

PROJECT HESSDALEN

No. 2
1983

box 14 N-3133 DUKEN
Norway

Tønsberg nov.16.

Its been a little more than a month since last buletin, and that is a little long. But I think it is better to send out these sheets more rearly, than spitting out dozens of unworthy words just to fill out. Believe me, when things really start to happen, you will know.

Since last:

You will find enclosed two pages written in norwegian. This is supposed to be spread out to all households in Hessdalen and nearby areas. (approx. 3000.) The most written page is a short info about the project. The second is for their own use, to fill in and send to Leif Havik, if or when they see something. Enclosed in the sending there will also be an answering-envelope with the postage allready paid. These two envelopes and the two pages are now being printed in Sweden by UFO-Sweden. The pages are worked out by Erling Strand UFO-Norway.

Seconly you will find page 2 from Leif Havik. As you see the sightings are still going on. Lets hope that they will keep on appearing in january also.

I will also thank J.Allen Hynek for sending a letter to this address, saying that he has put in some PR for the project in The International UFO Reporter, in form of an account. Centre for UFO Studies also had a board - meeting the first saturday of november, so we have great hopes that there will be some contributions from "over there". He is mentioning that it would be important to have a spectrogram of the lights, and I can answer that right now, that we have the equipment for doing so, we're just waiting for the right opportunity.

From UFO-Sweden we have resieved lists containing all kinds of persons supporting the project one way or another, and data showing in what way they are involved in this matter. All this is computerised. I've also recieved a computerised list of names / addresses ready to stick on the envelopes.

At last I will just say that the week end nov.19-20., the Working Committee will have a meeting in Hessdalen, and we hope there will be more than just the talk. We will be loaded with photographic equipment, you guess for what reason.

Odd-Gunnar Røed

The coordinator signing off, until next time:

So long.

TIL ALLE HUSSTANDER I HOLTÅLEN OG MITRE GAULDAL

I disse distrikter har det vært flest UFO-rapporter de siste to år. Ingen sted i verden har hatt så mange rapporter på så kort tid. Dette gjelder spesielt HESSDALEN.

PROSJEKT HESSDALEN

Prosjekt Hessdalen er et uavhengigt prosjekt støtt av UFO-Norge, UFO-Sverige og Foreningen for PSYKOBIOFYSIK.

Målsetningen til dette prosjekt er å finne en forklaring på alle de uforklarlige lysfenomener og UFO i distriktet. Hvis vi ikke finner en forklaring, håper vi i alle fall å få nok bakgrunnsmateriale til kunne fortelle litt mer om disse fenomen.

Vi vil ikke klare det uten din hjelp

Vi trenger å vite mer om hva dere har sett. Hvis dere har sett noe, så fyll ut skjemaet som følger med dette brev. Husk å få med navn og adresse, slik at vi kan kontakte dere igjen hvis det blir nødvendig. Legg det utfylte skjemaet ned i konvolutten som følger med, og send det så fort som mulig.

Hvis dere skulle se noe uforklarlig igjen, så ring til:
Leif Havik, tlf 074-34225, 7490 Rognes.

Vi er også i ferd med å bygge opp et billedarkiv, hvor alle bilder som er tatt av fenomenet er samlet. Hvis du har tatt, eller kjenner noen som har tatt, bilder, så la oss få vite det.

Hvis noen av dere skulle ønske å støtte dette prosjekt økonomisk, kan dere gjøre det ved å sette inn penger på postgirokonto nr: 4022356, eller bankgiro nr: 24202533945.

Tusen takk for hjelpen!

NAVN:

ADRESSE:

TLF:

Født:

Jeg har sett noe som går under kategorien uforklarlig lysfenomen eller UFO.
Dette så jeg:

(Fortell hva du så, hvor du så det og når du så det. Lag gjerne en tegning. Hvis har sett flere ting på forskjellige tidsrom, så skriv ned alle hendelsene. Kontakt oss hvis du ikke får plass på dette arket, tlf: 074-342 25, eller send et eget brev til:
Leif Havik, 7490 Rognes.)
(Navn vil ikke bli benyttet offentlig uten nærmere avtale.)

PROJECT HESSDALEN.

Rognes, November 2nd. 1983

Sightings in Hessdalen:(and areas nearby)

Thursday, Oct. 4th 1983

(Jon Aspås, Tel.)

Two helicopters from Norwegian Air Force, seen nearby the mountain Rogne, -north-east in H.d.

The first came from Røros, and circled near Rogne before it landed near the top. Jon Aspås saw some men walking around the helicopter. After a while it went away with a box or something, which hang under the copter.

Minutes later an other copter came to the same area, but this one passed before it returned to the Røros direction.

The Air Force have shown a very great interest in this area in the last few months.

oo-oo

One day in the 42nd week.

Object seen when it passed F.høgda on its way to north. An airplane was seen at the same time. (R.M.Moe)

Oct. 16th at 07.36 pm. an object was seen near ROGNES, shining with a bright white light. (K.Malvig)

Thursday, 18th between 07.00 and 07.30 pm. Shining with bright light, near F.høgda. (R.M.Moe)

Thursday, 18th at 05.45 pm. (R.M.Moe)
The witnesses were on FINSÅDALEN.

Object passed from east to west above ØGGDALEN. One could see the mountain LITJFJELLET behind the object, which dived in Øggdalen.

Wednesday, 26. at 05.00 (ca) a.m. (I.Lillevold)
The witness was driving along the road from Ålen to Hessdalen. Then he saw an object like a triangle at the same place on which he had seen an object earlier. (Page 1., Sept. 29.) The object was seen with the mountain Rogne behind, and it was as large as the moon, in full size. Slowly it changed the very bright lights to weaker intensity.

Sunday, 30. at 05.29 pm. (L.Havik)
Yellow warm light was on an object which passed STØREN to north. The shape was oblong, and the speed was like a hanglider.

About Seismological Equipments.

From approximate November the 15th, this equipments will be used in H.d., and for a period on six months.

An informative meeting will be hold in Hessdalen Samf.hus, on Saturday the 19th of November. The Project Hessdalen Committee should also be there.

In cause of the last weeks very bad weather, I have not been in H.d. Geological maps are received in one sample. I will be on a meeting on Geologisk Inst. on the 3rd. Nov. L.Havik
