

The Chanel2 TV broadcast of the program “Foreign Guests”/29 February, 2004

The program produced by Ilan Shushan , from “Elza” studios, and broadcasted on TV, channel 10. This broadcast was a breakthrough from the explanatory aspect, and from the fact that matters discussed there in a way, never saw on Israeli television.

First - we could observe the video filmed by Oron Sultan from Beit-Shemesh (Journal No. 41, October 2003). It was an important videotape. We clearly see in it unidentified flying objects. In addition, we can hear the sound of these UFOs’.

Second - for the first time, we hear the response of the IDF Spokesman, referring to the UFOs’ phenomena in Israel.

Third – an international importance: the response of the former IDF Air Force commander, Ret.Gen. Avihu Ben-Noon, responding to the videotape.

Ret.Gen. Avihu Ben-Noon said, while watching Oren Sultans’ videotape: “Its, no doubt, a thing I never saw something like it, and I’m not familiar with such a thing. We can’t see here assembly logics. I don't recognize any of these crafts. I’m not familiar with such an aircraft with a sound like this. The sound isn’t a helicopter sound nor an airplane sound. If UFO’s do exist, it might be a UFO. Anyway, it’s interesting, and I recommend investigating it. Meaning, giving the air force to investigate it” – end quote.

This is the IDF spokesman response, given to the program editor: “The Israeli air force isn’t familiar with any unit, which investigates UFO’s. The Israeli air force does anything it can; to protect Israeli skies with its control units. There is a possibility, that in these areas was airplane activity, and airplanes were seen, considering the fact that these areas are under the air force courses. The Israeli air force doesn't recognize the existence of UFO’s.”

Ma’alot/2 February, 2004

Shimon Rosenberg says: “I went to a walk with my dog in the afternoon, around 17:00 – 17:05. When we arrived to the location, where we usually turn back home, I looked to the left (general direction west). The sky was blue and nice, but cloudy. Exactly at the location where the clouds were ripped, I saw in their left side a “lighted stripe” by the twilight sun. its’ color was orange-red. In the beginning I thought it was an airplane trail, but it didn't extend backwards like an airplane trail, but moved as one piece. It was far away from me, and its’ length was between 2.0 – 2.5 centimeters

(comparing to an extended arm, holding a ruler). The object moved to the north, from my point of view.

It flew steadily, at mediate speed, in altitude of 25?-35? above the horizon. I watched it for about 30 seconds, until it disappeared in the right side of the sky. I should notice, that the stripe didn't seem to be wide, probably because it was far from me. It was very exiting, after a long time, to observe a UFO again.”.

I want to add (Abi Greiff), that Shimon's phone call, came after I received the witness of Yehudit from Haifa (see above).

Ha'chof Road, between Hadera and Natanya/ 2 February, 2004

Yehudit from Haifa claims: “My husband, me and our two children, drove from Haifa to the south. At 16:50 or at 17:00, when we were in the road sector between Hadera and Natanya, the children shouted for us to look. We looked to the west, and we saw something orange and elongated coming down from the sky. Shining diagonally from its' top to its bottom.

It changed its' direction and started to fly horizontally. From our point of view, it was 1 meter in size and its' width was 10 centimeters. It didn't fly quickly, and it looked like a bright orange trail of fire. It entered into the clouds and went out of them. We saw it for 2 minutes, until it disappeared inside a big cloud”.

Tsfat/ 17 February, 2004

The witness, Ron Sharvit, 19 years old, stood in the city, next to a vehicle with a friend and an adult. He says: “At 19:30 I saw blue-green lights, in an airplane flight altitude. They came in two pairs above the city”. The witness sounded frightens and worried. He was interested if there is a contradiction between the existence of extraterrestrials and his religious traditional faith.

Sajur, next to Carmiel/ 17 February, 2004

Ron Shoal , 18 years old, from Tel-Aviv tells us, what happened when he was in a trip, along with six friends: “it happened when we walked on the road from Sajur to Carmiel. At 19:30, we saw above us, a lighted blue-green object, moving fast. It was in the size of an airplane. When we observed the object, we noticed at four lights moving in pairs. The brightness of the light changed, sometimes weakened and sometimes became stronger. We heard no sound, and observed it for less then one minute”. The witness sounded excited. He said: “It was something weird”.

Hod Ha'Sharon/ 10 March, 2004

The witness, named Moti Ashkenazi , reports that in west direction from his observation location, between Riding and Herzelia, he saw a very bright object, brighter then a star, that four beams of light came out of it. For his estimation, the object was 1 kilometer in altitude. The witness lives in the area for 2 years, and never saw such a sight. At 21:00, the object wasn't seen anymore.

Ramat-Gan/ 11 March, 2004

The witness came, thanks to our center member, Mr. Giddon Polani. The witness, a computer engineer, named El'dad tells: “I saw in the sky two lighted objects, separated one from each other. It happened when I watched from my porch. I took binoculars and noticed it wasn't a star, but an elongated rectangular object, surrounded with spots of light. It was in

west direction. After an hour, I didn't see it anymore”.

Kfar Hannanya/ 12 March, 2004

The settlement is located next to Kibbutz Parud, next to the junction leading to Tsfat and Kiriath-Shmona.

The Bloom family was the witnesses to this event: the mother Smadar , the father, the two boys, the grandfather and the grandmother.

The father, who left the house around 19:30, saw something very bright in the sky, in north-west direction. He said it wasn't a star and was very unusual in that area. The object wasn't there before, as long as they live there (for the last half year). The father called all the family members, who also witnessed the phenomenon. Afterwards, he took his video camera, put it on a tripod and videotaped the object.

We notice in the videotape, that the UFO seems to come closer and moves away. Around it, we see shades of red and purple. We can also observe some kind of a “pulse of light”. Sometimes we see around it shades of green. In its top and bottom, we can see something like wicks.

When I came to the area (Abi Greif), I spoke with the witnesses and watched the videotape, filmed a day before.

Afterwards, I looked out of the window to the spoken area, and saw in the sky a very bright object, bigger and lower than a common star. It had a yellow shade, different from the color of stars.

For an hour, along with the family members, we noticed as the UFO reduced its light many times, turns to a “dot”, disappears and reveals again. It happened in unequal intervals of time, and happened also when the object was in clear sky, without any clouds. At 21:00, in my way back home, when I looked at that sky sector, from the location of Zvulun Valley, and afterward from the Carmel hillside, I didn't see anything at the sky.

That night, the object was videotaped again by the family's father. The UFO was in a direct line from Kfar Hannanya, above and in direction of the settlements Moran, Ramah and in direction of Nahariya.

On the 14 of March 2004, the family told me they observed that UFO in their way from Golany Junction at 20:00. The UFO wasn't seen at 21:00.

On the 17 of March 2004, from 19:30-21:00, Shimon Rosenberg observed the same sky sector, from his location in Ma'alot, but didn't see anything.

Ma'alot/ 12 March, 2004

I sat in the yard, in front of my house (Shimon Rosenberg), and watched the sky. Suddenly, at 22:55, an object flew above me, in tremendous speed, which pulled after it a very long trail (all the length of that sky sector). Its color was very beautiful, between bluish and bright purple. It made a very dim whistle sound, I can't describe it, but it was very interesting.

As said above, the object flew in tremendous speed, from south-east to north-west. It flew in moderate altitude, much closer than my usual observations.

Ma'alot/13 March, 2004

After the observation of the last night, I decided (Shimon Rosenberg) to make a new observation, starting at 22:45. Indeed, at this night, at 23:07, a yellow-orange bright object, crossed the sky for about 1? seconds, from south to north. The observation was, when I observed, generally, to west direction and north-west. This time, the altitude of the object was very high.

Ma'alot/ 19 March, 2004

Shimon Rosenberg informs: "At 15:10, I was in the yard, in front of my house, fixing my neighbors' sons' bike. Afterwards, I sat to smoke a cigar. Suddenly, I noticed that high in the sky above me there is a dark object, circular, drop-like shape, flying from south-east to north-west.

The sun was located right to me, at elevated angle of about 40?, and was hidden by a tree. The flying object, which was very small (because of the altitude), moved steadily, in moderated speed.

Next to its location, where some white clouds, who moved in the different direction because of the wind (from north-west to south-east).

In the beginning, I thought that my eye misleads me, so I called to my neighbors' son, and the 10 year boy also saw the object.

The interesting thing is that I estimated, and hoped, that the object will continue its flight and will enter the clouds. In that case, I could estimate its relative height. But when it came next to the clouds, it turned in a gentle curved angle to the left (as it wants to bypass the clouds), and it disappeared a second and a half later.

After understanding that my eye doesn't mislead me, I expected the object to move in a "falling leaf" movement, but it didn't happen.

For my estimation, if it was a balloon or a bird, it couldn't fly so easily against the wind.
