

Nahariya 28.2.2005

Gil , 34 years old, reports: At 23:00 in west direction and close to the sea, his wife observed 3 lighted objects that between the northern 2 object, was a “flame like” connection. The view lasted for about 5 seconds, and afterwards, the “flame” split and the lights disappear. He added: “then I turned back, and saw a big light turning off and disappears in a second. It was big as the sun in daylight. Its’ color was a very bright yellow, and was seen for a split of a second. It was in west direction, with a slight turn to the south. It was about 700-800 meters height. To observe it, I was forced to raise my head. My wife estimates the objects moved. It a thing I can’t explain. It’s unusual and not understood. Its not like the light bombs, which I’m familiar with.”

Beer-Sheba 20.3.2005

Eliyahoo Roizman reports: “About 20:30 I saw a hovering light above the air-force museum. I observe it for about 15-18 minutes. It had the shape of 3 yellow lights, blinking at the same place. Sometimes it moved a little to the right and to the left. In the end, it took a jump in tremendous speed to the south. It had a triangle shape. It wasn't high, about 300-400 meters.”

Ma'alot 20.3.2005

Shimon Rosenberg reports: "I went out of the house, smoking, at about 18:34. When I looked at the stars, I saw something lower than the stars, moves slowly with colored lights. It had 3 lights. I asked my son to bring me my telescope ("Tasco" 50x45x15). Using the telescope, I saw the object had 3 stable lights of white, green and orange. It moved towards me in slow circles. I observe it for about 10 minutes.

At one point of the movement, it seems that the red light is located in a greater distance than the other lights. When it came closer to me, it seems that the white light turns red. Sometimes it seems that the object turns and rotates around itself. Sometimes it changed. Sometimes two lights were seen, sometimes only one and sometimes the three lights returned. Sometimes I also observed four lights.

At 18:50 I entered home to bring my camera, but when I returned, the lights weren't there. No sound was heard from the UFOs' direction. Also my son saw the view."

Tel-Aviv 22.3.2005

Luiz Cann , 24 years old, the soloist of the "Three Poison" band, says she saw a UFO. It happened about 23:00, when she was at Rothschild – Nahlat-Beniamin area.

She saw in the sky a round spherical object, colored white that moved towards the earth. She claims that she recognizes meteors, but what she saw was different. The UFO hadn't a trail, it was relatively big, and seems to be that it flies relatively low. It just disappeared in the air, as it turned off. The observation took about 3 seconds.

Ha'arava 25.3.2005

Baruch Eshkenazi took his granddaughter to a jeep trip. In the evening, when they arrived the end of the "Perfume Road", near "Ein Yahav", he took some landscape photos, southward, with his digital camera.

After he developed the photos, he saw something unusual. In 2 of the photos, there are 2 UFO reflections, round with a dome. One is red and the other is blue. Probably these are only sun reflections, on the stones background. The photos will be located on our web site.

Tel-Aviv 23.3.2005

Shimon Shazian reports: "I saw a cigar shape object, moving from the sea direction towards Shalom-Tower, northern the regular airplane path. Its silver color emphasized in front of the city lights. It had a white light on its upper part, and in its second third part, it had a red light. It moved a little faster then the landing airplanes. There where no landing lights, and it was smaller then a Boeying airplane. No sound was heard. Behind it, about 1 km from the object, an airplane arrived with all its usual lights. I saw it for about 1 minute."

Ashdod 31.3.2005

Assaf Barr , who's UFO photos were published in our previous journal, reports that the UFO was seen again.

It happened at about 17:00. According to Assaf, he had a previous feeling that it will appear again. He reports: "It happened when I went to look outside the window, as I usually do when I meditate. It happened in daylight, the exact thing I saw before. It was an amazing view. After I went out to observe it, it disappeared. I called my sister to bring me my camera, but it turned out that there was no film in the camera."
