NIVFOs Trykkeri, Trondheim

EUROPEAN UFO/UAP NEWS LETTER (EUN)

*is a magazine applied to inform
about UFO/UAP cases reported from
European countris.*

*EUN will be published four to five
times a year, and is available
only by exchange with other public-
ations.*

*We are agreeable to allowing some
of our material to be reprinted if
copyright is not claimed.*

FROM THE EDITOR

This is a test edition of the
European UFO/UAP Newsletter,
published this time by NIVFO
in Norway.

We hope this newsletter may
be used as a forum for the
critical UFO/UAP research
organisations in Europe. We
think these organisations un-
til now not have had any kind
of forum to debate the various
aspects of this matter.

The organisations listed in-
side the magazine (and others)
are free how to use their pag-
es, maximum 4 per organisation.

We think it is better to use
the English language in the
newsletter as it will be sent
to countries in all parts of
the world.

Messages or/and material sho-
uld be sent to:

CEPS/CENAP

THE HESSDALEN REPORT

NIVFO

THE HESSDALEN REPORT
NOW IN ENGLISH !

The Hessdalen Report is a new english languaged booklet from NIVFO, which gives a total picture about the sightings in the little valley of Hessdalen in the Mid-Norwegian mountains. The lightings have been observed from 1870, Jan S. Krogh tells in his report. But the majority of the observations in his report were seen by thousands of people in the 1980s in an area which covers not only the tiny valley but an area of the size of Luxembourg.

NIVFO was the first instance which received reports from the area. The institute started in 1981 investigations and has worked with the case until 1984 when the case was ended. In April 1984 NIVFO in co-operation with the Norwegian Meteorological Institute operated a meteorological station in the area to find out if the conditions could create plasma lights. Other results from the measurements gave valuable help to the Scandinavian meteorologists in making weather forecasts during the 1-month long expedition.

NIVFO found out in coloboration with Dr. tech. Thomas McClimans that conditions as they are in Hessdalen may create plsama phenomena, but other 100%-natural phenomena like light from stars, airplanes, meteors and other objects (NOT UFOs !) may have been observed by the lots of people who found their way to the remote Norwegian valley near the town of Trondheim.

The Hessdalen Report also gives a valuable help to UFO/UAP researchers in their work how to find natural explainations of observed lights on the sky even if they are watched in Nice or Seaford, Delaware and not in Norway.

The area has been a UFological Mekka for the flying saucer believers. This was confirmed when the UFO-pope himself, J. Allen Hynek, in 1985 visited Hessdalen together with the Norwegian UFologists. It seems very difficult for the UFologists or supporters of the UFologism to start finding natural explainations of such sightings. W h y ?
