Membership - £1. 1s. Od p.a. \$3. U.S.A.

With this issue we see the commencement of COS-MOS' second year of operation. Over the last twelve months COS-MOS has grown steadily and surely, - has expanded to the point where we have been able to lay the foundations for the proper fulfillment of our aims.

This would not have been possible without the active co-operation of a great many people, and my especial thanks go to :-

Brian Simmonds, for giving me such able backing, particularly in the earlier months when it was most needed, and to his wife June, for her warm hospitality and good humour in the face of frequent 'invasions' of her home by varying numbers of COS-MOS members, and her assistance in numerous other directions.

Ed. Blandford, our editor, for bringing out the Journal with such unflinching regularity, and for his excellent presentation of its contents.

Sylvia Shaw, for so efficiently relieving me of a goodly proportion of paperwork when I was beginning to get 'snowed under'.

Janet Gregory, for her sound advice, common sense and absolute reliability - rare virtues -, together with her organisational capabilities.

My wife and son, for suffering an ever-increasing mountain of books, files, tapes, magazines, lists, mail etc., etc., and for their active assistance in many different ways.

Jim Saunderson has rendered sterling assistance at our meetings, and my thanks also to Desmond Greene and Miss Freda Hadwick for the use of the premises at Fitzjohn's Avenue and for the refreshments provided. Brian French, Lincoln Richford and Charles Carpenter too have frequently helped out at times when help was most needed.

My appreciation also of the encouragement I have received from John Cleary-Baker, together with co-operation both from BUFORA and its individual committee members. Thanks too to Lionel Beer and Spacelink for the space devoted to COS-MOS, its aims and activities; to CONTACT U.K. for their kind co-operation and to Susanne Stebbing for her assistance publicity-wise. I must also single out Harold Chibbett whose (newsletters) are invariably mines of information as indeed he is himself, - thank you Harold!

A special mention for two of our 'overseas correspondents', Eric Livingstone and Lucius Farish who have sent us so much useful, usable material.

2.

Finally, a very big THANK YOU to all our contributors for their efforts: to all our members for their continued support and to the dozens of companion societies here and overseas who exchange their Journals and Bulletins with us.

A very happy and rewarding New Year to you all.

Norman Oliver.

A Word of Praise

Dear Mr. Blandford,

I must congratulate you on the current issue (DEC) of COS-MOS.

And particularly on your editorial, "A Man Of Our Times", which I read with a wicked joy! It's like a breath of good fresh air blowing through the turgid atmosphere of so much of the UFO world these days.

Keep up the good work,

Yours sincerely,

Eric Biddle (Ludlow, Salop)

Thanks indeed but as from the next issue I am turning the magazine production over to someone else- any volunteers?

Ed L. Blandford.

The following anonymous communication was received by COS-MOS some months ago in an envelope postmarked 'Paris'. Normally, where the source of origin of a letter is unknown such letters are ignored, but coming as it did from outside this country, we felt our members would be interested in the contents, and but for pressure of space, it would have appeared in our last issue. Quite obviously we make no claims regarding its authenticity, though we considered a few comments were in order.

This letter has, we know, been sent to more than one other Society - a translation headed 'Our First Threatening Letter' appears in 'Flying Saucers Are Fact' Vol. 2. No.1., though unless 'threatening' refers to the contents of the last sentence, we cannot really see that the adjective is justified. Should any reader compare the translations and consider they are somewhat different in places we will be pleased to send him or her a copy of the original French so they may decide for themselves wherein lay any inaccuracies.

TRANSLATION

This information is highly dangerous, only a wide broadcast can neutralize the harm.

For reasons of security I cannot say who I am nor how I came by this information.

Please excuse me for this.

The super-intelligences who have created the UFO's have their centre on the planet Jupiter. They are the Masters of the solar system.

They regard us as animals of low intelligence, of whom they may dispose as they wish.

These beings who possess extraordinary powers, who can act over distances and can make themselves invisible, are formidable, they have means of occupying us by suggestion and hypnosis. They are spies who spread confusion and discord amongst us.

All the small beings observed near the UFO's have a more or less distant terrestrial origin. By selection or by crossing they have obtained very varied races.

On the planet Mars and on certain satellites there exist subterranean cities with artificial atmospheres, where the beings of terrestrial origin work for the Masters.

These Masters have bases in the depths of our oceans and on the ice-fields of the Antarctic. They take large quantities of water for their subterranean cities.

The rings of Saturn, despite their size, are artificial. These are clouds of ice which send back to the planet light and warmth from the sun and give conditions similar to those of life on Jupiter.

To enter into conflict with the Masters would be the death of humanity.

COMMENTS

Many of the ideas expressed in the communication could easily have been obtained from a number of sources, though this does not necessarily mean they were not original - or authentic even - to the writer; it would be hard nowadays to find any report or suggestion relating to Flying Saucers in which all the facts are new, - why should they be?

Without going into the question of whether or not intelligent life exists on other planets in our Solar System, - my own opinion for what it is worth is that quite clearly current Astronomical data and opinion indicate this to be unlikely, but then, who can say what such data and opinion will be in ten or twenty year's time?! - There does however, seem to be a discrepancy regarding Saturn and Jupiter. The conditions on both these planets - whether or not they support intelligent life - are similar. Why then should Saturn require artificial rings to reflect back light and warmth on to the planet when Jupiter does not?

On the assumption - quite a big one - that the information is accurate it is hard to see how a 'wide broadcast can neutralise the harm' since our anonymous informant also tells us in effect that there's nothing we can do about it!

----- Norman Oliver -----

The following (extracts) taken from a letter to Mr. A.G. Mobey from Hans Lauritzen dated Dec. 5th and sent to the Ed. for possible use.

After the contact I did everything possible to help my friends and everybody I met, as I have always done. Gradually I become aware that I had been lured by the UFO's. Strange things happened inside my body and brain some of them most shocking. Apart from the liver (I wonder what kind of liver I got from them) something had been

done to my brain, neck, spine, and reproductive system. When I began to wonder what all those things were made for, strong pains came in the spine in the back, the neck, and in the head. Something inside me tried to stop me each time I thought of telling the truth. That must be the reason why the contactees always tell something good about the UFO's. They are forced or controlled to do so.

It is clear that what the UFO's are doing to people is not to help them. They have their own reasons to do so, whatever that might be. If this invasion of something unknown into the bodies and brains of human beings is not stopped somehow, we might soon all be controlled by the UFO's. When these things are done to such vital parts of a human being, they are included in the instinct of self-preservation. People will never tell the truth. What a terrible world of silence, falsity, and lies are being made. As my strongest wish is to serve humanity, I have decided to tell the truth, although this should cost my life. But there is not much reason to think, that anybody will believe it apart from those, who also have been treated by the UFO's. Some contactees have tried to tell the truth hidden in their stories. Adamski told us that there were 100,000 space people working in governments and on other places. I know what he meant by 'spacepeople' - people treated by the UFO's. Recently I have heard that there are now millions of 'spacepeople'.

(cont'd. on Page 13).

MAUREEN GARNER'S EXPERIENCE

- As related to Norman Oliver on Sunday, February 23rd., 1969. -

"The experience that I had occurred in 1954 when I was living with my husband who was serving in the R.A.F. in a little village called Tenterden in the heart of Kent. I was coming out of my lounge door to go towards the kitchen, - the lounge door opens inwards onto the landing; I turned round and closed the door with my left hand, and then, as I went to proceed down the landing my passage was blocked by a man. He was standing on the landing in front of me preventing me from walking to the kitchen. I wasn't at all frightened or amazed even to see him; ordinarily if I saw a strange man in my house I would be very nervous, - I've only got to stand at the sink washing up and my husband comes in very quietly and peeps round the corner at me and I jump out of my skin, but I didn't on this occasion, I was surprised to see him, yes, but I wasn't nervous.

"What surprised me most of all was the height, - I am nearly six feet tall, and I had to tilt my head back quite a bit to look up at him - I should say he was over seven feet tall. He was wearing the 'inevitable' one-piece siren suit, but it wasn't brown like George Adamski's men were dressed in, - I'd read about these some months before in the papers. This was going through my mind as I looked at this man. He wasn't wearing a brown siren suit, but a metallic

blue siren suit, though it didn't seem to be made of metal - more of a soft nylonish sort of material, - it glimmered, but not like Lurex material does these days, - it just glimmered with a soft metallic light.

"I didn't look at his feet, I didn't have the time, what I looked at nearly all the time were his eyes and his face and his features, - and features is the operative word in this experience, not because he was a man, but because he was a strange looking man. He had a very high broad forehead, - I don't remember noticing his nose, I suppose he had one since if he hadn't he would have looked ugly and he wasn't ugly. He had a slit for a mouth, I say a slit because the lips weren't protruding like ours do, they might have turned inwards - I don't know. He had high cheek bones but they weren't protruding; the bones were 'heavy' underneath the skin. His eyes were very large, his jaw was a different shape - there was no jaw bone to see at all, but the shape of his face underneath the eyes was pointed. There was a chin, yes, but below his eyes and down to his chin the skin was absolutely immobile as if he hadn't opened his mouth for ages. The dominant shape of his face was a blunt ended triangle with his chin the blunt end.

"Now, his eyes were deep blue, he had pupils, and the expression in his eyes was something that I shall never forget, - I can remember this man as distinctly now as when I saw him then. His ears weren't visible, nor was any hair, because covering his cranium and his head and ears was a very tight-fitting helmet, and this helmet was made of what seemed like Perspex - it was a translucent material that you couldn't see through. Not an 'Astronaut's' helmet though. The suit fitted his neck, fitted the waist - there was no belt around the middle; he was definitely a man. There weren't any seams, fastenings or buttons or anything else like that in his clothing.

"His skin was pink, - he was a white man, he didn't say anything to me - he just stood and looked at me and I looked at him. If he was trying to give me a message I don't know what it was, I didn't have the impression of receiving anything from him. I felt compelled to look in his eyes though there was no specific expression in them. He had no eyebrows - or wrinkles in his skin, and one got the impression of great intelligence - wisdom even. I had no idea how old he was but I had the impression he knew everything about me there was to know. Why did this man materialise in front of me? I say materialise because I didn't see or hear him come into the house, and when he left he just left; one second I saw him, the next I didn't see him; he didn't disappear in a cloud of vapour or anything like that - just suddenly he wasn't there any more. He could have 'put me to sleep' whilst I was standing there and quietly left - I don't know.

"I've asked myself the question over the years; why did this man come to my home? The only reason I can think of is that he

6.

wanted me to see him and remember him. The only people I've told about this before have been relatives and close friends."

- - - - -

In answer to questions, Mrs. Garner told me that the man would have been standing in front of her for about half a minute and that she is normally very observant, particularly so far as people are concerned.

At no time did Mrs. Garner touch the man nor did he touch her - to be exact she said her right arm was about three inches away from his left elbow; he didn't move his hands at all, - he stood there with them at his side, but she didn't really look at them. He made no bodily movement at all - just his eyeballs moved and she could see the reflection of the landing window in them. Asked whether she felt he was actually 'present in the flesh' - solid, Mrs. Garner replied he appeared to be flesh and blood, she certainly couldn't see through him, he wasn't a projection and was as solid as I appeared to her at that moment.

The experience took place in the summer of 1954 in the day-time - Mrs. Garner is not quite sure of the exact time. Prior to her meeting she'd been dusting the lounge in their flat and she saw the man as she came out to go into the kitchen. Asked whether there had been any emotional upset prior to the incident, Mrs. Garner replied there had been none, - she was feeling perfectly wide awake and was not tired, so far as she was concerned, up to the point of her confrontation it had been a perfectly normal day.

The whole of the above story has been taken from a recording made by Mrs. Garner at my request in the presence of her husband and myself.

Norman Oliver.

DO SPACEMEN REALLY LIVE FOR CENTURIES ? - By Gene Duplantier

All Ufologists have read at one time or another that some space-people profess to be hundreds of years old. At first this will seem hard to believe and will require some evidence. Persons of Earth have a hard time living to 75 years, let alone for centuries.

I propose to show in the ensuing paragraphs that the spacepeople could be telling the truth of their ages. It's all a matter of **relativity**. This is how it works.

Suppose an astronaut rockets off into the galactic reaches and leaves his cousin on Earth who is the same age. After being in space for what he considered to be a year by Earth's time-instruments, he returns to Earth and finds his cousin has aged about 15 years.

Now if our space traveller came back in 10 years time, he would find his cousin deceased many years ago and Earth to be 150 years older.

The great scientist Albert Einstein studied "light" and out of his thinking came his famous "Theory of Relativity". It was found that if two spacecraft for example, one travelling towards the sun, and one travelling away from the sun, the speed of light still reached them at 186,000 miles per second, regardless of the direction in which they were going. You would naturally think that a spacecraft travelling at 150,000 miles per second would have almost caught up to the speed of light. This is not true. Einstein concluded that time must be longer on the spacecraft than on Earth. In other words, the faster our astronaut travels, the slower time passes for him, as compared to Earth time. The slowing down of time makes up for our astronauts speed away from light, therefore making the speed of light to appear to be the same. So now we have our traveller aging only one year for every fifteen years that have passed on Earth.

The next question that comes to mind is whether all this will be reversed when he returns to Earth and cancels out his youthfulness? Einstein said this wouldn't happen, that as long as our astronaut travelled, the slowing down of time would continue. It did not matter either what direction one travelled.

In 1961, scientists in Geneva found proof of Einstein's theory in their experiments with "mesons". A meson is an atomic particle that has a lifetime of one-millionth of a second. They sent a meson on a round trip at $\frac{3}{4}$ the speed of light, or 139,000 miles per second. This particular meson was found to have lived $1\frac{1}{2}$ times its normal lifespan.

In the future our galactic travellers will find they retain their youth upon returning to Earth after many years, while Earth will have aged considerably.

Consequently, spacepeople from other star systems could, by using our time on Earth as a standard when contacting us, by hundreds, even thousands of years older than any one person here. In any contacts with the aliens, they have always used our own measurements so it would be easy for us to grasp the situation at hand. Perhaps their units of measurements are quite different from ours and we wouldn't understand what they were saying if they used their own system.

In conclusion, let's not scoff at any of these seemingly fantastic tales we read about ... there could be more truth than fiction, our limited knowledge only clouding our understanding.

(Gene Duplantier is editor of "SAUCERS, SPACE & SCIENCE".)

UFOs OVER UXBRIDGE

David Riley and Barry Thomas, both aged 15, who live in Uxbridge, claim that since mid-October there have been some peculiar happenings in the skies above their town. On several occasions they've seen objects dimly silhouetted against the night sky which they're certain have not been planes and which have carried red lights at the top and white ones underneath.

In particular, David had one sighting at about 9.15 p.m. on an early November evening when he saw a saucer-shaped craft which he describes as "having a hollow dome glowing red in the middle of the upper part, whilst the lower was a greyish colour and appeared to revolve. There was a 'ring' around the centre of the craft. It was a cloudy night, and he observed it from the rear of his home as it travelled slowly for a couple of minutes above Uxbridge Common and lost from sight. David thought the object to be at a height of five to six hundred feet, and tentatively put its diameter at getting on for one hundred feet. He states also that there was considerable T.V. interference at the time of the sighting, this apparently dying out as the craft moved out of range.

David also reports that T.V. and radio interference has been noticeable at homes of some of his friends at times when other sightings have been 'logged'.

Still obtainable - - - - - SEQUEL TO SCORITON - - - - - LAST 100

Details the Contact claim of the late Ernest Arthur Bryant

Presents the results of later investigations into his story.

From Norman Oliver, 95, Taunton Road, London, S.E. 12 - 12/6d or £2.

Following a newspaper report of an errant Flying Saucer being found on the ground and returned to its owner by the police, COS-MOS was in touch with the owner, inventor Mr. Edward Jagers, B.Sc. of Glastonbury, who tells us the 'craft' uses a method of heavy 'ion' propulsion that is the result of some twenty years of research. He informs us also that the unit that accidentally 'got away', was too badly damaged by the forensic scientists called in by the police to be put in working order. He has however, partially completed the designs for a man carrying unit on which, finances permitting, he hopes to commence construction soon.

Dear Mr. Blandford,

As a recent member of COS-MOS may I say that I have greatly enjoyed the first three copies of your magazine that I have received.

The following item, which was reported in the Birmingham Evening Mail of December 15th, 1969, may be of some interest to you.

"HIS U.F.O. MAY BE JUST HOT AIR"

A motorist driving through North Worcestershire early today saw a brightly shining flying object streaming across the sky. But it is most unlikely that it was a visitor from outer space or a rocket off course, and there is, according to the R.A.F., a reasonable logical explanation.

The object was seen by Mr. John Hipkiss, an estate agent, who was driving to his office in Stourbridge, from his home in Mason Road, Kidderminster. "I have never seen anything like it in my life. It was very high and shining red - rocket shaped, and it seemed to be much larger than an aircraft", he said. "I saw it first as I left Kidderminster, travelling towards Iwerely and it seemed to me to be over Churchill.

"Then as I was driving towards Hagley, it disappeared behind high cloud which must have been over Bromsgrove".

An officer in the meteorological office at R.A.F. Shawbury, near Shrewsbury said, "It was most probably a radio-sonde balloon released from Liverpool early today, which is tracked by radar to give a record of wind speed in the upper air. These balloons are quite large about 60ft across, and in certain wind conditions can get distorted into rather odd shapes".

When told of the explanation Mr Hipkiss said: "I am glad about that, I was beginning to think that I was seeing things".

Incidentally, the Kidderminster/Stourbridge area has been the scene of several U.F.O. sightings in the past few months. In a recent B.U.F.O.R.A. newsletter there was a report of a near landing at Stourbridge and I have been in touch with a resident of this area who claims to have seen U.F.O.'s there on several occasions, including a landed craft! In August, 1968 a young Birmingham school-teacher was driving in this area when his car was "buzzed" by a glowing U.F.O., which pursued his car for several miles before making off across country.

Should you require further details of any of the above mentioned events I would be glad to supply them.

Yours sincerely,

A.K. Crowe. (Birmingham 11)

=====

UFOS AT SUNDOWN: The Hastings & St. Leonards Observer reported last month that a Mr. R.L. Birrell of 95 Stonefield Rd., Hastings, had sighted several large and small objects at about 5.30-5.50 p.m. while watching the sunset from the West Hill. The two largest objects were "hat-shaped" while the others were discs ten times smaller. The objects about seven in all, travelled at "fantastic" speed to disappear and re-appear. Mr. Birrell secured at least two witnesses to the sighting and stated that he was convinced the objects were "not from this planet".

ooo000ooo DENSITY LEVEL TRANSITION ooo000ooo

(A lecture given by Voltra of Venus)

Greetings in the Light of Our Radiant One. We wish to speak on a subject of import to you: that of transition from one frequency or density level to another. We do not in this sense mean transition referring to death of the physical body but a transition into the fourth etheric level. Such a transition will be made by man individuals at the time of the frequency change upon Planet Earth. Many have felt that this will take place gradually through many generations of your peoples. However, this is not so: the frequency change will take place abruptly to your peoples, abruptly, not only as we understand the time phases. This will be due to many events of a cataclysmic nature taking place, not only on your planet, but outside of your planet in the meaning of the Solar System. For a comet, or comets, coming into this system from areas outside, are due to cause much disruption of the - you might term it - force field surrounding Planet Earth. Since your scientiests do not have the knowledge available with which to protect your planet, as do we of other planets such as Venus, Mars, or Saturn, it is going to be inevitable that a certain amount of upheaval will transpire on the surface and beneath the surface of Planet Earth.

The frequency change will take place during this period, as the electricla force-field of the Earth will undergo a change in structure at this time. The spewing off of these comets from another body in space has also to do with the stepped-up vibration of the Central Sun, Vela, if you so choose to call it. It is known by other names, but names are not important. The Central Sun in emitting tremendously high frequencies, I think you would call them ultra-violet radiation, and at the time of this stepped-up energy output, the entrance of foreign bodies into this system will take place. Your planet, as you know it, has to undergo structural changes. Your peoples have to undergo changes of consciousness, and at this time, only those whose consciousness is attuned with the things of a new dispensation will take into themselves, their beings the increased energies and utilize these for their future transitional move. These energies taken into the field, or, as you term it, aura, of an individual, will take high frequency radiation as to raise the molecular structure of the cells to a point whereby the body will then vibrate in the fourth etheric level. So will come the change spoken of by many, imperfectly understood by many, but grasped by some. The transition of matter into a finer, more etherialized matter will take place. You will still be yourselves, you will still function as human beings with all the sense perceptions of human beings. But you will be of a more rarefied construction. Transition from physical to fourth etheric substance will take place.

(continued on Page 12).

Many of us whom you speak with are of this composition in our bodies and therein has lain much of the misunderstanding among your peoples as to our nature. We can and do lower the frequency rate of our bodies to become visible to the physical retina of your eyes. We are physical, we are physical-etheric, whereas you are physical-dense. A small difference, but an important one, my brothers and sisters, one upon which it would be well for you to dwell. The composition of all matter upon your planet is rapidly reaching a point wherein it will either become of a finer etherialized structure or will disintegrate. You will witness both of these phenomena taking place upon your period upon the planet.

Our purpose at this time is to educate those of you who will work with us at and after that time of frequency change. You have been well trained, yet much remains to be done. Much yet remains to be said in order to fully prepare you for the events which must soon occur. With no thoughts of fear, we bid you acquaint yourselves with the facts which lie before you. We once more stress that you will not become in the sense of discarnate beings: you merely step up one level and gain much in so doing. Your sense perceptions, rather than being eliminated, will only become heightened and an awareness of all that which is of beauty, of love, of eternal nature, will become as one with you.

I, Voltra, of the planet Venus, speak with you upon this occasion, in order to prepare your minds for that which lies ahead. I have only love in my heart for your peoples, though I am, as you might say, realistically aware of the fact that many of your peoples have no understanding of those things of which I speak - nor will they know, but will make their transition into a discarnate state at the time of the frequency change. So transition is, thus, of two natures: for those whose perceptions have been heightened, and whose consciousness evolves; and for those who devolve back into the animal level of herd consciousness, at this time upon the Planet Earth.

Where Light (Life) is sought, an ever-ascending spiral of awareness becomes open. Where dense material values alone hold sway, death of the physical body will result. Your peoples have had much time to make their choice and though we speak, we love, we may not spend time in idle regrets for those who could not or would not ascend in consciousness.

Now, I would leave you and ask only that the Light of Our Radiant One be with you, my brothers, my sisters of Earth.

Adonai vassu baragus.

===== DIPPED INTO GROUND-SHRINKING =====

Recap on the Whidby Island (Washington State). Witness-Mrs. "Ruth Brown" (pseud.) After circling the house, led by one of the ufonauts, who informed the witness that one of the drew "knew" her, the ufo shrank in size and tilted so that a part of it dipped into the ground (possibly refuelling?). During this process the witness received a mental, warning to stay clear. The ufo then straightened up, resuming full size and took off with noise, steam, flash and noise. E.L. Blandford.

(Continued from Page 4)

Some ufologists say: "An informed public will not panic". However, how can we tell that the UFO's are doing something to people, which even our most intelligent scientists cannot explain, and which we cannot stop them from doing. How can this be told?

Of course the tension between the countries is dangerous. But far more dangerous is the invasion of these unknown things into human beings. If we do not find some means to stop it, humanity might soon be erased from this planet in a terrible catastrophe of cosmic dimension. The UFO's are surrounded by strong force fields which cannot be penetrated by physical material and electromagnetic weapons. Fortunately there is one thing which can penetrate these force fields and that is sound. So our chance to survive will be as soon as possible to develop powerful sonic, ultrasonic, supersonic, and hypersonic weapons to defend ourselves against the UFO's before it is too late. I got the impression that the two big dim yellow globes were independent entities or beings. Before my consciousness was blacked-out, I heard a hissing sound so regular, that I would estimate the frequency to be 50 Hertz or 25 Hertz. The Swedish group, which informed me a few weeks before that I was soon going to be contacted, says that the Cosmic Visitors are human beings like ourselves coming in metallic crafts.

Before the contact I had so much love, joy, happiness, and peace of mind. As I believed 100% that the UFO's were here to help us, I was very happy to have been contacted. However, the pains, suffering, and insanity they gave me gradually destroyed all. That certainly was no help. Some people say we must suffer to learn. I do not agree. When people learn by suffering (if they can learn anything at all that way) they will have an opposition to it. When people learn by love, they will love what they learn.
