EDITORIAL

The happenings in Vallentuna Community in the end of March this year, when, among other things, a man states having been sucked up into a hovering craft, and in this undergone an examination by space-creatures, have not yet been thoroughly examined. The big report, which was promised in the previous issue, will therefore, for obvious reasons, have to wait until a later point of time.

UFO-Sweden will gladly receive your magazine, or newspaper clippings on UFOs and other strange things and happenings. Please send all such material to: RIKSORGANISATIONEN UFO-SVERIGE, Box 311, S-591 00 MOTALA 3, SWEDEN. UFO-Sweden Swedish magazine "UFO-Information" is printed in off-set, and you can send for it through our Box-address for a cost of US \$ 10.00/year (6 numbers).

IN THIS ISSUE:

FOUR GIRLS EXPERIENCED A PERIOD OF UFO-OBSERVATIONS DURING THE SUMMER OF 1973	PAGE 1
LUMBERMEN SAW NOISELESS PHENOMENA LAND	PAGE 4

FOUR GIRLS EXPERIENCED A PERIOD OF UFO-OBSERVATIONS DURING THE SUMMER OF 1973

FOUR SCHOOLGIRLS in the ages 19 - 14 years, were in the summer of 1973 living on a working site outside of Liared Community, in the Province of Älvsborg, Sweden. Their idyllic existence was on several occasions disturbed by suddenly emerging flying objects, which they themselves want to call "flying saucers". One of the girls, Eva Rosendahl, has written down her and her friends' observations, and equipped her report with a sketch over the area and the saucers' passage over the sky. The curve that shows the direction of flight is more strongly marked on the places where the saucer glowed with a more intense light.

Eva Rosendahl's story is reproduced without comment, and largely in an unaltered condition.

THE PLACE, WHERE our observations was made, is located just outside of Liared Community. The first happenings occurred on the night between June 25th and 26th, 1973, between 24.00 and 02.30 hours.

MY FRIEND MARIE KARLSSON, 16 years old, made the first observation. She has never before in her life believed in UFOs, or even reflected over the question. We placed ourselves by the window of my room, which is marked on sketch 1 as the "viewing-point".

FIRST OF ALL I would like to say, that I have gotten the explanation that it should have been the evening star, but after this "period", the evening star was clearly visible. It was much smaller than the objects we observed, and moved constantly and much slower.

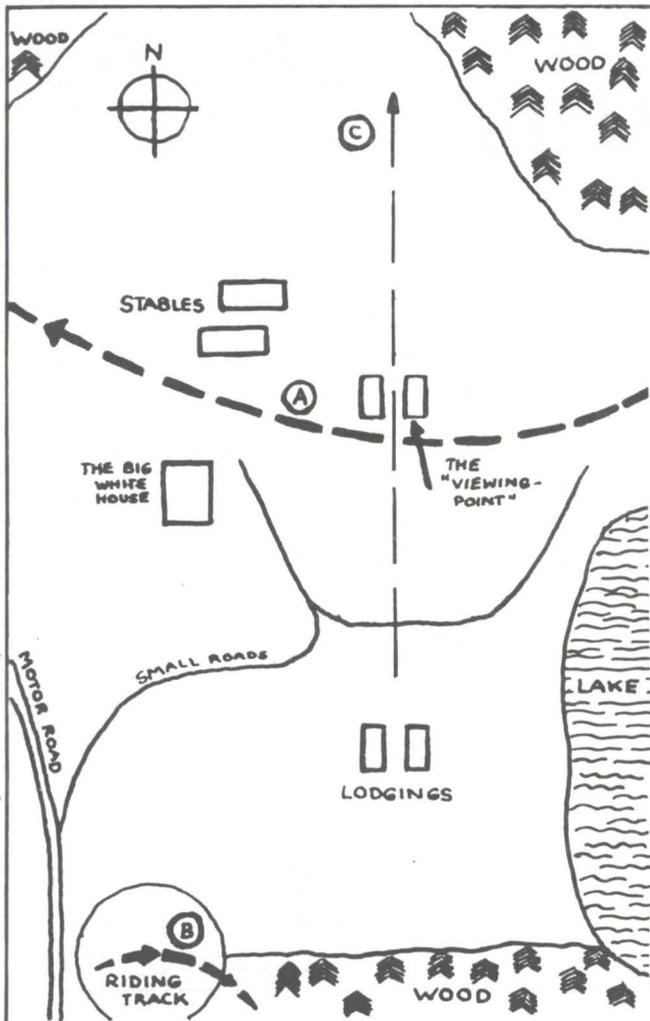

Fig. 1

- (A) The course of the close-observed UFO, June 25/26, at 00.50 hours.
- (B) Small UFO, July 1, at 22.15 hours.
- (C) Two small UFOs who flew northward.

WHEN WE SAT BY the window, we became aware of a big shining object. Its course is marked out on sketch 2 with the continuous line. The sharpness of the line indicates when the UFO was brightest respectively darkest.

THE OBJECT WAS MUCH bigger than the other stars and changed color from white to orange. It moved in a circle-shaped course upwards and towards us, to become weaker and disappear in southwest direction. The arrows indicate the direction. The object also moved up or down, and "to and fro".

ABOUT 01.30 HOURS, there came two small UFOs with an interval of about ten minutes. They acted about the same, came from the west and moved irregularly. They stopped, "trembled", moved another bit, and so on. Every time they stopped, they turned light yellow-white, and every time they started off again, they turned blue-violet-red. The speed was rather high. It all happened in just a few seconds.

WHEN THEY REACHED the bigger shining object, they stopped for several seconds, and sort of "quivered", "trembled" a little. Then they continued down towards the forest, just sort of fell down, the light weakened, got darker to red and went out and disappeared.

THE BIG OBJECT was then as strongest that night, and shone in orange. Marie and I felt creepy, and just before the small objects appeared, Marie said: "Now it's going to happen something, I can feel it." I did of course not feel anything, but so she said every following night, just before something happened.

thing, but so she said every following night, just before something happened.

THE NIGHT BETWEEN JUNE 26TH AND 27TH - BETWEEN 23.15 AND 02.00 HOURS

ABOUT 01.30 HOURS in the night, there came a small UFO (the broken line, sketch 3) from the west. It looked like a star, was constantly yellow and flew absolutely horizontally with an even speed to the big UFO. When

the small craft was close to it, the big UFO rose very noticeable, up to the level of the smaller object. The two lights then "melted together" and became as one light.

AT 24.50 HOURS, there came from the east a couple of intense yellow lights in a row, slantingly upwards. Hard to tell how many there was. They went out slowly, and for a second or two there was a gleam, as from metal. Then it looked as if it "turned" itself, and a dark, oval disc appeared on the sky. After a couple of seconds, there appeared a fire-colored, bright light around the "disc". It began to roar. A strong, even roar, as if you're pressing out a lot of air. The sound came a good bit after the UFO. Then it turned again, and we saw it from the side, in silhouette, somewhat from below. On the top, there was a row of brightly shining light-green lamps. Below these there was a row of yellow and red lamps, and some red ones on the underside. When it flew away, there could be seen only three differently colored lamps, in yellow, green, red. It flew away from us with an even speed, and the light weakened as evenly until we saw nothing, but only heard the roaring diminish.

DURING THIS HAPPENING we were wholly shocked. The youngest girl cried. We rushed in wild panic, when the paralysis sort of ceased, up to the big house, and stayed there until we had been calmed by parents, who thought we had gone nuts.

I WOKE UP several nights after that at the same hour, and just lay in cold sweat in the bed. The others experienced the same thing during a couple of nights (we dared not keep any vigil for some time). The morning after, the 16-year-old girl drew these pictures, without having ever seen a picture of a flying saucer. (I have now copied them.) We were this night four persons in the ages 19, 16, 16, 14 years, who saw this.

THE NIGHT BETWEEN JUNE 30TH - 31ST, BETWEEN 23.00 AND 01.00 HOURS

TWO MINUTES TO 23.00 HOURS, there came a small UFO from the west. It was bright yellow and shone almost as the big "star". It weakened and sunk, sort of floated downwards. Turned reddish and went out. At 23.00 hours, the big "star" appeared from beneath the first group of trees (one could catch a glimpse of it from between the trees). At first, it was wholly orange.

AT 24.20 HOURS, the big "star" pulsated from a white dot to radiant orange. We then thought that something was going to happen, but it slowly

- On the evening of June 30.
- (A) At 22.58 hours, a small UFO came in from the west.
- (B) At 23.00 hours came the big "star".

weakened and disappeared, as the previous nights.

THE NIGHT BETWEEN JUNE 31ST AND JULY 1ST, BETWEEN 22.00 AND 24.00 HOURS AT 22.15 HOURS, Marie and I were standing by the big white house and saw a UFO, brightly yellow-orange. It passed over the riding-track, turned towards the forest, where it turned red, floated downwards and disappeared, just like all the others.

THIS PLACE can not be seen from our usual viewing-point.

AT 22.52 HOURS, the big "star" came. First it was like a feeble dot and grew stronger until it became as biggest and orange-yellow. Then it started to move. It looked as if it was coming right towards us.

WE HAVE UNFORTUNATELY not kept any more vigil, since we had our work to do. But the following nights we saw only usual stars.

ON JULY THE 7TH, about half past twelve, I saw the "star" - UFO again, however. On this occasion it shone very bright in yellow and orange. The lights did not shift, as in a usual lamp, but seemed to "go around each other", sort of rotating.

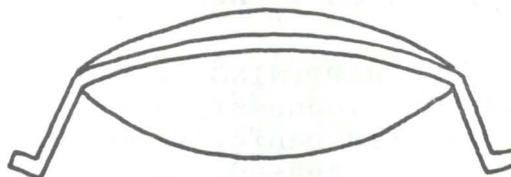

WE HAVE ALSO, during this observation period, when we have walked out of the house, seen "s t a r s". Very small, and yellow, they have moved straight upwards from our house, and straight northward. They have had a constant course, color and speed, until they have disappeared against the rosy color of the sky, over there by the horizon. It can only have been a matter of seconds for them, to cross half the firmament. They are marked out on sketch 1.

Lumbermen who saw noiseless phenomena land:

"UNNATURAL AND HORRIBLE"

"I EXPERIENCED THE observation as something unnatural and horrible."

MR. FOLKE ENGMAN was on the morning of May 13 this year, together with his companion Mr. Hjalmar Söderberg, witness to something which he describes as almost horrifically unnatural, at the home-village Bak-sjöleden, outside of Fredrika Community, in the Province of Västerbotten, Sweden. The two men, who are working as lumberers, were about 06.30 hours in the morning on their way to work in a car, when they observed a noiseless phenomena coming down to land beside the road.

This is what the object looked like, according to Folke Engman and Hjalmar Strömberg - grey-colored and about the size of a car. During the landing maneuver, two "legs" were folded out from the body of the object, to serve as landing gear.

"IT WAS HJALMAR who first saw the object," relates Mr. Folke Engman. "He first thought that it was an airplane, and that it flew at a surprisingly low altitude.

"WE STOPPED THE CAR, and went out to take a closer look at the object, which we apprehended to be hovering in the air about 300 metres from our observation point. The phenomena was totally noiseless - even when it landed!"

MR. FOLKE ENGMAN and Mr. Hjalmar Söderberg apprehended the object to be about the size of a car and grey in color. During the landing maneuver, two "legs" were folded out, and did apparently serve as landing gear.
