

Beer-Sheba, 18/4/2005

Eliyahoo Roizman reports: "I followed the helicopters who were training at 20:00. Suddenly I saw 2 yellow lights arriving, while surrounding themselves like they were dancing. I saw the whole thing for about 11 minutes. Their lights were smaller than the helicopters' lights. Finally, they joined and formed one object and disappeared. I observed the whole scene through very good binoculars."

Kiriat-Ata, 26/4/2005

Aviad sent this message to our web site (www.ufoisrael.org). He investigated the witnesses – his grandmother and aunt. They claimed that above the police training camp, they saw at 19:30 a gray object with orange-yellowish lights. The object had also a cupola, and took off with halts. It was far, and they saw it through binoculars. The object was seen for some minutes.

Tel-Aviv, 19/4/2005

Shimon Shadian reports: "It happened about an hour before I went to buy a lottery ticket at 20:45. I saw a blinking light, flying from south to north above the city. It had an orange light, surrounding a red light. It moved very slowly, so I observed it for about 5 minutes. It flew in airplane altitude, not very high."

Beer-Sheba, 6/5/2005

Eliyahoo Roizman reports, that at 22:10, he saw above the center of the city, something white in about 3 kilometers height. It isn't shining, and it has a "U" shape tail, seem to move up and down all the time.

He estimated it isn't a balloon.

Havat Ha'Shikmim, 19/5/2005

A high alertness was declared in the ranch (home place of Israel's Prime Minister, Arik Sharon), after a report of Sderot citizens, about an "unidentified flying object" above Sderot's industrial area.

Cobra helicopters and F15 jet were launched. All the entrances and exits to the area were closed. "After an hour, a report came that nothing was found, no object or suspected person. The army claimed that after midnight nothing unusual was detected in the area."

This message was published in "Yediot-Ahronot" newspaper, at the 20/5/2005.

Carmiel, 23-25/5/2005

Vered, who lives at a neighborhood in the north of the city, reports, that from 20:15, she and her family see a lot of white-yellowish lights, moving fast in the sky, above the clouds, from north to south.

She claims the lights move in groups, sometimes 6-7 together. The lights are very shiny. In a specific moment, the lights changed their course, and flew one towards the other. Sometimes they had a trail. The phenomena continued and more lights appeared all the time. Some of the lights were powerful, some moderate, and some weak. Sometimes, one of the lights seems to be extremely shiny, and seem to be moving above the others. The scene was videotaped.

Another citizen of that neighborhood, named Orna, describes the view: "It seems like the stars are moving fast from north to south, sometimes in pairs." The witnesses were frightened and called the police. The police answered apathetically that they will check.

Mor, age 17, Ornas' daughter, filmed the phenomena, while putting the camera, on a stable table.

I called (Abi Greif) Shimon Rosenberg at Ma'alot – he claimed he doesn't see anything unusual.

Orna called me the day after, at 21:00, and told me, that the flying lights appeared again. She added, that last night the

phenomena continued until after midnight. While looking at the camera screen, she claimed the lights seem to become bigger and “exploded”. She said that the shape of one of them, reminded her “fetus” shape.

Vered and Orna promised, to make us copies of the movies.

Dimona, 26/5/2005

While we were in our convention at Nethania (Abi Greif), Eithan called, at 21:40, and reports that he together with 3 of his friends, while driving to the south from Dimona area, saw a big unusual white light in the sky. They stopped the car and looked at the object. He claims, he never saw such a thing.

Hadera, 26/5/2005

Levana Gafni reports, that from her house she saw, in the east, an extremely shining object in the sky, which wasn't a star. She claims that the object isn't seen regularly in the sky.

Kiriat-Ata junction, 28/5/2005

Stephan, age 15, reports that he and 5 of his friends, saw at 18:00 “a square of many lights, located lower then the clouds. First, the inner lights of the square turned off, then the outer lights. We saw it for a few seconds. The lights were colored green and red. In the end, we saw a yellow light, which flew directly, and then everything disappeared.”

Shelomy, 28/5/2005

A report in the national radio station, “Reshet-Bet”, at the 19:00 news, claimed that: “an unidentified flying object” appeared, at 18:30, above Shelomy. 2 jets were launched, and the idea that it was an enemy plane or an unmanned aerial vehicle, was rejected.

The news was published also in the internet site of “Yediot-Ahronot”.(Ynet.co.il)

Hadera, 6/6/2005

Levana Gafni reports, that at 19:30, while driving with her husband in the power station direction, she saw between the chimneys, in west direction, a very bright object, which wasn't a star. She and her husband followed it, and saw it moved to the right, beyond the third chimney. At 22:30 it disappeared, and the shiny object was never seen again.

Sha'ar Ha'amakim, 6/6/2005

Ishay Naor reports: “I went to my house from the elderly citizens' home, were my mother is. It was 21:16. I looked towards Kiriath-Amal hill, because I noticed a red object above the hill. The object was too red to be a star. It was located more than a kilometer far from me, south-east and about 400 meters above the ground. It stood still and didn't move. First I thought I see a star, but suddenly, the light moved and made a turn to the horizon, in Kiriath-Haroshet area, until it disappeared in 4 seconds.

In that time, a very high activity of airplanes was in that area, but airplanes have blinking lights, not fixed ones. Also, I indicate the fact, that the object made suddenly a fast turn, in a higher speed than a plane.

The observation took place for about 20 seconds.

Ma'a lot, 17/6/2005

Shimon Rosenberg reports, that while his regular observations, he noticed a “light orange” object, moving from south-west to north-east. He managed to observe it through his telescope for about 20 seconds. All happened at 21:04

Ma'a lot, 18/6/2005

Shimon Rosenberg reports: “At 20:30 I started my regular sky scan. While scanning north-west, at 20:53, a big star-like object appeared, a perfect sphere spreading a white shiny light. It fell down like a falling-star, but without a trail, nor noise. Its speed was very high.”

Ramla- Tel Aviv road, 18/6/2005

Benny Dorsky, age 70, reports: “we returned from an event in Nir-Zvi, which is not far from Kfar-Habad. We turned west on Ramla-Tel Aviv road, and drove to the south. I was sitting behind in the car. Through the window, I saw a landing airplane. Suddenly, a giant star-like object, bigger than a star crossed its way. The object was built of some star-colored objects. It had a long light line with a beginning and an end. It was approximately located at the height of 300 meters.

I asked the driver to stop after Kfar-Habad. I, my wife and the driver saw a star-like object, bigger than planet Venus. Above the object were 2 close light spots. A long light line came out of the bigger spot, directed to the right – west. The object stood still. It didn't move. I observed tiny light spots in the left side of the big light spot. The driver's wife said: “first, let's get out of here.” Later on, I continued looking at the object, while we were driving, till we got to Geha road, then we didn't see it anymore.

We came home at midnight. I forgot the whole matter. After an hour, I decided to call the police. The policewoman didn't make her best to help me, so I asked for the officer. The officer only opened a file (event No. 31, in Ramla police station). I asked the officer, to whom they are reporting the event. He answered that “we don't tell to whom I report.”

I'm convinced it was a spaceship. I'm not decrying. Before this event, if someone would have told me such a story, I would have made a joke of him.”

Nes-Ziona, 21/6/2005

At 21:00, the son of David Karni, had fun with his father's digital video camera. He noticed a yellowish “star”, quite low in the sky, in Palmachim direction. He started filming the object. When he zoomed at it, he noticed the object was an orange sphere, with a straight line in its upper third. I saw the movie the next day (Abi Greif). David went to the Israeli Space Authority (because he is familiar with its manager), and asked for an estimation. Opticians, who observed the video, claimed it's a helicopter. An astrophysicist claimed, it's the planet Mars.

So, we ask – why everyone said something different. And how planet Mars, appears and disappears in a few minutes? David promised to give us a copy of his film.

Mitzpe Ramon area, 22/6/2005

While driving, Ziv Nedava saw through his vehicle window, at 12:00, an interesting mountain, and photographed it with his digital camera.

When he observed his photos at home, in the first of his 3 photos of that place, he saw 3 bright objects – one on the ground and one in the sky, in the left side of the mountains' peak. Above it, something, like a piece of white cloud, is seen. In the 2 other photos, nothing unusual is seen. Ziv says: “I am familiar with photography. It's suspicious. I never saw such a

thing.”

When I spoke with him (Abi Greiff-ICFUFOR Chairman), I understood he is a photography teacher, and he wanted to get interesting pictures. This was the reason, he photographed the area. He was never familiar with UFO phenomena, and the whole matter is far from his interests.

Ma'a lot, 19/6/2005

Shimon Rosenberg went out to his regular observation, while preparing his equipment. At about 22:20, while holding his video camera, he observed a “lit spherical orange object, not very bright, between the shaft roots of the Big Dipper”. He tried to videotape the object, but unexplained, the video camera didn't work. Afterwards, “the object moved slowly to the right, and expired.”

Ma'a lot, 22/6/2005

At 22:00, Shimon Rosenberg went out of his house, and prepared his equipment. Suddenly, at 22:05, at 75?, he observed a UFO, colored bright-orange, appearing from south-east. The UFO moved in moderate speed, and videotaped until the building hid it. He continued observing in the direction beyond the building, but didn't see it anymore. Suddenly, an orange flash appeared, and it disappeared.

Ma'a lot, 23/6/2005

Shimon Rosenberg reports, that while scanning the sky, he observed a small flash of orange colored light, so he focused at

that area. At about 21:27, an object appeared and approached in front of the light, and passed exactly above his head, directed north-west. Shimon reports, that an interrupt occurred in the video-camera, while the object passed over his head.

Ma'a lot, 25/6/2005

Shimon Rosenberg reports: "I went out from my house to the bright night. Suddenly, I saw above the house a triangular object, with blinking lights. One of the lights was bright-orange. I started to film it. The object moved to south-west, as it hovers, in a circular course above my building. I filmed it until I lost it."

Shimon adds: "I had never such a busy week with UFO observations, as the week between 17/6-25/6. I want to add, that from March, this year (2005), I didn't observe anything, in spite of many hours of observations."

Ma'a lot, 26/6/2005

Shimon Rosenberg reports: "At that day, I was very busy at my work, because the graduated pupils of the high school had their final ceremony. In the day after, we invited a couple of our friends to dinner. The man told me, that in the end of the ceremony, he observed an object, like a "falling-star", falling in south-east direction. It moved very fast, and when it reached the horizon level, it split into 3-4 parts." Shimon says that the witness is familiar to him more than 6 years, and he is a reliable person.

Ma'a lot, 28-29-30/6/2005

Shimon Rosenberg reports, that in the 28/6 at 21:25, a UFO appeared, and moved from south-east to north-west, 85? above him. Shimon continued his observation, and suddenly, a quite big and lighted object appeared, and flew from west to east at 35? above the horizon. He videotaped it for approximately 6 minutes. Then the UFO moved to the north and disappeared. At 21:58, another object appeared, and flew, in a very high altitude north-west.

Shimon succeeded to film a video also at the 29/6. In the 30/6, he filmed 3 different observations.

Rehovot, 30/6/2005

Tommer, age 27, reports that at 23:30, when he went to his car in the parking lot, he saw 2 white lights in the sky, one next to each other. He said that: “everything looked like a part of some huge round thing, which seemed to be made of blue light”. The observation took place almost 20 seconds. Then it moved upwards, and a yellow “flame” opened, and everything disappeared. He added that at 04:00, when he returned to his house, he saw nothing in the sky. The object was seen south of Rehovot, between Rehovot and Yavne.

Na’aleh, Ma’agan Michael, 1/7/2005

Hanoch Nevo reports, that at 22:10, he saw a “shiny object” in the size of a “small star”, which moved from south to north. He observed it for quite a long time through binoculars, and observed it moved very fast. Suddenly, he observed a similar object, coming from the opposite direction – from north to south. The objects passed one next to each other, and, as he said, “almost rubbed each other”. Afterwards, each object continued its way. The objects were very shiny and were seen for almost 10 minutes. He says: “I never saw such a view”.

Na’aleh, Ma’agan Michael, 2/7/2005

Arik Hasidim and Hanoch Nevo, reported separately, that approximately at 21:10 they saw in the sky, a quite big, white object, moving lower than satellite altitude, in north-east. Hanoch observed it with binoculars, and claimed it hadn’t any additional lights, except of its white light. They both claim, they observed an unusual object.

Ma'a lot, 3/7/2005

Shimon Rosenberg caught a UFO on his video camera. At the moment he located his camera, next to his house at 21:39 (planned observation), he observed a shiny object moving to north-west. He tried to film it, but a tree stood in his way. When Shimon continued observing the sky, facing north-east, a "something huge" like a "giant star" lit on above him, in the altitude of 700 - 900 meters. The UFO stood still for a second, and then continued moving north. A house hid the UFO. Shimon run behind it, and succeeded filming the UFO, which increased its speed, and disappeared behind the low clouds.

Tel-Aviv, 4/7/2005

A citizen named Gali, who lives more then 35 years next to the sea shore, and permanently observes planes coming from the sea to land, reports that at 20:30 she observed an unknown and different aircraft.

She reports, that in the level of airplane flight, from the sea direction, came a triangular aircraft with 3 yellow lights, which moved in a southern-eastern course, comparing to regular plains. She observed it almost 1 minute. She claims that she learned alternative treatment, and knows that aliens participate in healings.

Ma'agan Michael, 7/7/2005

Johanana, who knows Arik Hasidim from the Kibbutz, called and reported he saw an unusual thing in the sky. A light appeared in the sky, directed west. It looked like a thin outburst, and a flash of light appeared in front of it. It moved and disappeared. The observation took no more then 2 seconds.
