

" Coast " highway (between Netaniya to Haiffa) 30 April 2002

A citizen of north Israel reports: "I don't believe in such stuff", I don't want to identify myself, "so no one will hospitalize me". She tells us, that when she drove to the north she observed, beginning "Kibutz-Ga'ash" area, 3 shiny yellow lights. At first, she didn't pay any attention to them.

Continuing driving, she saw that the 3 lights, standing vertically, continue to move northern, parallel to her. As she claims, they were big enough and looked like "street-lights"

When she passed "Zichron-Ya'akov" she saw 3 vehicles whom their drivers stopped to watch the lights.

When she arrived Haiffa, she discovered 3 more lights, who were in a distance from the first lights, moving north. She emphasizes that the distance between the 2 sets of lights were always equal.

When she watched them, she noticed a shape between the lights, like the lights put their shade on a object. The 6 lights lit off in an order. In the beginning 3, then 2 more and at in the end, the last one.

The observation was took between 21:00 to 22:00. To the witness estimation, the lights were lower than an airplane flight height.

Tel-Aviv 6 May 2002

A child named Bar, 12 years old, who lives at "Zahala" neighborhood, tells us.:

"I received from my grandfather a telescope. At 14:30, me and my brother watched moving things, like birds etc. I saw in the sky something round.

From far it looked like a dark-gray spot. When I observed it with my telescope, I noticed it had a saucer shape, colored gray moving in a straight line.

I called my mother, and also she saw it. Until I brought my camera, it disappeared behind buildings next us.

The boy's mother confirmed his evidence, and added that the UFO moved to east.

Kibbutz-Ma'abarot 6 May 2002

The Kibbutz member, Yoram Erez, reports:

"At 21:30 I went out of my house and watched north-east. Approximately above Moshav Elyashiv (cooperative settlement), Ha-Roeh junction, above the old "Coast " highway, I saw a "convoy of orange lights", aligned in a stright line, moving from north to south.

There were there 6-7 lights. No sound was heard.

At some point, every one of them, one by one, started moving upwards.

While they move up, their light became dimmer, until they disappeared.

All scene took about 20 seconds.

Tel-Aviv 6 May 2002

Mr Gid'on Polany, our center member. reports:

"At 19:35, with sunset, I was my way home, driving on Gehha highway. I noticed that cars are stopping and people watching to the sky. I wached the cloud clear sky, and saw a "match shape" object, located very high in the sky, shiny yellow-white colored, moving very slowly to the west.

It disappeared from my eyes behind high buildings in the "Kiriya"area (Central Tel-Aviv)

Ramat-Ha'Sharon (northen Tel-Aviv) 10 May 2002

Judy Pe'er reports: "At 01:34 I went to my house roof to hang some laundry. My house is located in a street, next to an area of military industry. Above this area, I noticed 4 shiny and glowing yellow-orange objects, floating above the trees-top, for my estimation in a distance of 150-200 meters away from me.

The objects changed their location, they moved, turned on and off. Afterwards, 3 more appeared intermittently. I saw a total of 7.

I took my camera and photographed them, afterwards I also videotaped them with my video camera, for about 15 minutes.

The objects was about 3-5 meters each. They behaved srtangely. They stood absolutely quiet in the same location in the sky and suddenly changed their group locations.

They seemed to be like huge suns. Sometimes they retreated backwards, lit on and off. Sometimes, I couldn't see them appearing in the camera but saw them with my own eyes.

In the film we can see only a central light and not the rays surrounding it. While this happens, a small plane appeared from north-east. When it was in one line with the lights, they turned off. When the plane passed they turned on again. I observed them for 30-35 minutes.

When you observe carefully the film, you notices sometimes the lights are creating an "arrow-head" shape, come closer to each other, and as one hides the other.

It seems to be like they have holed in their center. The lights didn't appear on the film camera.

Observing the videotape, I (Abi Greiff) was impresses of the lights nice esthetic shape, and from the appearance of something like a half sphere, which was seem to be close to camera.

Kiryat-Yam (next to Haiffa) 13 May 2002

Mr Avraham reports that from his residence he observed a white dim light behind the clouds. Beneath them, appeared 3 attached lights who moved slowly, and stood still above Haiffa gulf, in a horizontally line. Their color was white-yellow, and he observed them for more then 15 minutes.

Bat-Yam (city near Tel-Aviv) 21 May 2002

A citizen of Bat-Yam reports, that approximately at 23:00 lightened objects with "fire-color" appeared above Ben-Gurion intl' airport area.

In the beginning there were 7 of them. At 23:25 I noticed at 6, as one of them turned off.

The objects slowly turned on and off in different places in the sky.

At 23:40 were only 4 of them.

" Coast " highway (from Tel-Aviv to Haiffa) 25 May 2002

Eilona Pinto reports: - " At 00:50 on Saturday night, me and my husband Dror drove to the south. When passed "Wingate Institute" (near Netaniya) we noticed a very large, white-bluish (neon like) shiny spot.

It was located very high in the sky, and moved in a huge speed in a jumpy way. We didn't noticed a direct flight, but we observed a disappearance at one location, and appearance at another location. It flew in zigzags, sometimes forwards and sometimes backwards.

Generally, it flew south-east, Dror identified a rectangular dark shape, which moved along with the object, or was part of it.

When we arrived Kfar-Shmariyahoo junction the object disappeared.

Jaffa 25 May 2002

Bernard, who went with his dog to a walk at 08:30,observed very high in the sky, at very fast flying object that " ejected pulses of trails "and moved north-west.

As he claims, it wasn't an ordinary airplane, from 3 reasons: the exception high flight, the fast speed, and the way it ejected pulses of trails.

Hadera power-station area (northern Tel-Aviv) 28 May 2002

A report that was broadcast in "107.5 FM Radio" station of Haiffa, that at 07:30 at morning, a blue object was observed as it fell into the sea in the "power-station" area near Hadera.

The report indicates that the drivers stopped in the side of the highway to watch the scene.

Ma'agan-Michael (northern Tel-Aviv) 31 May 2002

Mr Arik Hasidim, our center member, reports:

"Exactly at 22:10 I finished speaking on a phone call. I went out of the room and watched the sky. There I saw 3 lights in a structure. I run and took my binocular, I noticed then, that the lights were white-yellow colored.

The front light was far away from the 2 other back lights. I noticed that between the lights was something that blocked the star light.

It moved slowly from west to east and was located very high. It was a real giant UFO, something very big.

It moved slowly, and I saw it for about 3 minutes."

Holon & Be'er Ya'akov (cities in south of Tel-Aviv) 1 June 2002

Hanoch Nebo, our center member, called me (Abi Greiff) at 21:50 and reported that he observes bright yellow lights from his home in Holon.
The lights were observed until 02:40 at night. He observed 1 to 7 of them, turning on and off. Together with our center member, Mr Elisha Gillad, they drove to the light direction .

It seems to be they were floating above areas eastern Kfar-Yonna junction in the Sharon area.
Hanoch located his video camera on a tripod, and videotaped the lights about 3 hours.
Teenagers from Be'er-Ya'kov, east of Palmahim area, noticed the lights and also filmed them.

We have the films, and they will be presented in our next convention.
The air straight distance from Be'er-Ya'kov to Kfar-Yonna junction is approximately 40 kilometers.

Shimshit (a settlement in Galilee) 11 June 2002

A resident of the settlement, located next to Kibbutz HaSolelim in lower Galilee, named Anat, reports that when she sat on her balcony at 23:00, she observed a small strange flying object.

She claims that she saw a disk shape object, flat and shining, which was spinning in front her eyes, around a street light for almost an hour.

Beit-Shemesh (a city next Jerusalem) 20 June 2002

A resident Mr Gabriel Borohov, saw at about 02:45 four yellow lights.
The lights were moving towards each other and moving again away from each other in right and left directions. They lit down slowly one after the other. The observation was taken in south direction above a wooded area. He videotaped the observation about 10 minutes.

The video camera was located on his balcony banister at his ground apartment. We have the videotape, and it will be presented in our next convention.

In a meeting in his home, at 29 of June 2002, the family members told me (Abi Geriff) that in their city, named Andijan, which is located in Uzbekistan (from where they immigrated to Israel), they saw a UFO for 3 days. They observed at 3 disk shape gray objects, beneath a pinkish and azure light emerged, which turned into a "fire trail" because the UFO's self spin.

The UFO's moved forwards and backwards, Gabriel, watched them with his binocular and saw them clearly. A family relative, who was described to be psychic, told them, that the time aliens came to them and warn them to leave the place.

Indeed, two days later, the Muslim citizens attacked houses and vehicles belonging to the Jewish citizens.

Haiffa 21 June 2002

The witness (Hanitta) was directed by our center member, Mrs Orly Shiput. At midnight, Hanitta saw from her home, on Carmel moutain, a star like lightened orb, turning around itself, and moves from east to west above the sea.

According to her testimony, it was located high and produced colored lights, in green, red, and orange. She observed the object for 5 minutes.

Nesher (a city next Haiffa) 21-22 June 2002

At 23:40 I (Abi Greiff - Chairman of ICFUFOR) observed 2 large bright orange lights floating, lower of the city lights, in eastern direction, above Down-Galilee ridge. I estimate they were abot 20 kilometers in dirct line.

Continue the observation, the lights turned off, one after the other, and other lights appeared in the sky, some them in

higher location.

They were located in the same sky section, but not at the same place.

The observation lasted until 00:25. At this time, I saw a line of light, in the same area of the of the observation, moving downwards in a diagonal direction. Its color was dim white and was seen for about 1 second.

Afterwards, none of the lights were seen anymore. In spite of my observation and my video camera. Nothing was seen when I checked the videotape

Ramat-Ha'Sharon (a city northen Tel-Aviv) 2 July 2002

Judy Pe'er photographed the second time which appeared next to a military industry. She saw and videotaped earlier at 10 May 2002.

The lights were videotaped with a video camera for about 47 minutes, starting at 02:30, they disappeared 20 minutes after finishing the video recording.
