welcomed by the so called "confidential Saucer research committees" and government agencies behind them, thirsty for more S. news).
