SBEDV, exchange nr. 31/35 Bulletin (Editor: W. Buhler
Rua Senador Pedro Velho 50 apart.201 - (Cosme Velho)-Rio de Janeiro-Brazil.

* * * CIPEX e GENA

The portugues edition deals with 2 important works, one is law professor João de Freitas' interview to SBEDV about his FS contact(all-ready published in SBEDV's 22/23 exchange Bull.), the other is Dr. Clavo Fontes M.D. (fig. 19) extensive study of the FS sightings at the brasilian islands of Trindade and Fernando Noronha,already published by Ray Palmer's "Flying Saucers" (30 pages), Amherst-Wisconsin-USA (Febr. 61 edition) and originaly by APRO. We just may remind the reader that we get the impression that twice in the 7 to 8 Trindade FS sightings, previous to the 4 photographs, had the FS succeeded in abducting the radio of the weatherballoon, this in front of military witnesses, working on IGY datas. At Fernando Noronha, apparently trailed the FS, single, in pairs or in groups,the IBCM miss iles, coming in over the island after having startes from Cape Carnaveral.

In doing a little review we have to admit to get excited with the very good comments of a Flying Saucer Review or Orbit.Also the good research done by Bull.(fig.nr. 23, 20 ((credit to Mrs Gladys Fusare, box 223 Route 3, Huntington, L.I., N.-Y., USA)) and engeneers (fig. 21) are apt to stimulate, as well as the interesting remarks of Ronald W.C. Anstee (aug. 23,62) q229 Verville, Montreal, Quebec, Canada:

"..The fact that some parts of the world get extensive study by the space people, would indicate something of special importance in these areas.. mineral wealth, living standards, magn.-elect. cond., variety of radiation fall out, diff. earth people, relations of diff. races to some interplan. origine..?/ "___ Mr. H.C. Peterson, July, 63 (Denmark):

"..we fight for the truth G. Adamski has been asked to bring to the world..if we unify we are a tremendour power.."-Mr.John Lade, Aug. 23,62.(Yaldham Manor, Kemsing, Kent, England): "..Nicap are, as you rightly say, trying hard to be respectable and they are afraid of our policy;nevertheless, we are trying to be friends with them and I have written to their Secretary, Mr. Ricard Hall, to explain that we do not intend our controversy to be destructive criticism. We use controversy to stir up public opinion because we are after the public as subscribers and we are not influenced by what our Government may think-if, indeed, they think about it at all... " (uquote)

We call the attention of our reader that Mr.Lade is evidently refering to Washington's D.C. NICAP (Connecticut Ave. 1536. N.W.) "Ufo Informer, which in so far has rather expressed a Government line of silence in regard to "space crews and the contact cases". Not so the more liberal Nicap "Ufo Reporter" published by R. J. Gribble (5108 South Findlay Street Seattle 18, Wash.-USA) which is fast getting one of the 3 good USA Bull. (the others: APRO, and Honey's Newsletter.) Quoting of Mr. Gribble's (June 63) paper:".. Sheriff Mountanos..reconstructed the incident like this:". the milker was returning toward the barn, when the machine swiftly came into view and settled to the ground..cattle panicked...Mostaccioli (the witness) saw several small figures get out of the "disc" and walk about..some managed to catch a calf that had been abandoned by its frightened mother and took it into the space machine...Mostaccioli said,..some figures approached him and seemed to beckon to him... but he ran as hard as he could.."

At Europe your SBEDV Editor had also recently the opportunity to attend the FS congress at Mainz (May 22/23,63),organized by Ufo nachrichten's C. Veit (Wiesbaden) where unfortunately the religious and psychic approach in FS had strong and numerous defenders.It seems to SBEDV Editor That

groups should work over the local ufo research results, by personal local interviews, so to screen out psychic stories and those mongered for confusion by the silence group, leaving for publishing only the concrete truth, since for "objective" scientific truth only should be the goal of concrete civilian Ufo research... non sectarian and not psychic. Is that clear?

Government circles now begin to confess the importance of "space life" (Contacts? FSs?) And NASA got a 263 million dol. US appropriation (*-2) "...to expedite to Space Life search," (Ufo Informer, Jan-Apr.63), and is referring to "...Space travelers, that may have been abroad last autumn..." (*-3). Space, Science Board (SSB*-3) thinks that"... exploring extra-terrestrial life should be top priority..." (*-5).

Recently, FS research personal hold its breath, when the meeting of the (late) Pope John XXIII was scheduled with Pres. Kennedy, since the Pope defended (in his Pace in Terris see figure) "...the right of earth-herman man, to be informed truthfully about public events." (SBEDV Edit.: un-manged news would include also FS news now under the Spionage law *-8). Unfortunately was the meeting between John's successor, the Pope Paul VI, rather a secretive one, (Der Blick-Swith., July 3,63) with only 10 persons of Kennedy's entourage, during 18 min. (Time, Luly 12,63), including White House staffers McGeorge Bundy and prof. Ted Sorensen.

The Flying Saucer Review-of London (FSR-May June 63) threw wide open the Government FS "news conditioning" when transcribing the desmond Leslie (reknown FS research pers.) -Mr George Ward (then the Secretary of the english Airministry) phone talk about the West Malling incident (FSR Jan.55), when a balloon-shaped object, seen at the radar and directly visually, traveled at the very fast speed of 800 miles an hour. Went the talk of Mr. Ward: "...What am I to say? I know it wasn't a balleon. You (Leslie) know it wasn't a balloon. But until I've get on the ground in Hyde Park a (Flying) Saucer and can charge the public 6d a go to enter, it must be..... balloons, otherwise the Government would fall and I'd lose my job." (*-9)

A joker (*-10) is semetimes selectes to vehiculate grave news, which may be the case of Art Buchwald's article (credit to G. Adamski in C. Honey's nr. 17, S.P. Newsletter, may 63) about the newly foundes Society Halo (for: Hate Life in Outer space) with money for "a program" to combat all attempts to come to terms with life of outer space ..to censure (*-11) all books on outer space...". Comments G. Adamski: "...this article places (men of earth) as the most outstanding intelligence of His cration..denies God's intelligence...It's time for every sincere person to put their shoulder to the wheel and make the real truth known to the world. I, (George Adamski) as lone man, have done my part with money and energy. What are you (the reader) going to do?".

* * *

(fig. nr. 18.)

- (*-1) SBEDV's Edit. get a warm sincere reception at the home of the Major's family. His group, which excludes psychism and politics is one of the biggest of the world and contactee Adamski got good interviews at his recent europ. trip in good danish papers.
- (*-2) Mr. Belk, friendly, intelligent and jumpy, praised by himself as hypnotist, came to Rio and São Paulo (Brasil) to study ESP, Wodoo and Black Magic together with other scientists for NASA, in connection with the FS problem, after having beeing briefed by NICAP, but ignored the concrete aspects of the FS problem, therefore we make a plea to

furnish NASA, NICAP (Washington) and to the Belk Foundation (1900 North
 by causeway, Miami Beach 41, Florida, USA) the FS Bulletins which
 have rather a scientific and concrete approach

- (*3) Evidently not referring to G.Adamski's Saturn trip, which took place at the second part of March 62.
- (*5) The reason we publish the Professor's and the Decker's works.
- (*8) Pentagon's press secretary (A. Sylvester, Time, Apr. 5,63) "... the (Government) has the inherent right, if necessary to lie to save it self" ..brought indignation: "... A news management policy not only exists, but ..has been enforced..when the USA was not in a war,"(N. Y. Time columnist, A. Krock, Time, March 1,63). "...Managed news with vengeance, is more in the tradition of Dr. Goebbels.." Brucker (fig. n° 13) Am. Newspaper publ. ass. Time, May 3,63). "The Biggest threat to the free information of the northam. nation.." (SIP's John Perry, J. Brasil, March 28,63).
- (*9) Twice government officials mention the possibility of the "cracking" of their respective governments, when the rock of truth for sure would be a firmer base for any institution.
- (*10) Time, Sept. 20,63 calls Art Buchwald (now in Washington) "the most successful humorous columnist in the USA.."
- (*11) The group around Moseley and Baker is already busy in the censor-shop, ridiculing (fig. 17), putting saucer crews as "evil faces" (G. Duplantier), Deros and Teros and monsters (Baker, Bender), as "space-animals" (Trever James), as "nazis" (Ricard Ogden), "Hollywood jokes" (the good doctor Davidson), or psychic (fig. 18)..,NASA's Mr.Belk "dead ones",and misleading book titles,as APRO's" The great Flying Saucer Hear".

English text accompanying the (free for exchange) portugues SBEDV n. 28/30

Bull.

We do not need to get impatient in Ufo research, since our 20 century civilisation advanced another 100 years in the last 20 years and so Ufo eventually will accompany this. Even german papers mentioned the Bah ia Blanca sightings and NWZ Sept.11,62 mentioned a "seltsame Erscheinung" flying with "eckige Bewegungen" dividing in fours. We are also **grateful** for the wonderful exchange we have got from others, as H. Hinfelar, maj. Pe teresen, Gladys Fusaro (Moss hearings), Suzanne Berthand, Ronald Anstee, J. Lade, L. Otley, E. Sievers and the wife-husband team C. Veit, who really "a re on the ball", with their beautiful new editions: "Vilanueva's trip to another planet" translated to german (12,90 Mark) and "Fl.S. have landed" (16,80) which I have enjoyed very much, since so well translated with very good quality editing (C. Veit, Woerthstrasse 5, Wiesbaden-Schierstein- Ger many).

We agree with Carl V. when aluding to the progress ahead: "Noch haben die ersten Kontakte erst begonnen..."

We also may humbly to give our thanks to a farsighted politi cian, a Senate, foreign Commission member, the fist that ever replied to a letter of ours, in a simple but sensible way. May he still achieve some thing in "our" time for better human relations, not only between nations , "hemispheres" and continents...

As to the Biribiry case, excellent reporting allready has been done by the Review (1 Doughty, London W.C.1-Engl.) Nov. Dec 62 and also NZSSR- New Zealand. We only may repeat some of the words of the boy which were not so clear to us: " At the evening (preceeding the sad events of the kidnapping the next morning of his father) after having closed the door of the shack after supper, two of the 3 children were allready sleeping. In half an hour, between 7,30 and 8 h. P.M. the following happened: at the end of the bed a noise like "dragging feet" was heard during moments, but nothing seen. On one of the walls of the house, a tic-tac noise was heard during some moments. A voice was calling outsided for Rivalino, but all got quiet when they opened the door, only a shadow of indefinite form was seen moving in front of the door.

After closing the door, few moments later, a shadow, a **prox. 10** ctm from the ground, of **50 ctm** of height (fig. 2-a) was seen moving in the room, and left for the attic, but it was not understood, how it had en tered or would have left the house. More voices were heard outside the house.. (all this between 7,30 and 8 P.M.). Its understandable that fathers and son wouldn't sleep that night.

THE WORD "INTELLIGENCE" IN UFO RESEARCH

By "INTELLIGENCE" one means the capacity of a mind to select the proper solution for a given problem. In the english language the same word has the meaning of "spy work" and some USA Ufo research Societies got labeled by that word (* - 1). One may also mention by the way, that the two most important USA "intelligence" agencies, that of the "Tecnicl Cen ter of the Airforce" (ATIC) and the "Central Intelligence Agency" (C I A) handle the Flying Saucer (F.S.) or Ufo problem under a "Spionage Law".

So to enforce secrecy about Ufo's, intended to involve it by ridicule, like by coincidence, have sprung up the ridiculous tales, Bulletins and books of "Spaceanimals, Deros, Teros, Ufo-Hollywood and CIA jokes (G. Baker, R.Ogden, Dr. Davidson, T. James etc.), when on the other side the USAF spends 10 000 \$ for each "examined" case. No wonder the confused masses get isolated from the concrete Ufo Problem (*-5) for the benefit of a small reigning and "informed minority", who it seems, has been unable to cope or make up its own mind (*-6) in regard to it during the last 15 years, and ~~try~~ to hide its failure from the broad public, by moving the Ufo problem (and this on both sides of the Iron Curtain), the "iciest" of the cold wars, that of secrecy and silence.

Since our leaders in the rough days of hot and cold wars are selected in regard of their toughness, amongst the military and economic levels, it's understandable that those got no training to cope by "mind and moral" (*-7) with the Ufo problem, since only trained by "might and muscle", to move forward, fast and far.

Even so moved by their own fear and creed, they betitle themselves our "savior and benefactors" in our liberty, but enforce our silence (*-8) by their big propaganda, which drums out by their big economical power (*-9) any thinvoiced criticism (*-10), driving so the unsuspecting masses in any wanted direction, as this would be done by any "Big Brother Watching You", with his flock of sheep.

It's logical that fear and creed may distort a normal human motive of "discretion" to that one of "untruth and secrecy". This well may have happened already at Stone Age, when Neanderthal's hairy chieftain a dwelled in his cave, but also when our dryshaved Brass sits in his formidable bunker with W.C. facilities, even so we begin to analyse and clear our motives and teach so also our children.

Secrecy and silence may be otherwise an "action of delay" of Führer's on their way out, so as this was done "for God's sake" (por lagraça de Dios) at Middle Age by the "gran inquisitators", and recently also in the name of patriotism, to hold on wicked racial privileges and keep away Ufo truth (*-8)

I.Q. "intelligent" people have sensed the Ufo problem the most important one of the last 2000 years, and so work for it good humoured, along with the smarties, "spy-intelligent" ones, which got self-selected as the sole owners of truth, expressed by their secret archives about Ufo material (*-11), thinking that they are made of "better stuff" than the masses of their own nation, religion or race, who are unworth of truth, but only of a fatherly protection so no to get bothered by unworthy worries apt to produce stomach ulcers.

Since all men have the right to the same dignity, each of us may overcome his own shortcomings by own merit, and also the men accountable for Ufo secrecy. The silencers may come to an understanding that truth, so as the waters of a river may not be hold up indefinitely by a dam.

One has to face fate's formidable problems by new audacious solutions.

* * * * *
 * * * *
 * *
 *

(*) We may apologise to Mrs. John and thank LLP for the clipping of Cleveland's radio amateur Bulletin.

(* -1) CSI of N-Y; IIUFO of Oklahoma; OSSIB-Clifton, N.Y;
WSI of W.S. Aho etc etc....

(* -5) Its a pity that economic minded maj. Donald Kehoe from Nicap-Washington neither analysed nor sent back to the proprietor the Eagle River artefact from a F.S. crew member contact. Also the Campinas tin sample (1954) and Ubatuba magnesium (1957) would have deserved double matching analyses by diff. labs. and more publicity, instead so much double talk.

In regard to the Campinas tin sample, later lost in Nicap's lab. drain, Nicap's Charles Maney tells us (F.S.R. May June, 62): "...Lex Mebane concludes that all the samples sent from Brazil are solder (Maney)...solder of various proportions of lead and tin (Maney)...considerable heavier than pure tin (Maney)...did not act like solder with which he was quite familiar (prof. Metz) (Editor's untrained mind follows with difficulty this sort of reasoning...) nevertheless another story has been told by Nicap's brasilian Associate Dr. Escobar Faria, a São Paulo state lawyer, in so far that "...the different density of the Campinas tin (10,3) proved its extraterrestrial origine...". Everybody may check E. Faria's words at page 101 and 102 of his book "DISCOS VOADORES" where he says: "São os Ufo's engenhos fabricados pelo homem? Absolutamente não, porque o nosso estanho marca a densidade 7,3, quando o estanho de seus aparelhos é de 10,3 (análise dos fragmentos de Campinas pelo físico americano Prof. Charles A. Maney do Defiance College, Ohio, por pedido especial do Autor."

(* -6) It would be crazy to justify F.S. secrecy, just because, allegedly some New Yorkers panicked, when actor Orson Wells, some years ago, staged "War of the Worlds" on a N.-Y. broadcasting radio stations. Wouldn't it look a bit silly to forbid us to use fire for cooking, just because some people got burned and panicked in a case of arson.

(* -7) Forty years have passed, when only recently, by the generosity of a spiritual leader, Pope João XXIII, the proposal has been made to cope with the origine of comunism, by "Mater et Magistra", a renewal of christian charity.

(* -8) So, the USAF acting as a government agency (told by Nicap) as well expressed by Time's (Aug.31,62) picture, evident in the state's best interest, has been silencing Ufo truth. Nicap otherwise favours Ufo truth, working only "in the state's best interest" (Ufo Informer vol. 2, nr 4) and against communism, Russia disfavours Ufo truth, evidently also acting in "the state's best interest". So all this makes no sense to anybody and are just excuses. Nevertheless has Nicap made great efforts to get civilian respectability, since it has no "oficial" relationship to the USAF and Defense Department, as brought up (Nov. 21,56) at the Senate Moss hearing and also ex-secret Service (CIA) director Hillenkoetter has left Nicap's Directory recently (U.I. Aug. - Sept.62), so that Nicap's Ufo policy may have a soothing effect on the mind of revolted (about Ufo secrecy) civilians. Nicap sublines its new line with the complaints of lack of funds and asking for "congressional letters...to know all congressmen who favour (open Ufo) hearings", so (thinks the Editor), all gets nicely on the record and under control. •

(* -9) Maj. Kehoe states that the USAF has 10.000,00 \$dol. available for each Ufo case its gets examined. It's not explained if this covers also

the expenses of civilian Societies related to the USAF in F.S. research, even not acting strictly in an "official" way.

(*-10) A.P.'s new manager (Time Oct. 19,62) emphasizes A.P.'s "increasing role in "interpretive" reporting".... to "sort out" what's important is the primary function of News Service (of) today"

(*-11) Lufo tells (Sept. 61) of 2 dozen unpublished contact cases on their file.
