The Crimean highlands of Karabi have always attracted lovers of romance and scholars from around the world. The reason for this is the mysterious signs on Yaylanatami points and heights of the Karabi plateau. In the places where the legendary "butterflies" are, famous local historians and scientists compared them with images in the Nazca desert, saw in them the name

new tamga of the Crimean khan and even read the divine meaning... In the sixties, after Gagarin's flight, in the USSR many were we are space and new anticipated from coverings. At the same time, the film "Memories of the Future" was released. The people of Crimea became infected with the mania of science fiction together with all of us. Both ordinary people and specialists searched for traces of extraterrestrial civilizations literally everywhere. The figures on Karabi came in this plan as

it is impossible by the way.

Alas, dizzying guesses and reasoning The artilleryman, Lieutenant Colonel in Reserve Hermann Herzen, whom we went to during our own investigation, crossed out.

"What spaceships?" he laughed. - There have never been aliens there. The military were.

And Herman Germanovich willingly showed a hundred previously classified cards with coordinates of the Karabi plateau. In the places where the legendary "butterflies" are, the gun targets are indicated.

- We were sent from Zaporozhye to the Crimea in 1948, - the officer shared. "I was the commander of an artillery reconnaissance platoon." In front of us

set the task of carrying out geodetic works and planning of the future artillery range in Karabi -

Yale. Two years later, it was all over. The range was intended for counter-firing at enemy firing points. Used as targets

those same "butterflies".

It's not really a secret letters, and the silhouette of the artillery tools.

UFOBUA continues to work

In 2008, more than 20 reports of UFOs in Ukraine (led by Kyiv and Crimea) were entered into the national UFOBUA UFO archive. The main observations were made in the spring and in the first month of summer.

On the site "Ukraine anomaly

We received a dozen new photos of UFOs in Ukraine (the bulk of which was identified by experts as a fake, single shots failed it is impossible to identify due to opportunities to hold a full-fledged examination of photographs).

We especially want to note more

UFO photography in Ukraine in recent years (due to the growth of digital technology), but, to unfortunately, the main part such photos — spots and glare of natural at childbirth.

There are still few jokes.

Interesno

ÿÿÿÿÿÿ:

- In 2008, the UFODOS club turned 10 years old
- In December 2008, the site <http://ufodos.do.am> from celebrated his first day of rye denia
- Website <http://ufoinv.pochta.ru> is not updated (he can be considered dead)

[BULLETEN U F O D O S]

N L O „ K G B and S B U

Governments reveal their secrets about UFOs. So far, ufologists have not found valuable data in them, and in Ukraine there are no such secrets

On October 20, the British Ministry of Defense posted 19 files with documents about human encounters with aliens. This is the second batch of secret materials open to the public. Her Majesty's first military department issued it six months ago. And in four years it will reveal another 200 secret files. Last year, France became the first country to share its secrets about aliens.

However, no data to understand the UFO phenomenon has yet been found in the declassified materials. All of these documents are records of interrogations and testimonies of people who allegedly saw or came into contact with extraterrestrial civilizations.

For example, the author of one of the letters describes in detail the contacts with green creatures that began in his childhood. He writes about meeting an alien and trying to arrange a meeting with the government. However, members of another alien race prevented this by killing the alien.

The popularity of such resources is incredible. So, after the publication of archives about UFOs in January last year, the site of the French National Center for Space Exploration was visited by 200,000 people in the first day alone. man. And the British site with the opened archives on the first day was visited already by 264 thousand. Internet users.

"The most valuable, as usual, is hidden," Ukrainian ufologist Maxim Kozy roared. He, like many other UFO researchers, prefers to look for information about a couple of normal phenomena in other sources: newspapers, magazines, eyewitness accounts. "On the Internet you can find a lot of questionnaires for UFO eyewitnesses, e-mail for communication, and even the phones of ufologists themselves. And, I will say, people apply periodically, and ufologists work with them very actively," he says. According to Kozyrev, the whole truth about interplanetary contacts states will never open.

Ukrainian special services have nothing to reveal to the public yet. Sergei Kokin, deputy head of the SBU archives, claims that he has not met with such documents. As he told 24, the notes and reports of the Ukrainian KGB to the Central Committee of the Communist Party of Ukraine about the extraordinary situations did not mention meetings with what could have been of extraterrestrial origin. "Such documents may be in the archives of other KGB departments," Kokin admits, "but no one has purposefully examined them, because UFOs do not pose a threat to Ukraine."

A former member of the Central Intelligence Agency said in a comment to "24" that Ukraine, even if it wanted to, would not be able to open its archives on paranormal phenomena due to their absence. "Usually, when such information comes out, it means that the government wants to distract people from something more important," he said.

Author: Sergey Vysotsky, "24", Yaroslav Zagoruy, "24"

In October, Kyiv's Women's Magazine published a comment by Ya. Sochka on temporary anomalies in Ukraine.

Usually when appears similar information that means that power wants distract people from something more important

On the evening of June 21, Har Kovchans saw a UFO in the sky ... which actually turned out to be a bunch of balloons (as evidenced by binoculars, a telescope and a camera).

[Tom 1 . v y p u s k 1]

Primoy reportaz

On December 1, a resident of Yalta, Osmanov, called us Timur (30 years old) and excited He told how he had been watching the city of UFOs for several days, moreover, filming it on a video camera. UFO

look like two stars daughters, but at magnification (x500) it is visible on displays characteristic of ufology "plates" (sometimes

Ilya minators, superstructures are viewed ... - however, with this increase, the facts are subjective rather than objective). An eyewitness keeps us informed of events by telephone for several days now - UFOs

are as on races scripture - hang in one place and slowly move from place to place. An eyewitness dreams has on video, and when the film ends, runs to the nearest store.

We responded by As far as possible, our informants were informed nearby

areas, magazines newspapers and television. An eyewitness convinced us that the chance on de is lost study not an unknown phenomenon. Now perhaps - the most important thing - that journalists armed with photo equipment arrived captured and confirmed the fact of the appearance of UFOs over Yalta.

And we meanwhile start on the computers of a virtual planetarium

mind WIN STARS and obna blushed over Yalta in evening her time me all ma jar kie

Jupiter and Venus are low above the horizon in the southwestern part of the sky (although these astronomical objects have disappeared zayut from the sky to 19 hours, and according to Yalta

he watches them until midnight). Can the atmosphere distort the stars yes to "plate" type? Maybe, of course, but with according to an eyewitness, these stars yes behave quite meaningfully - move, change shape and consequence suddenly disappears zayut. The decisive tool to put an end to this story will be a comprehensive analysis of the video

shooting (several hours), which sooner or later will hopefully be carried out. As events unfold, we will keep our readers informed of this story.

1992, August 24, Crimea - the first Independence Day of Ukraine. A photo of a suspicious UFO for the newspaper "Alien" provided by A. Anfalov.

Planets Jupiter and Venus the most often (from astronomical objects) act as UFOs

Vam zaplatit .. yyyyyyyyy!

It opened a few years ago in Sevastopol representation of an American company «UFO Abduction Insurance Company ». Ka waiting for the willing pre possible delivery ability to get fear

howling policy for ten million dollars. In vol the contract means moose that the specified sum ma will be paid straight to the keeper "in the case of the dock the fact of abduction you are an alien we". Insurance agent

claimed to be eight years of market presence insurance services companies use almost fifty thousands of people all over the world.

Photo of "suspicious UFO" by Kanyuka VE (Zaporozhye).

UFOLOGICAL LITERATURE

Ufology does not study aliens or hypothetical extraterrestrial life forms (there are other sciences for this). Ufology studies flying objects that cannot be identified with anything known.

There are about fifty hypotheses about the origin of UFOs, and an alien one is just an ordinary one. The assumption that UFOs are alien spaceships is tantamount to claiming that UFOs are time machines of our descendants.

The first photograph of a UFO in history was taken on August 12, 1883. Mexican astronomer Jose Bonilla, photographing sunspots, noticed strange objects against the background of the Sun (in 2 hours he counted 283 objects).

The complete catalog of observed forms of UFOs includes 250 drawings. The classic, that is, the most frequently observed forms of UFOs are 32.

The UFO invasion of the Soviet Union in the late 1980s was not related to their intensification. Just in 1989, the Office of the Glavlit of the USSR, with the assistance of the Council of Ministers of the USSR, lifted the previously existing restrictions on the publication of information about UFOs.

Terms such as unidentified radar target, anomalous aerospace phenomenon and the like are used in official sources to refer to UFOs (unidentified flying objects).

Ufologists study not only UFOs. There are dozens of phenomena and disciplines (meadow phenomenon, ocean circles, paleocontact, livestock injuries, contact, etc.), which are necessarily within the interests of UFO researchers.

Pliny the Elder first classified UFOs (Guy Pliny the Second, 23-79) - ancient Roman writer and historian. He divided them into Discoids (disks), Pytheas (barrels and balls), Serati (horns) and Lamps (burning torch).

June 27, 1967 Wu Tang, then UN Secretary-General, told the New York Post: I believe that after the Vietnam War, the most serious problem facing the UN is the UFO problem.

Fantastic speeds and maneuvers of UFOs, including 90-degree turns, can be explained by the ability of such devices to zero inertia and gravity. Modern scientists are working to create such a technical device.

The term UFO is borrowed from the name of the secret departments (Unidentified Flying Objekts - in England and Unbekannte Fliegende Objekte - in Germany) during World War II. In ufology, he appeared thanks to E. Rappelt (head of the Blue Book).

Ufology has been adopted by neo-insects that have emerged since the 1950s. Their leaders are usually contactors. Such communities profess unrealistic ideas: experiencing spiritual bliss, union with the Absolute, liberation from pressing worries ...

Some people experience an obsessive, sometimes inexplicable fear of UFOs (ufophobia). This mental disorder may be the result of a natural fear of the Unknown, the Mysterious.

The phrase UFO observer in relation to a random UFO eyewitness is incorrect, because observation is a purposeful and organized perception. It is appropriate to say an eyewitness instead of an observer.

The world's largest repository of UFO messages is the UFOCAT computer database (over 100,000 records). Work on it began as part of the Condon project at the University of Colorado (1960s) and continues to this day.

Many people became ufologists after personally observing unidentified flying objects. Personal experience is the most reliable source of the reality of UFOs and anomalous phenomena.

Kenneth Arnold is famous in ufology for observing the structure of UFOs in the Cascade Mountains (1947). Less well known is the fact that he met with plates about 10 times, and in 1966 he even filmed a brightly lit cylinder over Idaho Falls.

Among the UFO eyewitnesses were many celebrities, such as Joseph Stalin, Tour Heyerdahl, Henry Ford, Jimmy Carter, Frank Sinatra, Jean-Claude Van Damme, Charles de Gaulle, Mike Jordan, Paul McCartney, Cobo Abe, etc.

According to statistics, the activity of UFOs depends on astronomical phenomena. For example, flaps increase during the periods of the greatest approach of Mars to the Earth, in the new moon and full moon, as well as in the 11-year period of solar activity.

The term contactor is most appropriate for representatives of other civilizations who enter into telepathic and other dialogues with people (and they should be called contactors).

The hypothesis of the cosmic sowing of life on Earth (panspermia) was expressed by a Greek philosopher Anaxagoras (ca. 500-428 BC) - life arose from a seed that exists always and everywhere.

One of the first scientists professionally engaged in the study of UFOs was the famous Swiss psychiatrist Carl Jung, author of the book. Flying saucers - a modern myth about what was seen in the sky (1957).

Yaroslav Sochka, head of the Transcarpathian UFO Club UFODOS, congratulates everyone on the coming 2009

In 2008, we launched a new website "Ukraine Anomalous" - <http://ufodos.do.am...> Productively selling cooperation with the newspaper "Alien"... Learned at the next "Siegel readings" (March 23)...

2008 was a productive year in terms of UFO activation in Ukraine. The research work itself is not very — there were situation, when the weak organizational vein of ufologists became obvious. But all the bad, of course, we will leave in the past year... in the new year, we must take into account past mistakes and learn from them.

Once again, I sincerely congratulate everyone on the New Year holidays! Great creative success! New discoveries and beginnings! Don't be afraid to experiment!
