

Bat-Yam, October, 6, 2005

Dudi Cohen, age 29, who lives in Hashmonaim St., makes routine searches and observations after UFO's. He reports about a sight he saw between 20:12-20:33. He saw a shiny yellow orb. The object was surrounded with a red halo. He observed the halo, while videotaping the object.

Bat-Yam, October, 10, 2005

Dudi Cohen reports, that from the same location he saw and videotaped the last UFO, he sees an elliptic object, with an inner red-white light triangle. The object moved slowly from north to south. It disappeared in 2 minutes inside a cloud. It was very high and far in the sky.

Natanya, October, 27, 2005

A resident of the city, who lives in the upper flat in a multi-story building, reports he sees something like a very shining star, located in south-west. The witness sounded disturbed, and asked if we know what this object is. He claimed the object wasn't seen there in other days.

Na'aleh, October, 31, 2005

Hanoch Nebo reports, that at 17:50 he observed high in the sky, an unusual object, moving from south-east to north-east. Through binoculars he saw its color changed from white to orange.

Ramat Ha'Saron, November, 1, 2005

Michal reports, that at 17:45 she saw a very shining white object. She saw it first above an electric pole, while 4 beams of light came out of it. She said it was "beautiful with an amazing light".

She drove to the north, and felt the UFO follows her. She speeded up, and could see how the UFO follows parallel to her. She was afraid and stopped watching.

Later that evening, she passes the same way, but the object wasn't there.

Comparing to the stars, it was shiny, big and with 4 light beams. The observation lasted a few minutes. She also reported that twice she felt vibrations in her house, around 2:00 o'clock.

Beer-Sheba, November, 7, 2005

Chen, age 22, saw at 20:00 a UFO while walking with her dog. She said the object was shining and was fixed for about 15 minutes, and changed its shape. She didn't hear any sound. She succeeded returning to her home, and to photograph the object with her digital camera. Then she sent us the pictures, and they were published in our Hebrew site. In the end, the object changed to a small spot and disappeared.

In the photos we see a white object, with an unidentified shape, that changes its shape. Sometimes we see only a stripe of light, and in the other picture we see something like a half circle or saucer, that half of it is in the shadow.

Hadera, November, 9, 2005

I (Abi Greiff) received the report while driving to the south on the Shore Road, not far from Hadera. Doron, age 20, called and told me that he is frightened from what he sees. "It's unnatural" he said. He called me a few times that evening. Doron saw a strange light above his house that changed its location. Late in the evening he told me the light moved away slowly

Tel-Aviv, November, 9, 2005

Eliyahoo Gilad reports' he saw an orange light above the sea, about 40' above the horizon, and about 300 meters above the water. He observed civilian airplanes fly above it, and the object was between them and the sea level. He estimated the UFO was a few kilometers from the shore, right from Jaffa location. He observed the shining light for about 25 minutes, while the light was fixed in its location. While observing it, the light lit off and turned on 3 times. In the end, it vanished and disappeared.

Karney Yosef, November, 11, 2005

Ma'ayan called at 23:00, and reported he sees a star like object, seems unusual. The UFO changes its colors from green to red to blue. It also had light beams around it, and blinked from time to time.

Ma'ayan says that he and other witnesses see it from 22:40. All the witnesses agreed the object seems unusual and never seen before. Through binoculars, it seems to be bigger than a star. Ma'ayan said: "if it wasn't unusual, I wouldn't call you at this hour."

Hadera, November, 13, 2005

This event was reported to our Internet site. The witness, a 15 y.o. teen, claims that when he came back from Tel-Aviv in a bus with his friends (from the Memorial Day to Itshak Rabin), they observed some lights. They saw 4-5 lights in the power station area (next to Hadera). The lights were fixed, big, bright, and yellow. The observation took place for about 5 minutes. The witness says the observation "was really scary".

Haifa, November, 14, 2005

Yehudit and Eyal Ram-On, who live on Ovadia St. on Carmel Mt., report about continuous observation, started at 18:10. A reddish object was seen, not high, in the sky. It moved in a round course west from them. Yehudit says that a short time after seeing the object in the first time, a lot of military jets and helicopters appeared in the area, lying above the object and beneath it, when the UFO lowered. They easily heard the jets and could differ between them and the UFO.

Eyal, observed through binoculars, and saw the object was constructed from 3 lights – 2 beneath and 1 above. At 18:30, Yehudit says that jets are surrounding the object and she hears also helicopters. At 19:10, she said that the object changed its course, and started to approach. Helicopters are always there, but they keep distance from the object.

At 20:25, the object seemed to move away, while blinking its lights, and located higher. Yehudit says that jets and helicopters are always there. She saw a jet beneath the object that approached it and circled it from distance. The UFO blinked every few seconds, moving slowly from one side to another. When a helicopter approached it, the UFO seemed to make a "jump" and changed its location.

Another UFO appeared at 21:40. The first one seemed to be fixed, and the other circled it. They both disappeared in a few minutes. At 22:10 a loud sound of jets and helicopters was heard, and one of the UFO's appeared flying to the north over the sea.

5 minutes later, Yehudit saw a helicopter flying from north towards the sea. Then everything returned to be quiet. They didn't see nor the UFO, nor the jets.

I (Abi Greif) arrived in the following day to the witnesses' house. It turned out that the observation took place from the kitchen's window, not bigger than 7 meter in length, and faces the sea. In front of the window, I saw the near apartment roof and water tank. I assume that the UFO moved only in a small sector in the sky (because of the small observation window). According to the witnesses', the UFO was big as an airplane. The couple reported us in the past about a UFO, that seem to fly diagonally and then straight north, along the sea shore.

Yehudit also told me about a self experience. In the past she spoke with a healer from Jerusalem, because she suffered from a health problem. After their talk, a light orb “exploded” next to her, and (according to her claims) her problem disappeared in the next day.

Herzelia, November, 20, 2005

Shua Adi, who is standing on her balcony reports, that she see an unusual huge shining star-like object, different from usual stars. She claims it's the first time she observed this object. Its shining, and it seems to be like beams of light coming out of it. She claimed she has a big house, and she can see the object from any of her windows. The witness sounded disturbed about this observation (Abi Greif).

Moshav Petahya, November, 28, 2005

Ariel, a bakery employee, reported: At 01:30, the witness's daughter went to take a shower. She heard noises coming from the yard, and she thought that there is a possibility that robbers broke into the house, or someone is trying to steal the vehicle. She turned the lights in the yard on, but she didn't see anything unusual.

The witness's mother-in-law told me in the morning, that she heard the dogs bark, between 02:00-3:00, but she didn't pay any attention to the dogs.

After 07:00 in the morning, the witness's wife went out of their home, and discovered elliptic signs of imprinting in the house yard. The yard is assembled from hard pressed coarse sand and small stones. The woman called her husband, and he called the police. The police send a team of scouts, and then the police called Mr. Abi Greiff (chairman of ICFUFOR).

At first, the dogs didn't want to approach the imprinting, and avoided entering the area. One of the dogs made its needs near the imprinting. Only after a few hours, the dogs entered freely to the imprinting.

The police scouts, checked the house and its surroundings, but didn't find clues. When they weren't able to get into any conclusions, they indicated in their report, that it is a case of a UFO. The scouts decided that an object came from above and probably left in the same direction. They couldn't decide what this object was. Any signs of an object brought there by someone, or signed of a dune buggy or any other vehicles, were rejected by the police. According to the police scouts, a tire sign, seen in the area of the imprinting, was made there a few days ago. The witness videotaped the police arrival.

According to the witness, a helicopter hovered above his house, shortly afterwards (probably to scan the area). Hannan Sabat, the ICFUFOR investigator, arrived to the area (thanks to the witness's invitation), about 11:00. Beside the witness's family, or the police, no one was allowed to get there. With the witness's help, he was allowed to check the area and photograph the imprinting (using a T70 CANON camera, and an AGFA color film, ASA-200).

Signs in the area and the sings of the imprinting:

The central imprinting is about 1.5 – 2 meters in diameter. It had a spiral shape, and reminds an oval elliptic shape. Extensions, turning outside, where found in the surrounding of the central spiral shape. The imprinting was shallow, about 1-2 centimeters in depth. The imprinting had a different color (brighter) then the soil around it.

Some of the stones in the imprinting area were pulled out, and some of them remained lying near their original niches.

Next to the main imprinting, a deep ditch was seen. It was about 10 cm deep and 1-1.5 meters in length. The ditch wasn't seen there before.

Near the ditch a telephone pole found, with soot marks on its two devices. One of the devices (colored black) was covered with "V"-shape marks (one above the other). The second device (colored metal-gray), was covered with some soot. These marks weren't there before.

Some of the grass near the imprinting was covered with a gray dusty material (and thin sand).

Some building blocks, located near the imprinting, changed their color (according to the witness).

A plastic rope, found next to the building blocks, was stuck to itself. Also this situation wasn't noticed before the event.

According to the witness, there was another smaller imprinting next to the main one, but the policeman erased it (with their boots), when they came there.

Hannan Sabat took 35 pictures, and the witness made a video footage (about 10 minute's length, additional to his own photographs).

The footage and the photographs can be found in our Hebrew site, and in the main UFO sites ([ufocasebook.com](http://ufocasebook.com), [hbccufo.com](http://hbccufo.com), [rense.com](http://rense.com)) and UFO journals in the world.

Petah-Tikva, December, 7, 2005

Itay, a former air-force soldier, reports that at 19:30 he observed 2 UFO's. One of them came from south and the other from east. They flew very high, but he could see them well. One of them made a half turn before disappearing. The UFO's were rectangular, lighted in orange light, and with additional lights around them and in their center. Their lights were blinking. Itay reports, that the whole UFO blinked, not as appear in jets with lights attached to them.

Lehavim, December, 10, 2005

Sigalit, age 18, reports that at approximately 23:00 on her way to a friend, she observed near the water tower, in the heights of few dozen meters, strong green, blue and yellow flashes. She observed this for some minutes. Sigalit adds, that "the dogs barked like crazy". No sound was heard, or any explosion. The witness sounded frightened (Abi Greif), disturbed and helpless. She doesn't understand what she saw.

Haifa, December, 14, 2005

Yavgeni, whose reports were published also in our previous journal, saw and videotaped again unexplained lights. He observed the lights from 1:00 above Galilee Mountains. In the footage we see a fixed orange light, and some white lights (sometimes in pairs) approach this light from its left side, and disappear in the same sky sector. Some of the lights unite with the other. We also see in the footage, 2 lights moving from the right. Then we see lines of 8-10 lights moving to the left (west). At 5:00, with dawn, Yavgeni videotaped lights that moved above the ridge and disappeared behind it. We also see a pair of fixed lights. Yavgeni uses an 18 mm Sony camera and a tripod.

Bat-Yam, December, 30, 2005

Dudi Cohen saw and videotaped a rectangular UFO at 1:14. The rectangle had 3 lights. In the footage, we can see 3 lights in yellow, red and green. In some part of the footage, the lights seem to be white. The object is blinking, and changes its position. In the footage, we can see also a small white object, flying near the rectangular one. You can watch the footage in our Hebrew site.

Beer-Sheba, January, 14, 2006

Yavgeni, a soldier in compulsory service and his friend, were at 1:00 in the city's industrial area. They observed a rectangular UFO in the sky, with 4-5 white lights, which flew quickly at "a helicopters height". Then it vanished and revealed again for more 3 times. According to Yavgeni, it was a very big object, and it flew without any sound or noise. The observation lasted for approximately 1 minute.
