

Kiriat-Yam 20.7.2004

Sagit Ksirer saw UFO few times. She remembers one case, with her friend at 1996. This is why she is aware to the phenomenon, despite of her non-aligned surrounding.

That day, between 14:30-14:45, she observed from her window at the 8th floor and saw bright lights in the south. In this location (south) there are the Carmel Mountains and the city of Nesher. She videotaped the lights with her Sony 220x video camera (automatic zoom) for about 3 minutes. There is an interruption in the film, because the lights disappeared for about 40 seconds, and then appeared again.

The video – at the beginning, we see 8-10 linear and horizontal lights, and the houses are in the background of them. One of the lights seems to lit strongly with 4 light beams.

In slow projection of the movie, frame after frame, we see a dark perimeter with a central shiny white light. We can also see blue and orange lights inside the white lights. In the left, we can observe a circular light. Afterwards, the second light from the right turns shiny, and then the fourth light turns on then the third light. Without zoom, we see the lights shining, blinking and turning on and off. Afterwards, the lights shape changes to blinking trapezoid shapes. We can also observe green lights with dark edges, in the margins, and yellowish light in the center. Afterwards, the shape of the lights changes again. It seems like every light is formed of 4 blinking rectangles. Afterwards, 3 of the lights are on, turning off and on again, while changing their shape to a cross-like shape, colored white and blinking, with dark edges. Sometimes, we can see a yellowish light in the center. Near the end of the video, we see the left light, which is lower then the other, blinking.

Ha'arava 9.8.2004

It happened at 04:30. Kobbi, a Petah-Tikva resident, drove his car northward. About half a hour before Sodom, he noticed a yellowish light in the sky, moving up and down. He woke up his wife, her brother and his friend, who were sleeping in the car. They parked the car to observe the object. Then they saw the object stopping and hovering, and 3 more lights appeared. They could see it was a triangular object, with 3 lights in its bottom and a yellow light on its nose (in the front).

According to Kobbi, the object wasn't far away from them; it was a few dozen meters in the air and west to the road.

Everything around was quiet, but it was strange because they could hear a noise like an “industrial compressor”.

The group observed the UFO for about 40 minutes, and afterwards they reported the Beer-Sheba police.

Ashdod 17-19.8.2004

Eli Abramovits, a dental technician, his wife, a high school teacher and their 17 year old son, noticed at night at a lighted object, bigger than a star, which was low in the sky. It started when Eli and his son sat on the balcony at 03:30 and played chess. Then they observed the object the first time. They decided to videotape it. The UFO appeared 3 nights, between 03:30 to 04:00 and was videotaped (totally 35 minutes of tape).

The video - when magnified, we see a circular object with a reduction – a linear strip in its bottom. Afterwards, we see it blinking in the houses background. We see that its center is circular with a bump in the middle. The perimeter is green. Then the UFO changes its shape, and becomes a white shining spot with green edges. We can observe changed in its central part to reddish-purple, which afterwards turns totally green.

Afterwards, we can observe the object turning again to a spot of shiny light. Then it became purple in its center and green in its perimeter. Then it turns reddish in the center and green in the perimeter. Afterwards, it turned its light to orange, with a dark purple in its perimeter. On the objects surface we can observe blinks of green and purple lights. In the 13th minute of the film (dated 18.8.2004), according to Eli, the camera stood on a tripod. First, the UFO seems to change its shape from circle to a form created of little green-white rectangles, moving and changing. Afterwards it turned circular again, with the central circle lower (maybe because of a turn). Afterwards it changes its light to light-orange with a green perimeter and strips of light surrounds the object.

Afterwards, the central circle seemed to be more higher and in the right (maybe a turn again). Then the central circle moves down to the lower right corner. In the 32nd minute of the video, the object seems to be a perfect circle, with prominent edges, like a hoop. Afterwards it shines, but not very bright. According to Eli, he needed to move the tripod, because the UFO moved and got away while filming it. He estimates that it was giant and located more than 10 km away.

Ma'aot 12.9.2004

Shimon Rosenberg reports: I observed a group of stars from the school yard. At 19:47, I noticed above me a big white-yellowish colored light, bigger than a big star. It was located 60 comparing to my location. It moved very slowly from east to west, then it “started to shrink” and disappeared after about 2.5 seconds.

There is a possibility that the light was there before I noticed it. I noticed that a lot of dogs were barking. I continued the observation, but it didn't show up again.

At 19:56, I noticed a small dim orange light, moving from west to east, at 45° comparing to my location. The light disappeared after about 2 seconds. The dogs continued barking. I felt it starts to be interesting, when at 19:58 an airplane appeared. First I heard its engines, and then I saw its blinking lights. The plane went to the same area where I saw the lights before. When I turned my face to the north, where the familiar stars are located, I saw an orange light fixed right of the Big Dipper. I must note that the sky was clear without any clouds. At 20:13 the light just disappeared. I saw it for about 2.5 seconds. I looked all around me, but no cloud was in the sky. Meanwhile the plane, with its blinking lights, continued to fly around. After the light disappeared, only one dog continued barking, and at 20:15 it became totally quiet.

Ma'aot 13.9.2004

Shimon Rosenberg reports: while carrying an initiated observation, at 20:12, a big light source appeared in the sky. I followed it with my telescope, and saw it wasn't an airplane, because it was very high. It moved from west to east, and disappeared while “shrinking” its light.

Ma'aot 19.9.2004

Shimon Rosenberg reports: in the morning, I observed a small rectangular mark, at the inside side of my arm. Maybe it was there before, but I didn't notice it. The nose of the rectangle is directed downwards, and it has a small croissant in its end. The size of the mark is about 3.5x3.5x3.5 mm.

The structure of the nose isn't perfect, but topped a little, and afterwards the croissant form. It looks like a burn, but it isn't sensitive to touch.

Moshav Yanuv 19 or 20.9.2004

A sister of the witness to this case, called me ( Abi Greiff ). She defines her sister as a “very rationally” person. She told me, that a night before, her sister woke up because of a strong light. When she opened her eyes, she saw in the room a circular disk, about 80 cm, for approximately 1-2 seconds. The UFO had a strong light, turned on and off 3 times. Inside the disk, to her claim, there were dark spots and lamp-like objects.

She forgot about the case in the morning, but remembered again when she was at work.

The sister told me, that the object was in the air, next to the ceiling, and blinked 2-3 times. First she thought she had a dream, but now she is positive that wasn't a dream and happened in reality. The sister isn't connected anyway to the alternative field.

Kiriat-Arba 23.9.2004

Natti called me (Abi Greif) at 23:45. He told me that he and his father see from their balcony, started at 23:00, an unusual view in the sky.

To their claim “right and close to the moon there is a yellowish-white object, blinking in red”. Natti adds, that in the beginning, he saw a smaller object arrives, and locates itself between this object and the moon. The smaller object started to become smaller, and it seemed to be getting away.

His father says that the bigger object changed to a “sausage” shape and emitted a “flame”. Natti said, the object sometimes increases its light and emits “bims of light”. It seems to rotate around it self.

First they observed the object with their naked eyes, then with binoculars. They claimed the object is located very high in the sky.

Natti called at 20:45 the day after, and said the UFO is there again, but this time at left of the moon. When I (Abi Greif) went out to observe the moon, at the same time, I didn't see anything unusual there.

Ganot Junction 23.9.2004

Offira called me, and asked me very excitedly, if anyone else also reported about what she saw.

When Offira, 29 years old, drove to Beit-Dagan at 01:15, she saw a big blue light, which was fixed very low, “almost at the treetops”.

It took her sometime to understand, that what she see is unusual, because its size, like an airplane, and its elongated length.

It had a light like neon lights, coming out of it. She observed also a stripe of red neon lights at its length. She thought it's strange, because the sky were also lit with an orange-golden halo. She continued driving, and saw the UFO behind her, through the car mirror. The observation lasted about 1-2 minutes. She stopped the car and called her family member. She was very afraid – “I thought they will maybe abduct me”.

Offira says, she isn't sure, but she think the object had a rectangular shape, nose faces south.

Offira has a master degree in statistics, and she owns a private business. She said she felt like the object is “standing there and waits.” She thinks it was something energetic. She finishes her report and says: “I hadn't any scientific explanation to this”.

Sefad 24.9.2004

Oshri , a resident of Haifa, was that day in Sefad. It was 17:30, the start of the Yom-Kippur fast. Together with his friends, they noticed in the clear sky, an elongated white lump, moving high in the sky to the west. He claims it was above Kefar-Shamay, very close to Mount-Meirons' peak.

The UFO moved horizontally, and was seen for about 10 minutes. Oshri photographed it with his digital camera 5 times. The object didn't leave a trail and seemed very strange, also because airplanes do not fly at Yom-Kippur.

Carmiel 30.9.2004 ??????

Galit , who filmed a UFO in March 1996 at Ramet Ha'Hayal, again succeeded to videotape a UFO.

It happened at 02:30 in the southern part of the city. She, her brother Nadav, her mother and her friend Gili, observed an unusual light in the sky. First, they observed it through binoculars, and they saw it changes its colors. She had a video camera equipped with a powerful zoom. Using the video camera, she observed that the object was round, big, with black

dots on it. A changing color halo surrounded the object.

They went out of the house, so that the mountains will not disturb the view and noticed that there are 4 objects in the sky, colored yellow and red, hovering lightly in their place. The first UFO they saw seemed to move upwards.

Galit promised to bring us a copy of the video, for our next meeting.

Jaffa 30.9.2004

At that night, Shimon Shetzian couldn't sleep and he didn't feel well. He reports: "I went out to the eastern balcony at 03:00 and looked at the "Shalom Tower" direction, located northern then me. There, in the sky, I observed a white object, bigger and different from a star. The object disappeared after about 15 seconds. I had the feeling that I communicated with it. After its disappearing, I felt much better".

Na'aleh/ Daliat El-Carmel 1.10.2004

Hanoch Navo reports: approximately at 18:00 I saw a very shiny yellowish light, big star size, flying south-east direction. I observed it using binoculars, and I saw the bright object flies at airplane speed. The observation took place for at least 3 minutes.

A resident of Daliat El-Carmel, Abu Saffi, called me (Abi Greif) and reported, that between 17:50 to 18:30 he observed an odd object in the sky. He told me, it had a "dark red" color, and it had a tail. From the observation location, he estimated the objects' size was 15x20 cm and its tail was approximately 3x10 cm. he told me he is a conservative person, but he is sure it wasn't an astronomical object, but something unexplainable.
