STRANGER AND STRANGER

As a result of local press publicity, the activities of the PRA group have become more well known and subsequently I have received a number of interesting telephone calls.

In several cases this has led to an interview with the caller and as a result, some very strange stories have come to light and not all of them connected with UFO's.

Several of the incidents have been included in this months OVNI newsletter for your interest.

TRIANGULAR LIGHTS SEEN NEAR WILLINGTON

The witness, (we will call him 'Brian') who is a keen aircraft spotter and is self-employed, lives at West Hallam near Ilkeston. On a night late last year, believed to have been in November, he was travelling along the A5132 and had just passed through Willington.

'Brian' takes up the story:-

"The traffic was very heavy, it's quite a narrow two-way road and all the cars had their headlights on. The cars behind me were very close and a lot of reflections were coming from the cars coming the opposite way, because its a narrow road and there was a lot of light".

"I was driving along and I don't know, something just caught my eye. I'm an aircraft watcher anyway and if a plane flies overhead, I look up always. It doesn't matter whether it's night or day or what it is, it's an automatic reaction".

"Something caught my eye and I looked up and I saw this 'shape', a configuration of lights. What it was, it was like two pyramid shaped triangles, they were together almost, but staggered (see sketch). You couldn't actually see a defined outline of triangles, but it was made up of triangles".

"The height, I suppose it must have been 500' to 1000' up and it appeared to be about 100' long. I thought that to be 1,000' up and to be 100' long, it must have been a b..... big aircraft and it's going to make a lot of noise".

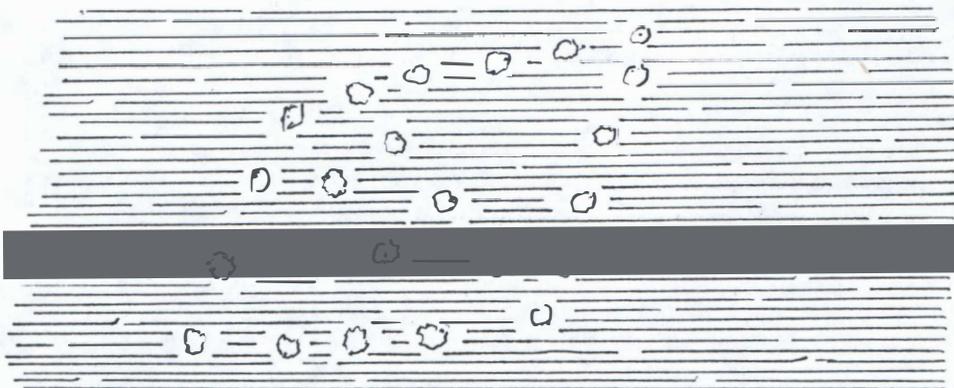

"Then I thought, hang on a minute, it's all these lights, its a reflection off my rear view mirror or sun visor or something, shining onto the dashboard and reflecting onto the window. I wound the window down on my drivers side and it was still there, it was keeping pace with me. There was no noise, I kept looking at it, but all the traffic was going by and I was trying to figure out, is it something that's going away, something that's going to the right or is it something that's about to go overhead, I couldn't really say which way it was going".

"It annoyed me so much, because I couldn't figure out what it was going to do. On planes, on the wingtips, you get the white flashing (strobe) lights, you get the red and the green, you get headlights (landing lights) on the front, we were near to Donnington (East Midlands Airport), even the power stations have red lights on the top. But this had no lights other than the two 'triangles' and that's all there was, there was nothing else there at all".

Question: What direction was it flying in?

"I don't know, all I got was just this shape in the sky, I didn't know whether it was coming towards me. If it had a row of windows, like you can see in an aircraft, then you could have seen which way it was flying, but I couldn't see which way it was going and as I say, it was really big, I thought that I should be able to work that out, but because the traffic was so bad, I couldn't pull in and stop. I've got some binoculars in my car, I always carry them to look at anything, birds, aircraft, anything".

"I eventually did find a turning, by the time I pulled in there and jumped out of my car, it had vanished, there was nothing there at all! Even at that distance, a plane of that size, by the time that I had stopped, I would have seen it in some direction somewhere, there should have been something showing, but there was nothing".

This incident took place approx. 8 miles to the South of the Garry Stapleton sighting of a "Flying Triangle" at Breadsall 11-11-92 (note the similarities: OVNI November 92).

Leonard H. Stringfield

The PRA has recently been in touch with this well known American UFO investigator and author and obtained two of his recent publications, Status Report III & IV.

There are several new and amazing revelations made in these documents, including information on the shooting of an Alien (a "Gray") on an American Air Base on the 18th of January 1978.

The body of the Alien, which lay on one of the aircraft runways, was cordoned off by "Blue Beret" security police and later placed in a container and flown off to the Wright-Patterson Air Force Base.

Leonard H. Stringfield has served on several of the major UFO organizations, including a term with MUFON.

Additional UFO-related experiences includes co-operation with the Air Defense Command filter center, screening UFO reports in Ohio (1953-57). He also served as an "Early Warning Co-ordinator" for the University of Colorado UFO Project (1967-68), screening UFO reports for possible scientific study; former investigator, Southwestern Ohio, Center for UFO Studies; and adviser to Sir Eric Gairy, former Prime Minister of Grenada, 1977-78, during his efforts to establish a UFO research agency within the framework of the United Nations.

In 1981, Len was recognised in the MUFON Symposium Proceedings for his contributions to MUFON and his achievements in the UFO field. Len and his wife Dell, reside in Cincinnati, USA.

In a letter to the Phenomenon Research Association, Len confided that he is presently in touch with an American scientist who claims that he interrogated a live Alien at a secret US facility during the 1970's!

Leonard H. Stringfield, privately published a book last year which includes much new information about crash retrievals etc., including Roswell and Kedisbury Pa. crashes.

The title is "UFO Crash/Retrievals, The Inner Sanctum" (Status Report VI).

The price of the book is \$18.50 plus \$6.00 airmail. Order by international money order, or draft on a US Bank.

Leonard's publication "Status Report V" is currently in short supply, but he hopes to have more copies available during the next few weeks.

I feel sure that we are going to hear a lot more about Leonard H. Stringfield's investigations in the future!

Leonard H. Stringfield

Len Stringfield retired in 1981 as Director of Public Relations and Marketing Services for DuBois Chemicals, a division of Chemed Corp., after 31 years service with the company. For over 30 years he has also served several of the major UFO organizations in a public relations capacity, including a term on the MUFON Board of Directors.

In addition to authoring Inside Saucer Post, 3-0 Blue (1957) describing his activities as Director of Civilian Research Interplanetary Flying Objects (C.R.I.F.O.), and Situation Red: The UFO Siege (1977), Len has now authored four Status Reports since 1978 on his investigations of UFO crash/retrieval cases.

**ABSTRACT**

New testimonial evidence and a document are bared in Status Report IV, following the re-emergence in 1983 of the informant whose experience, as a witness, was first disclosed three years earlier and published as Case A3 in Status Report III, 1982. The source, a sergeant in the Air Force Security Police at McGuire AFB, adds substantive information relative to the reported fatal encounter on January 18, 1978, between an alleged alien entity and a Ft. Dix MP and relates his firsthand observation, while on duty, when the slain entity was found on an abandoned runway at McGuire AFB. The source also reveals his sensitive involvement with authorities in various agencies following his discharge from service because of his disclosures to this writer. Also reported are the communications with the source since 1980 and an arranged meeting between the source and a colleague to lend back-up credibility to the case. Investigation continues.

The PRA has now obtained copies of "UFO/Crash Retrievals: The Evidence" Status Report III & "The Fatal Encounter At Ft. DIX-McGuire" Status Rept. IV. They will be available (on loan) to members only, in the near future.

*To Onna Fowler
My Best wishes
Len Stringfield
March 6-93*

As we know all energy forms can be used in a beneficial way and adversely, of course, be harmful. In recent years looking at this Earth's and Solar energy phenomenon, with its sudden increase of fluctuating potentials - has it at last opened our eyes to this form of forgotten energy.

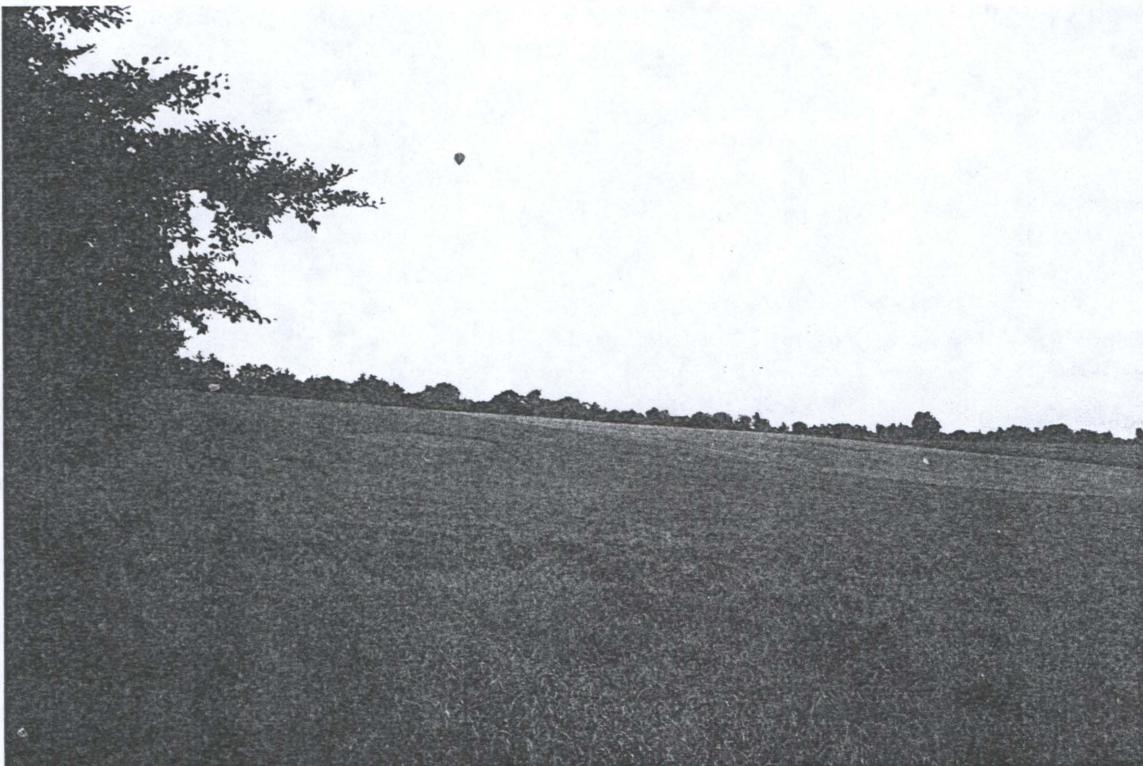

The pyramid, I believe, is showing us one way in which this energy is being used, with a constant low level of this energy flow, this flow reversing as with the standing stones at sun set and sun rise. So the benefit of this energy within the pyramid is to preserve the body. Building the pyramids in Egypt will, of course, give them the constant supply of solar energy, plus the constant flow of water of the River Nile giving the added boost to the earth's energy, a negative potential.

The energy flow created within the pyramid as I see it will react on the water molecule breaking it down into oxygen and hydrogen, therefore removing all moisture.

The reasons for this angle of thought is as follows:

1. Animals that stray and die because trapped within the pyramids are found dehydrated and preserved not decomposed.
2. It is also suggested that food will keep longer within the pyramid shape.
3. Plus the razor blade that becomes sharper! but this effect has been created by the moisture on the blade being removed as studies have shown.

So I am suggesting that one purpose of this energy is to preserve the body using the collective flow of energy formed by the pyramid - removing the moisture so no bacteria can survive.

A STRANGE NIGHT ENCOUNTER

One of the incidental stories that has come to light during the interviewing of a local UFO witness is reproduced below. A good yarn or something more sinister.....what do you think?

During the mid-sixties, the witness lived and worked in Spain and in order to visit his home in the Midlands and he often hitch-hiked through Spain and France and then up from the South of England. It was during one of these journeys that this incident took place. The witness tells his story:-

We were hitch-hiking back, two of us and unfortunately, the lift that we had just had, dropped us off in the middle of the countryside. Which is bad news for any hitch-hiker because you can't get a lift in the middle of the countryside, plus the fact that it was a pitch black night.

We were still hitching for a lift, when a car pulled up and the chap said "jump in lads, where are you going to?" We said that we were going to Nottingham or Derby, either one would do. I can't remember where we were at the time, but we were coming up from the South to the North.

To make conversation, we said to him "what's the weather been like here, has it been very good?" He said, "I think it's been quite sunny", I said "you think it's been quite sunny?" then he said "Oh yes, it's been quite sunny." I said that we had been in Spain and didn't know what the weather had been like in England.

He then said that he wouldn't know what the temperature was because "I've got a plastic suit on". "It starts at the neck here, you can't see it, it's under my clothes". "I can show you the edge of it, it goes from my neck and my cuffs, goes all the way over my body and it goes right down to my ankles". "I've got a skin complaint and I can't feel the temperature of the outside world, you see". It was dark in his car and I couldn't see the edge of his cuffs, as though you could see anything hanging out of his cuffs just like that!

He said "and this is the reason I can't feel the outside temperature". We said "Yes, oh sure, we understand". The car carried on and then he said "this is far as I can take you" and once again he dropped us off in the middle of the countryside in the pitch black! We said "O.K. thanks very much" and we took our bags out and he said "sorry I couldn't help you any more" and he drove off.

The car went off into the night and you could see the red lights of his car, it was pitch black and we were in the middle of the countryside and you could see nothing else only the red lights going down the road. His car went off down the road, turned a distant corner, took off in the air and vanished!

We couldn't believe our eyes, a spaceman with a suit on and his car's just took off!

We walked around the corner, we discovered an airfield on the left hand side and as he had got to the corner a plane must have taken off! I don't know what kind of airfield it was, I don't even know where it was, it was in the middle of nowhere!

I can't understand why he didn't know whether it had been warm or cold, you would have known that whether you had a suit on or not, he said the suit was so thin, he didn't even know it was there.....?

- - - - -

We are always pleased to hear from our old friend Pat Delgado (Co-author of "Circular Evidence: Bloomsbury Press).

In a recent letter, Pat expressed his concern about the direction that the World is taking. He believes that no one group is in a position to change anything on Earth and that changes will come from a "higher level".

We have received two articles from Pat, one describing how a mandelbrot pictogram shape could be made and a second more thought provoking letter on his thoughts about the future of the human race on this planet.

MAKING A MANDELBROT PICTOGRAM

By Pat Delgado

Soon after the Mandelbrot Set pictogram appeared at Ickleton and in face of the general opinion that the heart shape was almost impossible to reproduce by simple means, the seeds of an idea formed in my head.

It was only very recently that I decided to lay out the simplest method of achieving the main heart shape.

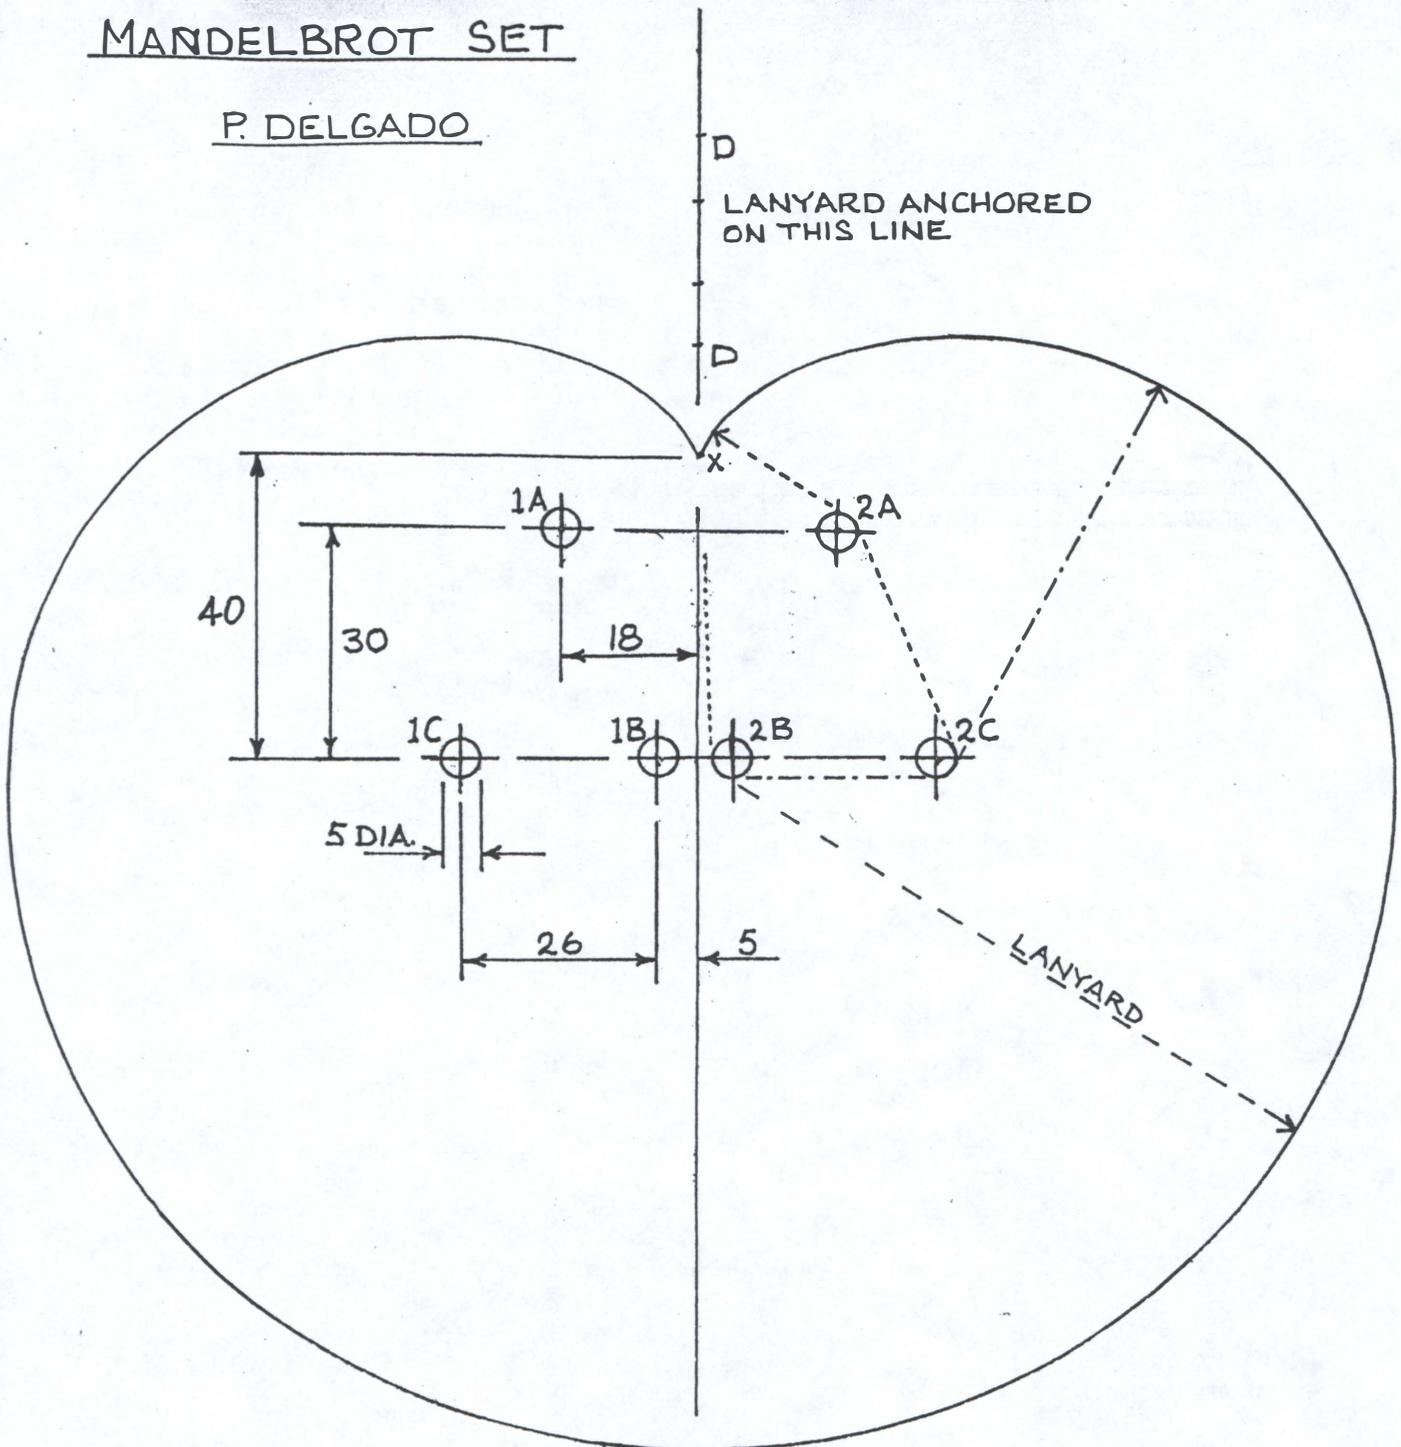

A drawing can be reproduced using only paper, pencil, ruler, six pins (or three to do one half at a time) and, in my case, six pieces of wood dowling drilled axially to push the pins through to form the cylinders or drums.

The further the lanyard anchor point is taken up the line D-D the flatter will be the base of the shape where the lanyard swings free of any cylinders. This almost flat portion seems to be a feature of the computer generated shape.

The units of the dimension for the pin positions are given in the diagram. Wherever or however the principle is applied it is fairly easy to produce a symmetrical and near perfect shape of any size.

MANDELBROT SET

P. DELGADO

Method of producing main Mandelbrot Set shape.

Scribing end of lanyard is held at point X then taken round cylinders 2A, 2C, 2B and anchored at any point on line D-D. Keeping the lanyard taut start at X and swing the scribe clockwise unwrapping the lanyard from cylinders 2A, 2C, 2B and continue on to wrap the lanyard round cylinders 1B, 1C, 1A to finish at point X.

The cylinders provide a smooth transition as the lanyard progresses to scribe a continuously variable radii. A loop of cotton round anchor and lead of pencil makes a useful lanyard.

Changing the cylinder diameters and positions will give an infinite variety of other shapes.

WHAT OF THE FUTURE?

By Pat Delgado

There have been a great many changes in the time that has passed, changes in people, attitudes and events, some inevitable others significant in their own right.

During the autumn of last year I could foresee the pattern of events and situations that were to take place this year. Consequently I decided to observe from the side lines and become involved with visits to crop circle sites on a limited basis, even so, I met many old friends and made many new ones.

There is no doubt that the hoaxing element has created some confusion, but it is amazing such a high percentage of people see that as the natural progression of humanity. Beneath the maelstrom of manual replication and the insincerity it brought with it, the true simple crop circle phenomenon continues as serenely as ever as it probably has done for thousands of years.

Not only have we seen the evolution of crop circles keep pace with the expectations of ascending interest but parallel with this and because of it, has been the expansion of human minds in many directions. This is a minor miracle in itself because it has elevated many thousands of people's thinking capacity to heights unattainable by usual mundane standards.

Some crop circle groups have petered out, possibly through the inability to see beyond crop circles or not recognising the mandatory requirement to embrace a wider scope of mysteries that run parallel to the original subject. I am sure that at whatever level people are aware of crop circles their minds have benefitted to some degree of positive expansion.

Again this year many people have experienced the continuance of inexplicable sights and sounds, both in and away from crop circles. My analysis shows that mysterious phenomena can occur almost anywhere at any time. It would be true to say that certain categories of phenomena are associated with certain localities and this may be related to expectancy. Photography also continues to reveal anomalies that defy the experts and specialists. There are individual prints of crop circles developed from an otherwise perfect roll which have all over hues or bands or blobs of red or blue. Other photos have captured mysterious objects in the sky or at ground level. Tape recorders are continuing to record a variety of strange sounds in and out of doors.

The most popular or 'buzz' feeling world wide is the expectancy of something very significant or even catastrophic will occur on our planet within a few years. Some say it has already and subtly begun, which I must say is my feeling.

There are at least five ways in which this speculative change may take place.

1. A rapid relocation of the planet's energy forces, such as a sudden flip of the Earth's magnetic poles axis to a dramatically

new position. We are not sure whether all creatures including ourselves, plants and geology have become magnetically oriented and established with the magnetic axis in its present position.

2. A shift in the Earth's rotational axis or the earth developing a wobble effect as when a spinning top begins to slow down.

3. A rapid degradation of the Earth's protective ozone layer causing intolerable climatic changes.

4. The large scale depletion of social standards, wars and famine following an exponential curve.

5. A rapid change in neighbourly attitudes between countries, resulting in the escalation of love, peace and unity. The ruling bodies of most countries would require some 'control' to bring this about.

I am sure there are many other suggestions, some even more valid than those mentioned. Perhaps some conditions will be caused by the result of others. One thing is for sure, mankind does not stand still and maybe we will progress upwards or downwards, do you think we have the choice?

Information is continuing to be leaked, or orchestrated to do so about the infiltration into our societies of alien entities who have probably been among us for a long time. Also of continuing mutilations of animals and people, abductions, mind control and genetic engineering. To me it appears that what is occurring between humans and aliens, the publication of names, departments, sources and locations of hitherto sensitive information is being metered out to the public in doses that can be tolerated and enable us to become acclimatised. If all the truth were suddenly exploded on the public the result would range from total disbelief to anarchy and the collapse of society as we know it.

If this information is to be believed then the human race, its societies and controlling governmental bodies has been undergoing specific and purposeful modification accompanied by analytical surveillance. The reason appears to be the need to raise humans to very high level of intelligence and in the process, discard all that is deemed unnecessary in order to produce replacement entities for those who are presently in control.

Just imagine, if this line of thought were extended, those in control now would eventually be surpassed by those they had genetically engineered whereby the final product of this see saw effect may be an all powerful ball of absolute intelligence.

However, returning to a feet on the ground attitude, where there is smoke there is fire and I am sure in the not too distant future there will be further revelations. The escalation of 'leaked' information will continue and it will be interesting to see if any of it is officially verified.

Best wishes
Pat

TALE ENDERS

Jeff Whitear has sent us a list of recorded volcanic eruptions and earthquakes since December 1988. It shows a progressive increase to date. The list will probably be produced in the next issue of OVNI in chart form.

Omar Fowler gave a talk to the Conservative Coffee Group at the leisure Centre, Melbourne during their morning meeting on the 16th March. After initial curiosity, the audience sat quietly stunned by some of the revelations made during the audio/visual talk. This was followed by a probing question/answers session.

Has anyone any news on the result of the "Global Deception" conference that took place at the Wembley arena on the 9/10th January this year?

Another subject that we were unable to include this month, was the full report on the West Bridgford sighting on 11th January 1993. The primary witness Mrs V.A.Scott has now joined the PRA.

Next issue, we expect to include details of the Commander Horatio Penrose, RN Retd, case that took place near Derby on the 13th May 1954.

We are now exchanging magazines with the "Wild Places" publication of St.Austell, Cornwall. A copy is available for members information.

If you missed the Monday 15th March, UFO programme on SKY TV, which featured Jenny Randles and Timothy Good, plus many others. A recording is available for members only, on loan.

NEXT MEETING

There will be a meeting at the Stanley Club, Stanley Common, Ilkeston (take the A609) next

WEDNESDAY March 24th at 8PM

There will be an audio/video presentation, which will include some of the latest footage from the USA. This features film shot from the Space Shuttle of a UFO seemingly taking avoiding action after a beam of some kind (laser?) had been fired at it. There is also an amazing shot, (taken accidentally, during overhead UFO activity) of what appears to be an Alien entering a house by means of the bathroom window.....

The Audio presentation includes an experienced UFO investigator describing how an alien intelligence was contacted and subsequently visited his house in human form!

Non members welcome: ADMISSION FOR THE ABOVE MEETING - 50P
