

Tel-Aviv/ 31 July, 2003

Idan Greif and Rachel, where in the evening next to Tel-Aviv Museum. They saw a strange sight above them. He tells us: "I saw something like a balloon, and under it I observed 2 white-yellow lights, separating and approaching in an unsynchronized tempo. It seems to be as the lights had a power supply. Then the two lights disappeared. Only the balloon-shape object remained. It has a yellow color, and had two little red wings. It was not high above the buildings. We observed it for almost 10 minutes, and then it disappeared upwards.

Na'aleh/ 23 August, 2003

Hanoch Nevo told us in this evening, that in 20:22, when he walked with his children in the park; suddenly he saw in the sky a very big star. It wasn't there before. It was white-cream colored, and suddenly disappeared. I saw it for 10 seconds. It was very nice, the light was milky-white.

A day later, at 06:00, Hanoch phoned me again, and left me a message: "something very strange happened to me". Afterwards he told me that he was dreaming that night a dream after a dream. He dreamed that he is in a place where blood tests are being held. Its was difficult to breath. A nice young girl was there, but I was afraid and walked away. I went to a nice place where flowers are being sold. I stood in front of this house, and saw something like disk shape disappearing. I told to myself: "what a beauty". Then it suddenly appeared again, entering the house and starting to turn, changing the colors of the flowers. Its' diameter was 70 centimeters. It was an old house. An old lady was the owner, and she wanted the house to be renovated. The disk renovated the house and made it strong. The disk turned into a woman, and she turned into a young man, 30 years old with curly brown-black hair. The man looked at me, and told me I had a broken rib. I told him that I was involved in an accident.

The accident occurred 3 weeks ago, when I was in a taxi. I had pain in my chest for some days, and my breath was difficult. The man told me in the dream, that my rib is broken, and asthma can be developed. I asked him to help me, so

he penetrated me with his eyes. I felt energy penetrating my chest. He seem to be a regular person, but with the ability to penetrate with his eyes into the body. I felt he is healing me. First he healed my left side, then the right side. He asked me in the dream, how am I feeling, and I told him I feel much better. Now I feel really much better.

Eilat 28 August, 2003

Rotem, age 21, tells us: "I set with my friend in 'Blue-Beach' promenade. Because of the chair's angle, I watched the sky. Suddenly, I saw something like a big star, falling down with an illuminating tail. 2 minutes later, something round went out from the star, and flew in fast half-circle courses. Also my friend observed it. It disappeared after half a minute, while flying to the north, inside the land area. It was dark in color, but it had a hoop, colored between white and orange. It was high in the sky. Three days ago, I spoke with my friend about extraterrestrials, while being in the same location on the promenade. She was a believer, I wasn't. Now, I'm in a shock!. My friend told me: 'Well, now you do believe me?' "

Tiberias 2 September, 2003

Yifat tells, that at 19:50 she observed from her house, next to the municipality hall, at two yellow-white illuminated objects, suddenly appeared above the north of the city. She called her husband, and they both observed, how everyone the objects split to two and turned to four. The sight was observed for a few seconds. Afterwards the lights suddenly turned off and disappeared.

Yifat also told me, that 10 years ago, when she lived in Moshav Arbel (next to Tiberias), a friend told her that he

observed a metallic UFO disappearing towards Yavne'el.

The road between Ma'alot and Kfar-Vradim/ 2 September, 2003

Brought by: Shimon Rosenberg

A.Ch., a teacher, whom I estimate much her witness as very reliable, tells me: "at 19:45, while driving from Ma'alot to Kfar-Vradim, suddenly we saw an illuminating circular object in the sky. We thought' in the beginning, that was an airplane' but it was so strange, so bright (in yellow and red), so low in altitude. Suddenly it split into two spheres, and immediately every sphere split again. "All happened in fraction of seconds". It was in south-east direction, above Tefen area.

Hod Ha'Sharon 11 September, 2003

It was 10:30 when Assaf set at his office desk at "Amdex" company, located in Nave-Na'aman industrial area, and looked out of the window, as he does from time to time, resting his work with the computer.

He saw a small object in the sky, maneuvering up and down. First he thought it's a model-airplane, because he is very

familiar with them, also from his army service. But the behavior of the object wasn't like a model-airplane, and it wasn't a bird. It hadn't wings and no wings movement was observed!

After observing the object for almost 20 seconds, it made a very sharp turn and accelerated to the south. This sharp turn, convinced him it's not a model-airplane or a bird. The object became bigger, while flying towards the window, passing in two seconds almost 50 meters above the building. Its size was bigger from a private car. Its shape was like a beheaded bird, with two bumps in the front of its wings. It was green-gray in color, and had a "strange texture".

Assaf draw the object. He claims he observed UFO's also in the past, when he was in the army in 1993. It happened in June or July, when he drove his car in the area of Moreshet Junction. There he saw a pinkish bright light rising up in an angle of 90° from the fields of Nave-Yarak, and flying in the altitude of almost 100 meters toward the sea. A day after this sight, the newspapers wrote that in the field were found landing marks, and that researchers were in the area.

Ma'agan Michael/ 21 September, 2003

Arik Hasidim tells us, that in 19:45, he saw a very bright object in the sky, moving from south to north. Observing the object through binoculars, it seemed to have a cone shape, extraordinarily bright.

A day before, on the 20th of September, 2003, he saw two bright objects in the sky, flying one after the other from north-east to south-east. The objects were all the time in the same distance one from the other, and flew in the same speed.

Nesher/ 22 September, 2003

It was 20:10, when I (Abi Greiff) went, by foot, from the Technion Institute (Haifa – H.S.). at the sky sector, above Haifa's bay, in the altitude estimated by me about one kilometer, from "nowhere" a little orange light was lit up, and shut down after 2 seconds. After almost a minute later, another similar light was lit up and shut down at the same sector. After one minute, a third light, a little more to the south appeared, and then another one. At 20:20, when I was at my home, I observed another light above Kiriatt-Atta. At 20:30, I saw from my porch, two additional lights at the same sky sector. Afterwards – in an interval of almost one minute – a big light was lit up. It was lower, and was on for longer time above Haifa's bay. After a few minutes, I saw from distance, above Lower-Galilee, two lights lighting up and shutting down in the same sector from where my observations seem to be lower. All the time of the observations, there was no activity of airplanes in the area and the sky were bright.

Ramat Ha'Sharon/ 28 Septebber, 2003

Hagai Peled observed and photographed UFO's from his flat at the 10th floor. Between 23:00 to 01:00, he observed, in the east direction – towards Rosh-Ha'ain, at five small orange lights, which organized in the sky in different geometrical shapes. He photographed all the scene in his video camera. When he made zoom, he observed the lights shape was like an external circle containing an internal circle. He, also, observed a pulse in the lights. During the sight, there were in the sky four and five lights, making a 'W' shape, triangular shape, and a half-circle shape. The lights were located all that time in the same sector of the sky.

Hod Ha' Sharon/ 2 October, 2003

Sh. R., who tells us about this event, studied Reiki, Kabala and Mystics. She teaches courses in the field of consciousness. According to her, she has unnatural senses. Adrian Dvir told her, that she can also treat people.

A year ago, she went into her sleeping room, and in conscious state, she experienced four trials of taking by extraterrestrials. In one of the events, she felt that she was taken to the extraterrestrials planet, in another galaxy, in a few seconds. She remembers, that she flew over dry mountains, where enormous buildings, hundreds meters in height, where located on them. Afterwards, she found herself on a treating couch. Three extraterrestrials treated her. One was small, the second was tall and the third seem to wear something like "knights' clothing". She remembers a steel bowl and a red laser beam. She asked them to treat her glands. According to her, the treatment helped her, and the extraterrestrials were good and kind.

She had a bad meeting in the last time. This is why she contacted us. It happened on the 2nd of October, 2003. That night, at 03:10, after she finished watching TV, she prepared to go to sleep. Then she heard a humming noise, and felt some kind of energy field surrounding her.

She tells us: "I felt something will happen to me. There were electromagnetic noises, unfamiliar energy. I said to myself 'wow, something is going to happen!'; My dog, which reacts to anything, set calm next to me. I felt my hands are being held strongly, and someone pulls my head towards my right shoulder. They held me strong. I was paralyzed, and couldn't move anything. I couldn't take control. They took control over me. I felt it's aggressive, an energy field. I felt three extraterrestrials holding me, but couldn't see them, and a fourth one made circular movements in the back of my head. I felt like a massage, in circular movements along my back of the head. I didn't understand why they are touching me. After an effort, I succeeded to speak. I asked them twice what they are doing. And asked who are they and why are they doing this? In all the noise I heard a woman's voice, telling me two words, I didn't understand, but she was hushed immediately, so I will not understand. That moment, they finished the treatment and disappeared. After 10 seconds everything vanished. I checked, but didn't find any sign on my hands.

I asked my daughter, a day after, to look at the back of my head. There she found a huge black mark with a white spot in the middle. The skin was pilling there. My neck hurts me for a day and a half, but now it's a little less sensitive (4th October, 2003).we tried to photograph the mark, but the camera machine photographed around it, but somehow not the mark itself. I went to Adrian Dvir, who explained me, that the extraterrestrials didn't want me to photograph. He told me, that the treatment finished, because they checked their data base, and realized I don't belong to them. They randomly arrived to me, and took a sample from the white spot in the black mark. The black mark is their disinfection material. They were aggressive extraterrestrials, who don't know how to treat humans.

I remembered, that in the evening the event happened, I saw in channel 8 (science channel – H.S), a program about UFO's. Then, I told to myself: 'a long time since it didn't happened to me...'. Maybe, this thought invited the extraterrestrials".

Sh. R. told me, on the 12th of October, 2003, that the black mark is still visible

Binyamina/ 5 October, 2003

All members of Tammi Talls' family observed, in west direction, at something looked like a bigger star (comparing to other stars). Through binoculars, they noticed its sparkling in red and blue.

Tammi tells us: "we always observe the stars. It wasn't before and wasn't seen afterwards also. In the next night we checked several times, and it wasn't there".

Beit Shemesh/ 8 November, 2003

Between 23:35 to 23:55, Oren was a witness to a ufo sight, which he got on video. He tells us: "from my home I heard a noise, like an airplane, but strong. I went out and saw a red spot and flying towards it. In addition, above me, I saw something like a stealth airplane, but more round and with 6 red, green and yellow lights. It flew in an airplane height, but much faster. I got my camera to the balcony and waited for 5 minutes, but nothing happened. I returned inside the house, but then I heard again the noise. I went out and filmed something round with a point in its' end. When it arrived to the horizon, it stopped. After him, came another one and another one – total some of four. I have a video film of a few minutes".
