Scandinavian UFO Information

S.U.F.O.I.-Reporter

Editor: Willy Wegner
Sub-editor: Marianne Hansen

SUFOI-REPORTER is an exchange magazine published by Scandinavian UFO Information four times a year.

If any organization, magazine or person have materials concerning the UFO-Enigma to give in exchange for SUFOI-REPORTER, please write to the editor.

SUFOI-REPORTER will quarterly bring you informations about sightings in all of Scandinavia.

Exchange address:

SUFOI's Foreign Service,
v/ Willy Wegner, Editor,
Odinsgade 2, -4.
DK 2200 Copenhagen N.
DENMARK.

WELL ATTENDED LECTURE

January 17, 1969 there was in Hellerup, Copenhagen a well attended lecture arranged by the local group: Hellerup U.F.O. Klub, in co-operation with SUFOI.

The lecturer was the leader of SUFOI, major and diploma-engineer Frank Pedersen.

In the hall 600 people were listening with great interest. Most of them were young. It was an all round lecture especially for new ufologists, and in the future there will be given a number of lectures of the same kind based on co-operation between SUFOI and local groups.

WW

REPORT'S

TELEMETERDISC IN FREDERIKSSTAD.

September 18, 1968. Norway.

Mr Peter Otto Röd from Frederiksstad was lucky enough to see a three inch big ball shaped object at very close hand.

"I was walking along Hans Nielsens Hauge's Street up the hill from the firestation towards the railway when I heard the sound of a regular jumping behind me. The sound was like a smash from a metal-object hitting the street. Suddenly I saw the object under a streetlamp. It was grey-white and as big as a ping-pong-ball. There was nobody on

continue:

the street and I started to pursue the object but I was delayed by a car. However when I was right behind the object it disappeared completely! I was looking around in the area but I could'nt find anything. The object was jumping in jumps about 2,5 feet long. At all it jumped about 200 yards before it disappeared - probably straight up".

UFO OVER SVANEMOLLEN, COPENHAGEN.

October 30, 1968. Denmark.

At 3,30 pm a couple saw an oblong object with rounded corners appearing under the clouds in south-west 45 degrees over the horizon. The object was shining in a silvery-orange colour and hovered motionless under the layer of clouds for eight seconds.

Then the object turned round in a sharp curve and disappeared with an indescribable speed slantly up in the sky in the same direction from which it had come. When hovering, no wings or appendages were visible, but as pale blue-green lightbeams appeared on each side of the object. Just like a sort of exhaust.

The size of the object was estimated to 25 x 8 meters and the distance from the two witnesses to 650 meters.

STRANGE OBJECTS OVER ULFSHALE, MOEN.

November 2, 1968. Denmark.

Mrs. E.K. from Stege was at her summer residence in Ulfshale facing the Baltic ocean. When at 5,50 pm. Mrs. E.K. went out it was dark and through a hole in the hedge she by chance caught sight of a luminous "thing" gliding over a hilltop 200 meters away.

The shape was almost like the silhouette of a deep-chested man wearing a long monk's frock with a

cowl. The object itself was not shining, only the outline was.

Mrs. E.K. went out to the field to get a better look and then she caught sight of three objects passing a brook and then turning 90 degrees towards east. All of these objects was of same shape as the first one, but the leading object of these three has a darkred outline light, while the two others were shining brighter.

All of them were gliding over the ground where there was high grass and rush. They all disappeared behind some trees and brushes. After a moment Mrs. E.K. saw the darkred object again. It turned to the right and disappeared behind the hill.

The size was estimated to about 8-9 feet in height and the speed 75-80 km. in hour. Total duration of the observation: 15 seconds.

 AERIAL PHENOMENON SEEN FROM THORSHOEFN.
 """"""""""

Middle of December 1968. Iceland.

Through some days in the middle of december inhabitants in Thorshoefn have seen a strange unknown phenomenon in the sky.

According to the observers it was a very big luminous ball with a diameter of about 400 meters and at a distance of about 50 kilometers from the coast. The reddish light was varying in intensity like from an object moving. There was no traffic of planes in the area during observation.

Photos are sent to the USA's military-authorities for investigation.

 SHINING BALL OVER LINKOPING.
 """"""""""

January 1, 1969. Sweden.

Starting at 5,10 p.m. a lot of people told a local newspaper about a phenomenon in the sky over

Linkoping. It looked like a meteor but flew upwards from the ground. The light was pulsating. The phenomenon was reportedly seen during 45 minutes and it disappeared towards south-west.

UFO OVER SOELVESBORG.

""""""""""

January 2, 1969. Sweden.

At about 1,30 a.m. mr. Jeansson saw from Falkvik near Soelvesborg a brightly shining ball flying low in the sky. The object came from south and disappeared in north. It was seen clearly for about 2 minutes. The light was so bright that his bedroom looked like it was a sonny day.

Just after came another UFO but this one came from north-west and was by no means so bright as the first one.

SHINING OBJECT NEAR SKULTORP.

""""""""""

January 16, 1969. Sweden.

About 7,50 p.m. mr. Karl-Aake Nyman and his son saw a shining object in the sky. They where driving on the road from Skovde to Tibro and when they passed Skultorp mr. Nyman saw a luminous object over the town.

The object was white or yellow big as the light from a street-lamp and it fell at a fairly high speed towards the ground, apparently some miles behind the town.

INFORMATION:

If you also want to recieve the Danish-language magazine UFO-NYT in exchange please whrite to the editor.

OCTOBER ACTIVITY.

October 6 & 7, 1968. Norway and Denmark.

On the 6th and 7th of October a luminous object slowly drifted across the southern part of Norway, from west to southeast. It looked like an oblong triangle with the point downwards. It was'nt unlike one of the big meteorological balloons.

The 7th of October in the evening an extraordinary UFO was observed in HARRIDSLEV, Denmark. It was a triangle with the point in the flying direction. The triangle was'nt equilateral, but the point was sort of extended. On the back of the triangle were two big, round white lights, or rather hindmost, on the side of the object. Although the object was observed from "halfways"-behind, one could'nt make out the shape from this angle, possibly because of some blinding effect of the lights.

The observer relates as follows:

Monday the 7th of October in the evening at seven o'clock when I was on my way home I saw a lumonous disc probably very far away. It was flying horizontally parallel to the road, and disappeared to the west. I continued my driving for about one km. when I saw a second disc. This time it came from south in the eastern sky. I stopped and watched the object through my binoculars (8 x 50). A bus was driving directly under the shining disc, and when the bus stopped, the disc continued its course and disappeared in the horizon. I was still sitting in my car trying to find out what I had seen. Suddenly I heard a strong rumble or rather a powerful sound of wind right overhead. It was'nt a helicopter, because I know the characteristic "flap-flap-sound" these make. When I looked up I saw about 100 meters above me a big dark triangle with the point in the flying direction, with big round lights on the side of the hindpart of the body. The triangle was flyin upwards of an angle and disappeared after two or three minutes. I would estimate the size of the

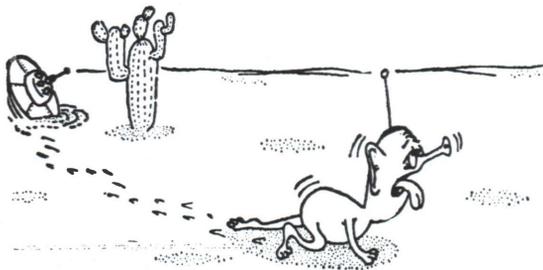

object to about 6-8 meters", mr. I.J. completes his report.

SUFOI have more than 60 contact addresses in Scandinavia, where people always can get informations about the UFO-case.

S.U.F.O.I.

Scandinavian U.F.O. Information is the largest UFO-organization in Scandinavia. S.U.F.O.I. was founded 1957; today it represents more than 5000 Scandinavian UFO-„fans“, most of them being Danish. S.U.F.O.I. greatly emphasises effective research and serious, sober, and objective information. We are editing a magazine in danish, UFO-NYT (UFO-NEWS) which is published 8 times a year, and besides we send out information in the form of pamphlets and books.

SUFOI-Reporter is a magazine that will inform you about development of the UFO-case in the Scandinavian area (Norway, Sweden and Denmark). We will welcome any kind of information from foreign organizations, magazines or persons concerning the UFO-Enigma.
