

Nesher/ 10 October 2003

It was 18:20, when I (Abi Greiff) walked towards the east gate of the Haifa Technion Institute. I saw 2 lights in the sky, towards Haifa, high in the sky, 90° above the horizon. In the beginning I saw a yellow-orange light for few seconds. After 1 minute a white light appeared, also for few seconds. It appeared in the right of the first light. It seems to me that it moved a little to the right, before it turned off. The lights were lower from location of satellites, and were seen in front of clear sky. In the area, wasn't any movements of airplanes.

Hod Ha'Sharon/ 6 November 2003

Tamar, who gave us this message, watched at 17:00 in an unusual object from her balcony, which faces Ramataim. She tells us: "in bright sky, towards the horizon, I saw a red-orange sphere. It flew upwards, in a dark angle (45°). I observed this object for almost 2 minutes. It flew towards Petach-Tikva, moved upwards, became a tiny spot and disappeared in the sky. It looked like a bright ball in the background of the blue sky. No sound was heard, it was totally quiet. The object wasn't close, but I saw it clearly. It was something big".

Ma'agan Michael/ 17 November 2003

Arik Hasidim tells: "At 19:00 I saw in the sky, above me, 2 aircrafts, which, in the beginning, thought to be airplanes. But there was no noise at all. Their color was bright, but not shiny. One of them flew over my head and was (from my point of view) 1 meter in size. They made complex they came from south and flew northward"
