"L'arrivée d'une nouvelle institutrice dans le petit village de Bazulles-les-Bois va troubler la quiétude de la petite communauté, surtout quand d'étranges apparitions se manifesteront ..."

Cette nouvelle de fiction, entre "Rencontre du IIIe type" et "La soupe aux choux", a l'avantage de présenter le phénomène OVNI (objet volant non identifié) dans son contexte habituel (le témoignage humain, ici celui des personnages) et objectivement dans les descriptions (phénomènes lumineux) ...

A quoi attribuer ces traces de végétation brûlée dans la clairière?

Quelles sont ces mystérieuses sphères oranges qui survolent le village?

Existe-t-il un lien entre ces phénomènes et certains personnages troublants?

Autant de questions qui nous plongent dans l'univers déconcertant des OVNI.
