

Beer-Sheba, July, 27, 2005

Yaniv reports, that around 24:00, he saw an object, in 40?-50? above him.

The object was round, and changed its lights to red-green, like a symmetric ring. The object was shining. It also moved a little. At 02:00, Yaniv reports that the object is still seen with naked eye, despite the fact he was using a telescope.

Beer-Sheba, August, 2, 2005

Eliyahoo Roizman reports, that at 21:30, he saw something strange in the sky. It was different from any known aircraft. It was a big and bright yellow light, with a very high speed blinking light, in its far end. The UFO was far away, and flew straight to the south. The object made a turn above the Air-Force Museum, and then disappeared. He reports that: "what was strange was its slow movement, without any noise. I'm familiar with RPV's (remote-piloted vehicle), flying balloons and airplanes. This was something different, strange and unusual."

Nesher, August, 2, 2005

I was sitting on the balcony (Abi Greiff), looking to the east. At 18:23, I noticed at my left, a flying object. It was combined out of 3 parts. Two dark parts in its sides and a bright part in the middle. The bright part sometimes glittered in the sky. The object flew against the wind, to the east. It moved steadily, and sometimes it seems to turn around itself. It had a flat shape (observing it from the side).

The strange thing was, it moved against the wind, keeping speed and its flat shape. If it was a balloon or a bunch of balloons, it should have a spherical shape, and not a flat shape. The object was no more than 100 meters above the ground, and was about 300 meters away from me. I estimate, its size was no more than 1 meter. The object flew away, until it disappeared in the Tiv'on direction.

Natanya, August, 23, 2005

Michal, age 13, reported that, when she was in her grandmother's house in Jerusalem Street, at 02:00 o'clock, she stood by the window, and observed the stars. She reports: "I saw something blue, coming closer. I saw it was made of blue stripes of light. It was composed of short and long light stripes. It came closer to the window, but I couldn't see a clear shape. It was located about 100 meters above me. It was sound like a track or a big lorry.

No one was awakening. I heard dogs barking and a bird on a tree was awoken and flew away. A few seconds later, after it passed away, there was a strong light – like a few flash-lights together – and from that moment, I don't remember anything.

I woke up in the afternoon, in the kitchen, located in the other side of the house. I found myself bundled like a baby, on the kitchen floor. I couldn't move for about 10 minutes. My diskmen, which was in the balcony, was broken and turned in the opposite direction. All the date on it was erased. From that day, I suffer from headaches, and I'm hoarse."

Ramat-Ha'Sharon, August, 27, 2005

A resident of Ramat-Ha'Sharon reports, that together with his friend, they see an unusual object in the sky. According to his experience, the object shouldn't be there, and it isn't a star or a planet. It is located low in the sky, in west direction.

Na'aleh, August, 29, 2005

Hanoch Nebo reports, that at 19:57, he observed an unusual object through his binoculars. The object has a yellowish color, and it moved to the north. He claims it isn't a satellite.

Beer-Sheba, September, 1, 2005

Eliyahoo Roizman reports, that from 20:10, he observed 2 objects in the sky, which he described them as "lamps inside paper lampshades". The lights moved slowly and were located in high altitude, next to Jupiter and Venus area in the sky. The lights were located closely one to the other. One of them was pinkish and the other was yellowish. They moved

slowly to the north, and were seen for about 40 minutes.

Yokne'am, September, 2, 2005

Shawn Shitrit reports: Between 21:00 – 23:00 a few yellow lights were observed in the sky. In the beginning, 3 lights were seen, after approximately 2 minutes, they disappeared. A few seconds later, a vertical sequence of 5 lights appeared. These lights faded after 2 minutes.

A few seconds later, 3 lights appeared - 2 located one above to the other, and the last one beside them. These lights disappeared after 1 minute.

The 4 witnesses to this sight are about 17 years old.

The sight was seen above Megiddo. The witnesses saw the lights from “Ya'ar Odem” neighborhood in Yokne'am-Elit.

According to the witness (Shawn), the lights were seen also on the September the 3rd, 2005. He intends to videotape them.

This sight was reported to Hannan Sabat (webmaster of our Hebrew site), and published in our web site.

Haifa, September, 3, 2005

Yevgeni videotaped, at 01:00, unexplained lights, above Nave-Sha'an ridge, in the area of the Sfaradic Elderly Citizens' Home, directed to the east.

There were 3, orange-colored lights, fixed in the sky, forming a wide triangular shape, with 15° angles in the sides, and the upper light was in an approximately 120° angle, comparing the other lights. The lights were blinking. Once one lit off, then the second, then all of them.

He claims, the lights were 30 cm height, from his point of view, above the lower-Galilee Mountains. The sight was videotaped with a digital camera, and we will see it in our next convention.

Ma'a lot July, 15 – September, 18, 2005

Shimon Rosenberg, continues his observations. Here are the results of them, between July to September. All the observations took place between 19:34 – 22:00 and most of them were videotaped:

July, 15, 2005 – a lit spherical object was “lit on” almost above him. He managed to videotape it. Afterwards, in the same area, another spherical object appeared colored bright-orange (red). It was located in a very high altitude, and it made a turn against clockwise and disappeared. The sight lasted for a second or two.

July, 16, 2005 – he observed a bright big object. Afterwards, another lit object appeared, flying in high altitude, and seem to be hidden by a close building. After a minute and a half, he saw two orange flashes of light, in south-east direction.

July, 20, 2005 – Shimon videotaped an object, which lit in the sky. After two minutes, another object appeared.

July, 21, 2005 – a bright object appeared. Its light became bigger and bigger, and shrink afterwards. He videotaped it, when it passed above him, and then it lit off. Afterwards, two flashes of orange light were noticed, directed north-east-east.

August, 10, 2005 – an orange spherical light appeared. Its light became stronger and stronger, and then it faded out and disappeared. Afterwards, another orange object appeared, for about 2 seconds.

August, 20, 2005 – a bright orange object appeared above him, and it changed its flight direction. The objects light increased, and then shrink.

The object increased its speed, while flying away.

August, 24, 2005 – a hovering orange object was lit. it made gentle and slow zigzag movements from left to right three times. In the last time, it shrinks and disappeared.

August, 26, 2005 – a lighted object appeared, and its light increased. After a few seconds, it shrinks and disappeared. Shimon managed to videotape it.

August, 31, 2005 – an orange-yellow object appeared, high in the sky. After it passed above Shimon, it increased its speed, and disappeared. The object was videotaped.

September, 3, 2005 – a big orange object was lit in the sky, not far from the moon, while increasing its lights. It moved slowly, shrinking and disappearing. It was seen for about 2-3 seconds.

September, 18, 2005 – suddenly, a very big orange sphere appeared. It flew slowly, and then when it passed Shimon, it increased its speed, shrinks and disappeared in the left side of the moon.

Marmaris – Turkey, September, 5, 2005

A UFO was photographed by Eli Joseph, in daylight, while photographing the view of the bay and isle.

We see in the photo a dark object, rounded and flat, located in the sky, not very high, in an oblique position.

The photo was taken using a high quality digital camera.

Eli didn't see anything while taking the photo and the object appeared when he downloaded his photos to the computer.

The photo

The sea shore, between Atlit and Haifa, September, 9, 2005

I returned (Abi Greiff) by bus from Eilat. I sat in the side facing the sea. After passing Zihron-Ya'akov, I noticed a bright orange light at the north. The light was lower from the urbane lights. I started following it.

When we came closer to the light, I observed that it lights strongly the clouds above it.

When we approached south Atlit, I saw that the light moves fast. Its speed was as a jet plane. The light stopped north of Atlit, and stood there lighting the sky with its bright orange light. After a minute, it turned off, and disappeared. Two minutes later, I saw it again in a northern location. It turned off after a short time, but a cloud, in the area, was still lightened. I could observe inside the cloud, a reddish lights spot. Above the sea, the light turned on again, and sent a strip of light, towards the sea. The light turned off again after a minute, and appeared again, in front of Tirat Ha'Carmel. I saw it for the last time, while leaving Tirat Ha'Carmel station (next to the sea). Then I saw it above the city, fixed in the southern sky.

My observation took place approximately until 21:20. The object was located, all the time, no higher then a few dozen meters above the sea, and wasn't far from the shore.

Michmoret, September, 9, 2005

I (Abi Greiff) returned from Tel-Aviv. At 21:05, I saw in the west, an orange dim light, located at approximately 400 meters height. It turned off after a few seconds.

After a few seconds, it appeared again, in a more southern location, comparing the first time. It was lit for a few seconds and turned off again. After a few seconds, it turned on for the third time, in a more southern location. It was lit for a few seconds, and turned off again. I estimate, the object was located next to the sea shore.

Ein Sarid, October, 7, 2005

The settlement is located in Tel-Mond area. Haya reports, that she and her husband observe for more than half an hour, a bright orange object, which changes its color to darker or lighter. It's located under the clouds, west direction. Its size is as the moon size. The witness claims, that the dogs in the area are barking loudly. At the end of the sight, at 20:30, the object seem to lower, and flew downwards.

Mrar, October, 13, 2005

This report arrived to me (Abi Greiff), as it happened, at 18:00, after “Yom-Kippur”. The report came from a local resident of Mrar, named Alia, age 23.

He reported a far yellow light, flying while changing its speed – sometimes slower and sometimes faster. The object flew to the east, and the observation lasted for approximately one minute.

Beer-Sheba, October, 23, 2005

Aviv, age 15 reports: “Approximately at 18:00, I saw a “condensed” boomerang-shape object in the sky, with a light in the center of its curve. I saw it for a few seconds, until it seem to be shrinking, and disappeared.

The object was flying in the altitude of airplanes and helicopters.
